MIAMI-DADE

2040 LONG RANGE TRANSPORTATION PLAN

Metropolitan Planning Organization for the Miami Urbanized Area

This document was prepared by the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area in collaboration with Florida Department of Transportation, Miami-Dade Expressway Authority, Florida's Turnpike Enterprise, South Florida Regional Transportation Authority, Miami-Dade League of Cities, Miami-Dade County Regulatory and Economic Resources Department, Miami-Dade County Public Works and Waste Management Department, Miami-Dade Transit Agency, Miami-Dade Aviation Department, Miami-Dade Seaport Department, Miami-Dade County Office of Strategic Business Management, City of North Miami, City of Hialeah, City of Miami, City of Miami Beach, City of Miami Gardens, City of Homestead, Miami-Dade County Public Schools, Miami-Dade MPO Citizens Transportation Advisory Committee, Bicycle/Pedestrian Advisory Council, Freight Transportation Advisory Committee, Transportation Aesthetics Review Committee, Broward MPO, Palm Beach MPO, and South Florida Regional Planning Council.

The Miami-Dade MPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade MPO to comply with all of the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

INTRODUCTION

This memorandum describes the computer program developed and assumptions used to produce directional trip distribution from a Traffic Analysis Zone (TAZ) and present the results. The computer program was designed to provide a summary of the daily vehicle trips to the eight cardinal directions for each of the 1,506 internal TAZs within the Miami-Dade urban area. The summary generated by the program provides an estimate of travel by direction for each individual zone using the sketch planning technique described below.

DIRECTIONAL TRIP DISTRIBUTION PROGRAM

The cardinal directional trip program was structured as a stand-alone utility program for the Southeast Regional Planning Model (SERPM). The SERPM was developed with the Florida Standard Urban Transportation Model Structure (FSUTMS) and Cube Voyager software. The cardinal directional trip distribution program was developed as a FORTRAN utility to the FSUTMS/Cube Voyager program.

There are three primary inputs required by the cardinal directional trip program, including the number of internal transportation analysis zones (TAZ); the “XY” or geographical coordinate file, which describes the location of each zonal centroid; and a matrix of the daily vehicle trips created after the Coordinated Travel – Regional Activity Based Modeling Platform (CT-RAMP) step in the model chain.

The program is designed to identify the direction of travel from each internal TAZ to all possible destination TAZs. Trips associated with each of the TAZ pairs are assigned to one of the eight cardinal directions. Each of the cardinal directions consist of a 45 degree angle formed by the intersection of the eight major compass bearings and are defined as follows:

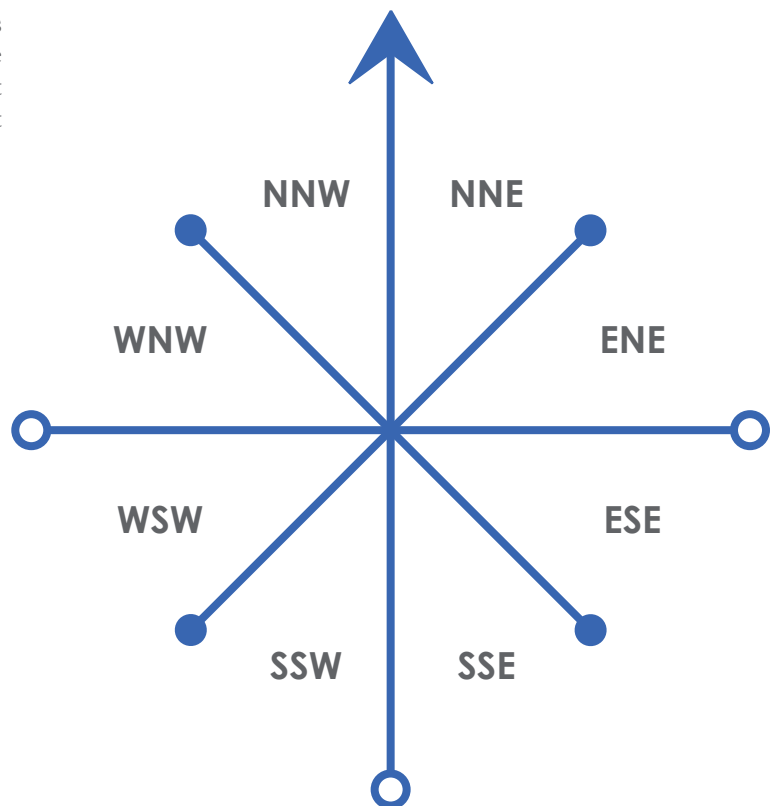

- NNE - between North and Northeast
- ENE - between East and Northeast
- ESE - between East and Southeast
- SSE - between South and Southeast
- SSW - between South and Southwest
- WSW - between West and Southwest
- WNW - between West and Northwest
- NNW - between North and Northwest

The direction of each TAZ pair (interchange) is defined based upon the differences in X and Y coordinates for each interchange, using the origin TAZ as a reference point. Once the directions of each interchange are determined, daily total vehicle trips from the SERPM are assigned to the directions. The program then summarizes the number of trips and the percentage by direction and by origin TAZ.

It should be noted that the directions of travel from a given TAZ to all other TAZs are determined only by their centroid location. The program does not consider the actual path of travel to determine the directions of trips. Output should be used considering this limitation of the program. It should also be noted that the program calculates only the direction of trips originating from a given zone. Hence, the summary includes the “one-way” daily vehicle trips leaving the zone but not the trips entering the zone.

PROGRAM APPLICATION

A production run was made using the cardinal directional trip program for the Year 2010 validated daily vehicle trip table. The output for the directional distribution for the Year 2010 validation simulation is provided in Appendix A. The cardinal directional trip program can be used for any simulations of future year for changes in land use, and transportation systems. Appendix B contains the cardinal distribution report for the 2040 cost feasible plan.
