5.3 IMPLEMENTATION OF THE STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN

PURPOSE:

To support the advancement and implementation of the SMART Plan through analysis, monitoring, updating and engagement of the Miami-Dade Transportation Planning Organization (TPO) in associated technical and policy activities for each of the six (6) rapid transit corridors identified in the SMART Plan.

REQUIRED ACTIVITIES:

This task includes the development of supporting activities that will be identified as needed during the development of this plan. Once the supporting effort is determined, a Scope of Work (SOW) will be developed, with the appropriate budget and funding sources. The TPO will coordinate with the transportation partners for the work to be done, as well as the concurrence from all local, state and federal agencies, as required. The above referenced activities will include, but not limited to:

Land-Use Visioning and Economic Mobility Development

1. Develop visioning plans integrating transportation and land use scenarios. The MFO in conjunction with ESRI, and the Information Technology Department (ITD) and Regulatory and Economic Resources (RER) are upgrading the County GIS System from 2D to 3D. This application will be used in the evaluation and visualization of different land use scenarios for each corridor.
2. Develop transit corridor and economic mobility master plans with specific emphasis on multi-modal first and last mile connectivity, transit hubs, parking demand and other opportunities.
3. Assessment of economic mobility development through a market demand analysis which may evaluate to the creation of new Central Business Districts or Economic Development Zones. Commercial activities and other applicable economic development plans to be accessed in a corridor by corridor basis and system-wide.
4. Assess economic mobility growth scenarios with value capture initiatives and potential revenue management.
5. Assessment of Transit Oriented Development (TOD) along SMART Plan corridors including potential opportunities provided by existing county/local ordinances (i.e. Rapid Transit Zones).
6. Assessment of Land Use Scenarios for existing and future conditions to reinforce the future rapid transit system.

Travel Demand

The work required for this task will include but not limited to:
1. Development/review of system-wide ridership forecast using the Federal Transit Administration (FTA) Simplified Trips on Project Software (STOPS) models. Efforts conducted in this task will not duplicate the work done in the development of the PD&Es.
2. Develop system-wide ridership forecast to evaluate the integration and connectivity among the six (6) SMART corridors, as requested by the FTA.

System Development

The work required for this task will include but not limited to:
ELEMENT 5: SPECIAL PROJECT PLANNING

1. Performance measures: Develop performance measures and significant trends including those utilized by the Federal Transit Administration’s Capital Investment Grant Program.

2. Cost estimation: Prepare systems wide capital, construction, operation and maintenance cost for the corridors.

3. Assess current laws, policies and ordinances and modifications needed to implement the SMART corridors.

4. Evaluate the interrelationship between each corridor in the SMART Plan: Assess short, medium and long-term opportunities to enhance system connections to a more fully integrated system.

5. The SMART Plan corridors shall support the economic development activities of the County including major events.

6. Develop a Program Management Plan (PMP) for the implementation of each corridor on the SMART Plan. Evaluate roles and responsibilities for the implementation of the SMART Plan corridors.

Transit Development
The work required for this task will include but not limited to:

a. Transit Hub: Development of plans for major transit facilities to create new urban centers along the SMART Plan corridors.

b. Develop First and Last Mile options plus feeder network and trails to improve mobility and accessibility to the SMART corridors.

c. Use of project visualization techniques to enhance the results of proposed plans.

d. Technical Presentations: Prepare and provide presentations related to the SMART Plan to the TPO governing board and its committees, municipalities, partner agencies and community groups.

Economic Development Assessment

1. Evaluate the economic impacts/benefits due to the implementation of the SMART Plan Corridors.

2. Develop systemwide and/or corridor based economic development scenarios based in regional economic models.

3. Assess the current planning process and implementation plan to help achieve broader economic development goals and associated job creation.

4. Evaluate local and federal guidelines for the creation of economic development strategies.

5. Develop a Comprehensive Economic Development Plan including an in-depth analysis of regional strengths, weakness, and opportunities; and a strategic direction/action plan for the area. The economic development strategy include elements such as economic and social impacts, public support, commercial and affordable housing, and funding.

Public Engagement and Outreach Activities
The work required for this task will include but not limited to:

1. Conduct public charrettes

2. Development and Management of Public Information Plan for the SMART Plan

3. Produce written and/or digital products to support the outreach activities

1. Development of pilot projects that advance elements of the SMART Plan

2. Coordination with partner agencies for project application and delivery

3. Public engagement efforts for coordination and deployment.
ELEMENT 5: SPECIAL PROJECT PLANNING
