WELCOME ATTENDEES

Honorable Anthony Rodriguez
Chairman, Miami-Dade TPO

Welcome to the Miami-Dade Transportation Planning Organization (TPO) Bicycle Fatalities and Injuries Reduction Task Force "Safe Streets Cinema."

The goal is to promote safer communities by highlighting best practices and successful roadway and bikeway designs that have been proven to reduce fatalities and injuries.

The members of the TPO Task Force have explored ways to implement these solutions in Southeast Florida. They have met with policymakers, global experts, and international leaders, resulting in critical conversations for delivering safer transportation infrastructure in our communities.

Thank you for joining us today.

Honorable Eric Diaz-Padron
*Vice Chairman, Miami-Dade TPO &
Chairman, TPO Bicycle Fatalities and
Injuries Reduction Task Force*

It is my honor to lead the TPO Bicycle Fatalities and Injuries Reduction Task Force. Our mission is to coordinate with transportation partners and investigate ways to implement safer infrastructure and reverse the trend with bicycle related fatalities and injuries in Miami-Dade County.

Today we will share a documentary presentation "Wheels of Change: Global Best Practices for Cycling Infrastructure & Safer Communities," and we will hear from policymakers, industry experts, and international partners to identify how similar solutions can be implemented in Southeast Florida.

We look forward to strengthening collaboration among local, state, and federal agencies to make our communities safer for all users of our roadway and bikeway network.

MIAMI-DADE TPO

BICYCLE FATALITIES AND INJURIES REDUCTION TASK FORCE

Miami-Dade TPO Governing Board Chairman, Honorable Anthony Rodriguez, created the Bicycle Fatalities and Injuries Reduction Task Force in response to Florida's statistics with the highest rate of bicycle fatalities in the nation. In addition, Miami-Dade County leads the state with the highest fatalities compared to all other large metropolitan regions in Florida.

Since its inception, the Task Force has initiated multiple efforts to identify safety solutions and raise awareness, including the sponsoring of Safe Streets Cinema to highlight best practices and create pathways to safer communities.

In addition, the Task Force has approved a TPO pilot program to implement a proactive crash safety analysis database. The pilot will utilize artificial intelligence to capture near-misses at multiple selected intersections in Miami-Dade County. The data collected will serve to better understand crash risk exposure, multimodal conflict patterns, and operational safety issues affecting pedestrians, bicyclists, micromobility users, and motorists.

As the Task Force delivers on its core mission, it will continue to encourage collaboration with partner agencies to help increase safety for bicyclists and pedestrians in Miami-Dade County and the region. Thank you for your participation and for joining us today.

An Environmentally responsible Hydrogen powered electric Tram runs frequent service the length of the park (four-miles) unencumbered by traffic congestion below.

The Tram stops are every half-mile allowing residents quick and reliable access to Florida's wider regional transit network at Aventura's BrightLine High Speed Rail station.

The stations provide alternate crossing locations on William Lehman Causeway and Collins Avenue so that Pedestrian/Cycle intermodal conflict with Cars can be reduced.
