**METROPOLITAN PLANNING ORGANIZATION  
DADE COUNTY, FLORIDA**

**JUNE, 1985  
Revised**

## PREFACE

The information contained in the "Long Range Element of the Year 2005 Metro Dade Transportation Plan and Improvement Priorities" summarizes the transportation investments proposed for the metropolitan area ground transportation system for the next twenty years. These proposals have resulted from a transportation planning effort begun in 1982 in response to the ongoing federal, state and local requirements that guide the activities of the Metropolitan Planning Organization for the Miami Urbanized Area. The document proposed for adoption represents a synthesis of the source publication containing a detailed description of the technical analysis entitled "Year 2005 Metro-Dade Transportation Plan: 1984 Update". The latter document was published in September 1984, and revised in April 1985.

JUNE

Consistent with the purposes of the Plan, as initially set out by the MPO Board when the updating process was initiated, a phased program has been specified. As a result, the listing of projects contained in this document explicitly indicates the relative priority of the various improvements.

The Long-Range Element recommends a number of highway and transit capacity improvements considered to be necessary to effectively meet transportation needs. The recommended actions are based on an extensive analysis of travel demand and level of transportation service.

A major effort was undertaken to assess the fiscal implications of the Plan. Highway capacity improvements for the twenty year period are estimated to cost about \$770 million of which about \$470 million are for projects on the State Highway System and about \$300 million are for projects on the County Highway System. Proposed rapid transit improvements are estimated to cost \$2,528 million. In addition to the amount of Federal and State funds that may ultimately be allocated for these rapid transit

improvements, substantial local funds will need to be raised as well to support these projects.

During the formal review phases of the source document, a number of official groups and committees scrutinized the draft Plan. The Dade County Citizens Transportation Advisory Committee (CTAC) held eight public workshops during January and February of 1985 throughout various locations in the County, and the Planning Advisory Board and the CTAC jointly conducted a public hearing on February 20, 1985 for the purpose of obtaining official public comment. In addition, each municipality in Dade County was transmitted a copy of the Draft Plan.

As a result of the comments received and subsequently transmitted to staff, the Transportation Planning Council recommended to CTAC and to the PAB a revised Plan including most of the modifications emanating from the public review phase. The same revised Plan is being presented to the Board of the Metropolitan Planning Organization for approval and adoption, at the July 3, 1985 MPO Board meeting.

YEAR 2005 METRO-DADE TRANSPORTATION PLAN  
1984 UPDATE

TRANSPORTATION GOAL

The transportation system in Metropolitan Dade County should be operated, maintained, and improved to:

ENSURE THE PROVISION OF AN --

- ECONOMICAL,
- INTEGRATED, AND
- BALANCED

SYSTEM OF TRANSPORTATION FACILITIES AND SERVICES IN A --

- RATIONAL,
- SENSITIVE, AND
- EQUITABLE

MANNER AS REQUIRED TO --

- EFFICIENTLY AND
- EFFECTIVELY

MOVE PEOPLE AND GOODS AND  
ENHANCE THE QUALITY OF LIFE  
IN THE COMMUNITY.

YEAR 2005 METRO-DADE TRANSPORTATION PLAN  
1984 UPDATE

TRANSPORTATION OBJECTIVES

The following objectives further amplify this goal:

- 1) Service Efficiency and Effectiveness  
Provide safe, reliable, comfortable, convenient, and affordable transportation where it ~~X~~ most effectively and efficiently facilitates the movement of people and goods.
- 2) Funding  
Provide an adequate funding base utilizing public and private sources that will assure timely implementation and operation of the most critically needed transportation improvement projects and services. Manage these funds in a prudent manner.
- 3) Service Equity  
Provide equitable transportation services to all groups in the metropolitan population, including elderly, handicapped, and low income citizens.
- 4) Integrated System  
Encourage ease of transfer between modes to transport, including privately provided public transportation, where it improves the functioning of the transportation network. Coordinate public and private transportation resources.
- 5) Energy  
Improve and operate the transportation system so as to reduce wasteful consumption of energy. Minimize the adverse effects of transportation energy shortages and higher energy prices.
- 6) Environmental Quality  
Implement transportation projects and services that promote the attainment and maintenance of air, noise, and water quality standards.

WASTEFUL

**MAJOR TRANSIT IMPROVEMENTS RECOMMENDED IN THE  
LONG-RANGE ELEMENT OF THE YEAR 2005  
METRO-DADE TRANSPORTATION PLAN**
