The background is a repeating pattern of various transportation-related icons in blue and green. These icons include bicycles, buses, trains, airplanes, ships, and construction vehicles like cranes and excavators. A large blue gear is positioned behind the main title, and a red gear is behind the year.

TRANSPORTATION IMPROVEMENT PROGRAM

FISCAL YEARS 1996-1997 TO 2000-2001

EXECUTIVE SUMMARY

The Transportation Improvement Program (TIP), a major document of the Metropolitan Planning Organization (MPO) for the Miami Urbanized area, specifies proposed transportation improvements to be implemented in Dade County over the coming five years.

The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the July 1, 1996 to June 30, 1997 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 1997 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the MPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a five-year time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle.

Included in the TIP are Highway, Transit, Aviation and Seaport improvements costing in excess of **\$ 3.0 billion**. Included are the following categories:

Funding Summary - FY 1997 - 2001 (\$ Millions)

Highways - State Roads

Primary	517		
Interstate	47		
Turnpike	90		
	654	--	21.2%

County Roads

Secondary	71		
Road Impact Fee	99		
Private Sector	8		
	178	--	5.9%

Local Option Gas Tax	133	--	4.3%
Transit	362	--	11.8%
Aviation	1,475	--	47.8%
Seaport	218	--	7.1%
Tra-Rail	3	--	0.1%
Non-Motorized	14	--	0.4%
	2,180		

TOTAL **3,085 -- 100%**

Some **\$654** million are programmed for the five-year period between FY 1997 and 2001 for State Road projects. In addition to major highway capacity improvements, an extensive program to renovate and resurface a number of deteriorating roads and bridges are also included in the TIP.

The Secondary, Road Impact Fee, and Local Option Gas Tax Programs contain a number of key projects in the County Highway System costing some **\$178** million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown.

The FY 1997 TIP also includes a section titled "Unfunded Priority Needs." This section lists MPO priorities in addition to those already programmed in the TIP. The priority listing was developed for subsequent inclusion in the Transportation Improvement Program as new revenues become available. The MPO, in its role of preparing metropolitan transportation plans, will continue to assess critical transportation needs and priorities considered essential for the mobility of the urban population.

It should be noted that, as a result of the enactment of the 1991 Intermodal Surface Transportation Efficiency Act (ISTEA), this TIP document incorporates several projects that are funded under the flexibility provisions allowed in the new federal law regarding transportation system improvements. This flexibility permits federal funds previously limited to certain types of projects to be used for a variety of additional categories of projects. Some projects have also been defined for the TIP where monies have been assigned based on new programs and requirements created by ISTEA.

The projects and priorities in this TIP are consistent with those in the adopted 2015 Transportation Plan. Because the 2015 Plan was found to conform to the 1990 Clean Air Act (CAA), federal air quality regulations and the Florida State Implementation Plan (SIP), the MPO has found this TIP to also conform to all relevant air quality laws, regulations and plans.

Public Involvement

The Citizens Transportation Advisory Committee provides a forum for citizens to evaluate the recommendations developed through the MPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The MPO advertises Public Hearings for the purpose of community approval to the TIP.

MPO RESOLUTION # 39-96

**RESOLUTION APPROVING THE FINAL DRAFT 1997-2001
TRANSPORTATION IMPROVEMENT PROGRAM (TIP)**

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization for the Miami Urbanized Area requires that the Metropolitan Planning Organization provide a structure to evaluate the adequacy of the transportation planning and programming process, and take action to ensure that legal and procedural requirements are met, as more fully described in the Prospectus for Transportation Improvements for the Miami Urbanized Area (Third Edition), and

WHEREAS, the Metropolitan Planning Organization has established the Transportation Planning Council to advise it on actions needed to meet the requirements of the planning and programming process, and

WHEREAS, the Transportation Planning Council has reviewed the Transportation Improvement Program and has found that the projects are in accordance with the goals and objectives of the Transportation Plan for the Miami Urbanized area, and

WHEREAS, the Board has conducted a public hearing on the Final Draft 1997-2001 TIP and considered the comments raised at such meeting.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE METROPOLITAN PLANNING ORGANIZATION FOR THE MIAMI URBANIZED AREA:

SECTION 1. That the Final Draft 1997-2001 Transportation Improvement Program (TIP) attached is found to be consistent with the Metro-Dade Transportation Plan and hereby approved.

SECTION 2. That the MPO certifies that the attached Transportation Improvement Program meets the criteria for air quality as set forth in the Clean Air Act Amendment of 1990.

SECTION 3. That the widening of SR 112 be removed from 1997 TIP and the 2015 Metro-Dade Transportation Plan, and that it be replaced by a level of service study for SR 112 west of N.W. 37 avenue including the triangle area. (WPI# 6113862 - Page 61)

SECTION 4. That the widening of S.W. 147 Ave from S.W. 152nd street to S.W. 184 street be deferred pending a concurrency study to be completed by the Public Works Department. (Project # 671511 - Page 148).

SECTION 5. That the FDOT is requested to accelerate the improvements to S.W. 8 Street from S.W. 57 avenue to the SR 826 (Palmetto Expressway). (WPI# 6112815 - Page 58)

SECTION 6. That Quail Roost Drive resurfacing be deleted from the TIP. (WPI# 6114076 - Page 66)

SECTION 7. That the MPO Secretariat is authorized to submit the Final Draft of the 1997-2001 Transportation Improvement Program to the appropriate funding agencies for comments.

The foregoing resolution was offered by Chairperson Arthur E. Teele, Jr., who moved its adoption. The motion was seconded by Board Member James Burke, and upon being put to vote, the vote was as follows:

Board Member James Burke	-aye
Board Member Miguel Diaz de la Portilla	-aye
Board Member Betty T. Ferguson	-aye
Board Member Maurice Ferre	-aye
Board Member Bruce Kaplan	-aye
Board Member Gwen Margolis	-aye
Board Member Natacha S. Millan	-aye
Board Member Dennis C. Moss	-aye
Board Member Alexander Penelas	-aye
Board Member Pedro Reboredo	-aye
Board Member Robert Renick	-aye
Board Member Katy Sorenson	-aye
Board Member Javier Souto	-aye
Board Member Raul Valdes-Fauli	-aye
Chairperson Arthur E. Teele, Jr.	-aye

The Chairman thereupon declared the resolution duly passed and adopted this 18th day of June, 1996.

TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 TO 2000/2001
INTRODUCTION

PURPOSE

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensively planned development of the urbanized area. This document programs transportation projects which serve that purpose. The priorities established by this document express the policy decision of the Metropolitan Planning Organization (MPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's Long-Range Transportation Plan for inclusion in the program and addresses new program requirements relating to the recently enacted federal Intermodal Surface Transportation Efficiency Act of 1991.

TRANSPORTATION PLAN

The Year 2015 Metro-Dade Transportation Plan was adopted under Resolution No. MPO 59-95 by the Metropolitan Planning Organization Board on December 7, 1995. Projects from the area's adopted MPO Transportation Plan have been included for advancement during this program period. A number of major activities are included: support facilities for METRORAIL, interstate highway projects, arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, and the construction of major intermodal facilities.

The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2015.

Transportation System Management (TSM) projects are proposed to be continued or expanded during FY 1997. The Metro-Dade Secondary Road Program and Road Impact Fee Program continue projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometries, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project adopted proposals in keeping with the MPO's commitment to fully develop

TSM as a policy and investment strategy to continually enhance the mobility of the urban population. At the TIP adoption hearing, the Governing Board of the MPO instructed MPO staff to develop policy standards for development of bicycle and pedestrian facilities applicable to future roadway construction.

The Year 2015 Transportation Plan stresses the achievement of long-standing and fundamental planning objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Comprehensive Development Master Plan (CDMP) are periodically considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and also during periods when Plan revisions are formally considered. Citizen review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the MPO Board to provide formal input in all pertinent transportation issues.

COMPREHENSIVE DEVELOPMENT MASTER PLAN

The fiscal year 1997-2001 Transportation Improvement Program (TIP), as set forth in this document, is consistent with Dade County's recently adopted Comprehensive Development Master Plan (CDMP) for 2000 and 2010, by Ordinance 88-119, effective December 6, 1988. The adoption of the Plan was the culmination of a major effort to bring the CDMP into compliance with Chapter 163, Florida Statutes and the provisions of Chapter 9J-5, Florida Administrative Code.

The CDMP contains eleven Plan elements, three of which specifically deal with Dade County's current and future transportation elements, including: Traffic Circulation, Mass Transit, and Port and Aviation. In addition, the Coastal Management element addresses the Deepwater Port Master Plan for the Port of Miami. Those highway capacity-type improvements on the County highway system, which are programmed in the TIP as Secondary Road Program projects, are also in the CDMP. Similarly, certain transit and aviation projects programmed in the TIP included in the Capital Improvements Element (CEE) 5-year schedule of improvement.

A key feature of the Traffic Circulation and Mass Transit Elements is the establishment of level-of-service standards to ensure that adequate facility capacity will be available with impacts of development for the purpose of issuing development orders. The ability to maintain these level of service standards will become a primary determinant for addressing relative priority among the various transportation improvement needs in the County.

TRANSPORTATION IMPROVEMENT PROGRAM

FISCAL YEAR 1996 1997 TO 2000/2001

INTRODUCTION

PUBLIC INVOLVEMENT/PUBLIC HEARING

Reasonable opportunity for public comment in accordance with the requirements of 450 316 (b) (1) and, in nonattainment TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450 322 (c). The TIP process begins at the start of each calendar year. A letter is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee provides a forum for citizens to evaluate the recommendations developed through the MPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The MPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for review and comment. Similarly, the approved TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. CTAC review of the document was on March 27, April 10, April 22, May 15, and May 22. The final public hearing for adoption was on June 6, 1996.

PROJECT SELECTION CRITERIA

In its efforts to comply with the ISTEA requirement of developing a TIP project selection procedure, the TIP Development Committee formed a subcommittee to organize the selection criteria into a more structured and understandable format. The Subcommittee recommends that the first three (3) years of the adopted TIP be considered as *committed* and the selection criteria should be applied to the remaining two years in addition to the outstanding project proposals. There are three generalized steps to follow and they are: Project Selection, Project Prioritization and Project Ranking.

I. Project Selection

This stage, which serves as a prescreening step, asks three basic questions. The first is the question of project eligibility, the second is that of consistency with the most recently adopted Long Range Plan, the third question of any project proposal is that of project category.

II. Project Prioritization

A combination of quantitative and qualitative criteria to select and prioritize projects were used. The end product of this stage is envisioned to be a matrix or spreadsheet

listing of project proposals with numerical rankings and qualitative "scores" for other supporting features they possess.

III. Project Ranking

Nearly identical to what was done in the Long Range Plan prioritization process, the project proposals listed in the matrix or spreadsheet are considered in order of the most favorable project rankings.

A complete analysis of the project selection criteria is shown in the Appendix. Appendix I illustrate through a flowchart the screening and selecting of TIP Projects, Appendix II lists the prescreening criteria proposed by the Subcommittee, and Appendix III shows the Summary of Criteria of Formulae.

TRANSPORTATION ENHANCEMENTS STRATEGIES

Section 133 of Title 23 of the United States Code authorizes the establishment of the Federal Surface Transportation Program (STP), which mandates that at least ten percent of STP funds shall be used only for "transportation enhancement" (TE) activities. Projects will be stratified into one of three categories, which include the following TE classifications:

1. Bicycle and Pedestrian Projects
 - a. Bicycle transportation projects
 - b. Pedestrian walkways
 - c. Preservation of abandoned railway corridors (including the conversion and use for pedestrian or bicycle trails)
2. Scenic and Environmental Projects
 - a. Acquisition of scenic easements and scenic sites
 - b. Scenic highway programs
 - c. Landscaping and other scenic beautification
 - d. Control and Removal of outdoor advertising
 - e. Mitigation of water pollution due to runoff
3. Historic Preservation and Archeology
 - a. Historic highway programs
 - b. Historic preservation
 - c. Rehabilitation and operation of historic transportation buildings, structures, or facilities, including historic railroad facilities and canals
 - d. Archaeological planning and research

TRANSPLANTATION REVIEW PROCEEDINGS
FISCAL YEAR 1996/1997 TO 2000/2001
INTRODUCTION

AIR QUALITY IMPLICATIONS OF THE TIP

The federal Clean Air Act Amendments of 1990 designated the Miami-Ft. Lauderdale-West Palm Beach urban areas as non-attainment areas in relation to the national ozone standard. The new law required that the existing State Implementation Plan (SIP) for Air Quality be revised to specify timetables and milestones that will be necessary to reach attainment of the national ozone standards. A Transportation Control Plan for Ozone was adopted by the local MPO in 1979 as part of the Florida State Implementation Plan (SIP) and has been periodically updated. A plan revision was adopted by the MPO in January, 1983. The plan describes various transportation facilities and services, such as METRORAIL, Park-n-Ride transit lots, carpool lanes, and a computerized traffic control system which help reduce ozone levels.

The MPO will continue to work closely with the Florida Department of Environmental Regulations and the Dade County Department of Environmental Regulations Management to achieve local compliance with national air quality standards. As a result of the compliance efforts undertaken, Dade County has shown a decrease in the number of ozone exceedances over the last several years. Continued compliance efforts in conjunction with implementation of new measures, such as the establishment of the Vehicle Inspection/Maintenance Program in 1991, has resulted in further compliance with ozone standards. A statement of compliance related to the nature of this TIP document vis-a-vis the need to reach attainment of ozone standards accompanies the formal submission of this TIP to the federal transportation funding agencies.

Federal requirements of 23 CFR 450.324 (d) (3) states that in nonattainment area there are no Transportation Control Measures (TCM) identified for Dade County in the State Implementation Plan (SIP).

The 2015 Transportation Plan was found to conform to the requirements of the 1990 Clean Air Act Amendment. The TIP being a subset of that 2015 Long Range Plan meet all requirements of section (6)(a) of Procedure 525-010-014-F which cites the steps to be followed on achieving the air quality conformity determination.

The Air Quality Conformity Determination Report includes a list of all projects found to conform in the previous TIP that now are part of the base case for the purpose of A/Q conformity analyses.

EFFICIENT ENERGY USAGE

In accordance with national and regional transportation development goals, urban energy usage efficiency is an important policy objective within Metropolitan Dade County's Transportation Improvement Program. The County is engaged in a continuing effort to promote efficient energy usage.

PROGRAM FUNDING

The TIP categorizes all transportation improvements and identifies priorities which establish multi-year fiscal programming. The biennial elements represent the list of projects which are proposed for implementation during the first program phase and is viewed as the "Capital Improvements" budget for transportation facilities.

This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints.

Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include: Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls.

Transit funding is derived from a host of Federal, State and local programs. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources.

SUMMARY OF TIP PROJECTS

The projects in the FY 1996/1997 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility.

These major categories are:

Primary Roads	Turnpike
Secondary Roads	Road Impact Fee Improvements
Local Option Gas Tax	Improvements by the Private Sector
Airport Improvements	Seaport Improvements
Multi-Modal Transit Improvements	Tri-County Commuter Rail
Non-Motorized Component	Intelligent Transportation Systems
Transportation Disadvantaged	

Unfunded Priority Needs

TRANSPORTATION IMPROVEMENT PROGRAM

FISCAL YEAR 1996/1997 TO 2000/2001

INTRODUCTION

A consolidated summary of all categories by program year is presented in tabular form on Page 46. The table shows the amount by category and the percentage which it represents of the total transportation program. The thrust of Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet energy conservation needs, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is noted that approximately 12.0% of the FY 1997-2001 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 21.7% of the approximate \$3.0 billion in the FY 1997-2001 program budget.

PRIORITIES

The 2015 Metro-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements are classified into four priority categories.

Priority 1 - -Priority improvements to be constructed and opened to traffic by the year 2000. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority 2 - -Improvements where project development efforts would commence before 2000 with construction prior to 2005. This priority category includes projects required to respond to traffic problems projected for the year 2000 and shortly thereafter.

Priority 3 - -Improvements to be made between the year 2005 and 2010. In many cases, project development activities would need to commence in the 2000 and 2005 period, due to the amount of lead time required to plan and implement a project. The priority category includes responding to problems that will emerge after the year 2005.

Priority 4 - -Improvements to be made in the latter part of the 20-year plan period. Includes projects responding to long-range travel needs and roadway improvements constructed through the county Sub-division process which may be earlier than the 20 year period.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

AMENDMENTS

The annual element may be amended at anytime during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or limits of a project. Detailed information of the amendment process is available from the MPO Secretariat upon request.

THIS PAGE INTENTIONALLY LEFT BLANK

PART ONE:
3-YEAR FEDERAL FUNDED
PROJECT LISTING

THIS PAGE INTENTIONALLY LEFT BLANK

PART ONE - FEDERALLY FUNDED PROJECTS OF THE FISCAL YEAR 1997-2001 TRANSPORTATION IMPROVEMENT PROGRAM

Purpose Of Part One

In December of 1991, Congress expressed, through passage of the Intermodal Surface Transportation Efficiency Act (ISTEA), its desire to promote and provide greater local control and improved facilitation of comprehensive transportation planning. ISTEA has given MPOs expanded responsibilities and authority in numerous areas, including transportation improvement program (TIP) development and Long Range Plan development.

Major new funding categories have been established to replace traditional sources. For example, the Surface Transportation Program (STP) replaces the Federal Aid Primary, Federal Aid Urban and Federal Aid Secondary systems. ISTEA also established the National Highway System (NHS) and also provides funding for completion and maintenance of the Interstate Highway System. A significant change inherent in ISTEA is the opportunity for flexibility in project funding. The STP now provides the flexibility to shift funds between roadway and transit improvements to best address system deficiencies. Additional major new sources of funds available to road and transit agencies are Congestion Mitigation/Air Quality and STP Enhancement programs.

Considering the transition to the new ISTEA requirements and funding structure, additional explanation is warranted to clarify, to both the funding agencies and to the public, the manner in which ISTEA mandates and how opportunities are being addressed.

The intention of this section of Dade County's 1997 TIP is to illustrate how the MPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the ISTEA requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h)2 and (i) 4).

Contents Of Part One

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first three years of the TIP and those projects which are specifically Transportation Control Measures (TCMs).

A Summary Table provides a financial synopsis of the federally-funded projects in the TIP. Other federally-funded projects not included in this section are included in other parts of the adopted TIP.

Project Selection

As a part of the TIP development process, project proposals are solicited from the various transportation planning agencies, including FDOT, as well as from Dade County municipalities. The TIP Development Committee evaluates these proposals and reviews them for their effectiveness and consistency with the Long Range Plan. The Committee then prioritizes them according to regional and local transportation needs and air quality conformity guidance and recommends a prioritized list to the Transportation Planning Council (TPC) of the MPO.

All projects receiving a favorable review by the TIP Committee and TPC are included in the TIP. The Committee then reviews and prioritizes the projects for Urban STP, Congestion Mitigation/Air Quality (CMAQ) and reviews other STP-funded projects. The Committee also works with FDOT on NHS and Interstate projects.

The MPO Board approves the TIP based upon the recommendations of the TIP Committee and the TPC.

Amendments to the TIP are permitted throughout the program cycle. New project proposals are accompanied by appropriate justification for inclusion in the TIP and are reviewed for consistency with the Long Range Plan and Air Quality Conformity.

Concluding Statements

- ◆ This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- ◆ Only major categories of federal funds are highlighted in this section
- ◆ Only the first three years of the TIP (FY 1994/95, 1995/96 and 1996/97) are included in this section.
- ◆ The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- ◆ Federal funds can reasonably be expected to be made available for all projects included in this section.
- ◆ All information contained in this section is consistent with the adopted TIP attached hereto.
- ◆ The MPO develops project priorities on applicable funding categories in consultation with the FDOT. FDOT develops project priorities on the NHS and Interstate System in cooperation with the MPO

**DADE COUNTY METROPOLITAN PLANNING ORGANIZATION
TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 to 2000/2001
STATE HIGHWAYS, INTERSTATE AND TURNPIKE PROJECTS**

THE STATE HIGHWAY SYSTEM for Dade County can be subdivided into five major construction categories: Major Highway Projects, Bridge, Safety/Operational Improvements, Resurfacing Improvements, Railroad Crossing and Signal Improvements. This document contains additional new projects as well as increased support for those contained in previous TIPs. Individual projects often span several years to complete and are shown in detail in the project task description. For this year's TIP, major projects include the following:

MAJOR HIGHWAY PROJECTS

This year's TIP lists many major projects for planning, preliminary engineering, right-of-way, and construction during the following five-year period. A few, in particular, include:

US-1/South Dixie Highway
SR-826/Palmetto Expressway
SW 2 Avenue Bridge
US-1/Biscayne Boulevard
SR25/NW 36 Street
SR-A1A
SR 112/Airport Expressway
Miami Gardens Drive
* SW 137 Avenue
SR-933/ NW 12 Ave
SR-934/NW 74 Avenue
Okeechobee Road
SR-90/ SW 8 Street
SR-997/Krome Avenue
SR-836/Dolphin Expressway
NW/SW 107 Avenue
SR-932/NW 103 Avenue
SR 117
SR 11

Millions of Dollars.

87.7	6,400,000	144,507,300
68.8	24.3

8.1		
8.7	11,000,000	
22.7	2,456,000	
10.8	7,908,000	
10.2	4,000,000	
17.1	1,000,000	
4.2		
46.5	42,000,000	
37.5	34,000,000	
1.0		
2.8	6,000,000	
3.4	2,025,000	
3.2	3,000,000	
31.9	28,000,000	

SAFETY OPERATIONAL IMPROVEMENTS

The Safety Operational Improvements will provide for lighting, signalization, intersection improvements, overhead signs, guardrails, traffic attenuators, and various other safety-related improvements. The five-year program allocates \$18.8 million for preliminary engineering, right-of-way and construction.

RESURFACING

The Resurfacing Program allocates \$38.5 millions in the five years

BRIDGE

The Bridge Program, over the next five years, totals \$48.6 millions for bridge repair or replacement.

RAILROAD CROSSING IMPROVEMENTS

Numerous countywide railroad crossings are programmed for improvement at a cost of \$2.4 millions in the five-year program

INTERSTATE

Projects programmed for preliminary engineering, right-of-way and construction during the five-year period consist of the following.

Millions of Dollars

SR-9/I-95
I-195

35.2	36,400,000
5.6	4,620,000

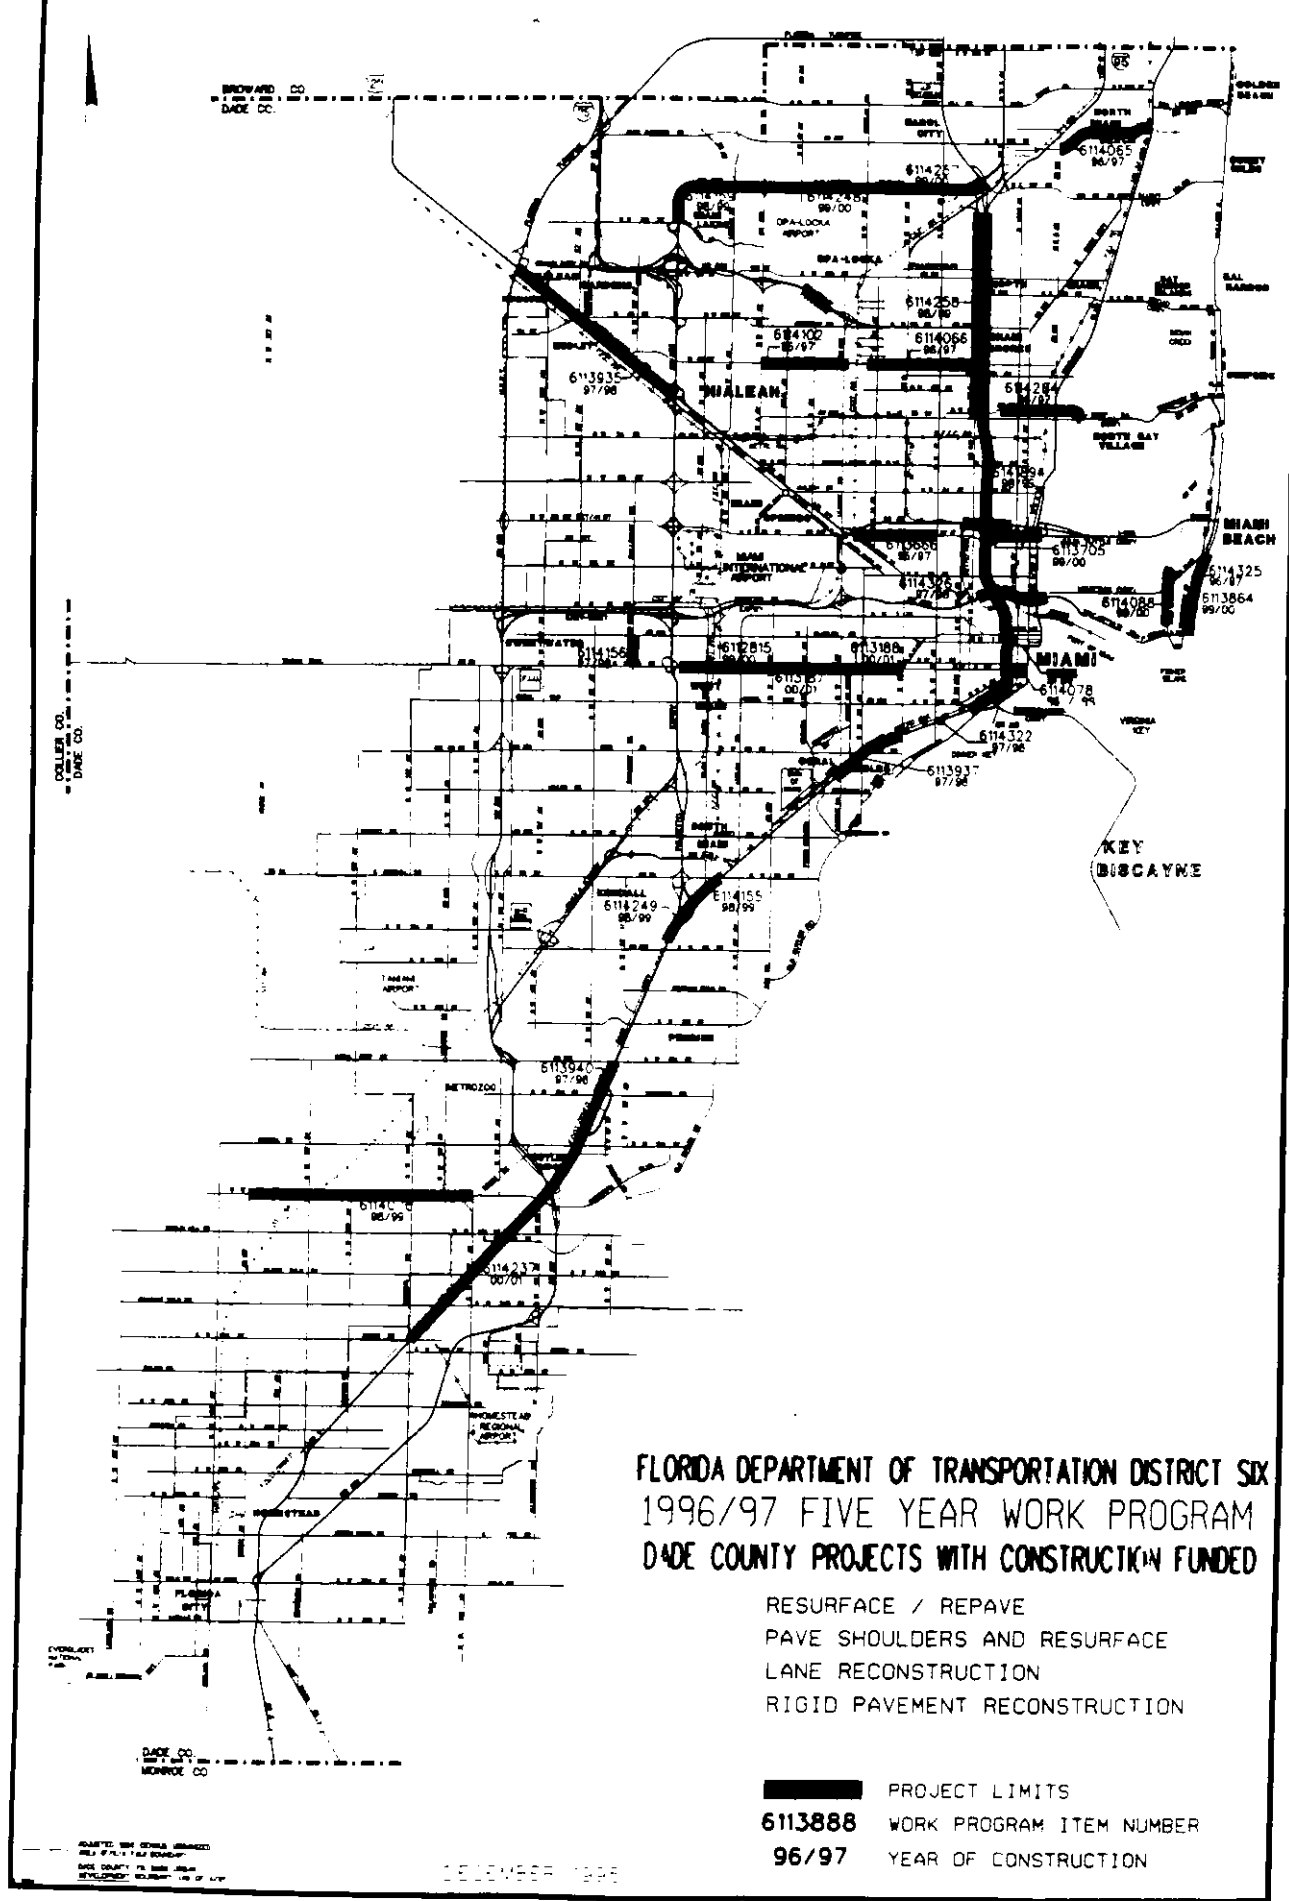

TURNPIKE

Improvements in the amount of \$ 83.6 millions are programmed during the next five years for the Homestead Extension of Florida's Turnpike

ENVIRONMENTAL SURVEILLANCE

The Department of Environmental Regulations requires project information called Environmental Surveillance (ENV-SUR) Codes included in the five-year program are

- A = Advanced Notification Process Begun
- B = Barrier Island
- C = Critical Habitats
- D = Lands and Water with State or Federal Designation
- E = Evaluated and No Comments
- F = Flood Plain and Flood Prove Areas
- G = Groundwater
- P = Project has past Advanced Notification, Other Comments Necessary
- R = To Be Reviewed
- S = Surface Water
- W = Wetlands

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1997
SECONDARY ROAD PROGRAM**

The Secondary Road Program for FY 1996 totals over 30 millions and is divided into two distinct categories. The first section includes all new road construction or rehabilitation projects and the second section deals with the continuing projects that have fund allocations yearly.

MAJOR ROADS CONSTRUCTION PROJECTS

Some of the major projects listed for FY 1997 include:

	<u>Millions of Dollars</u>
NW 12 Street	1.5
NW 17 Avenue	3.3
SW 24 Street	1.8
SW 107 Avenue	0.4
Miami Avenue	0.2
SW 127 Avenue	2.4
Tourist Route Information Program	0.5

CONTINUING PROGRAM PROJECTS

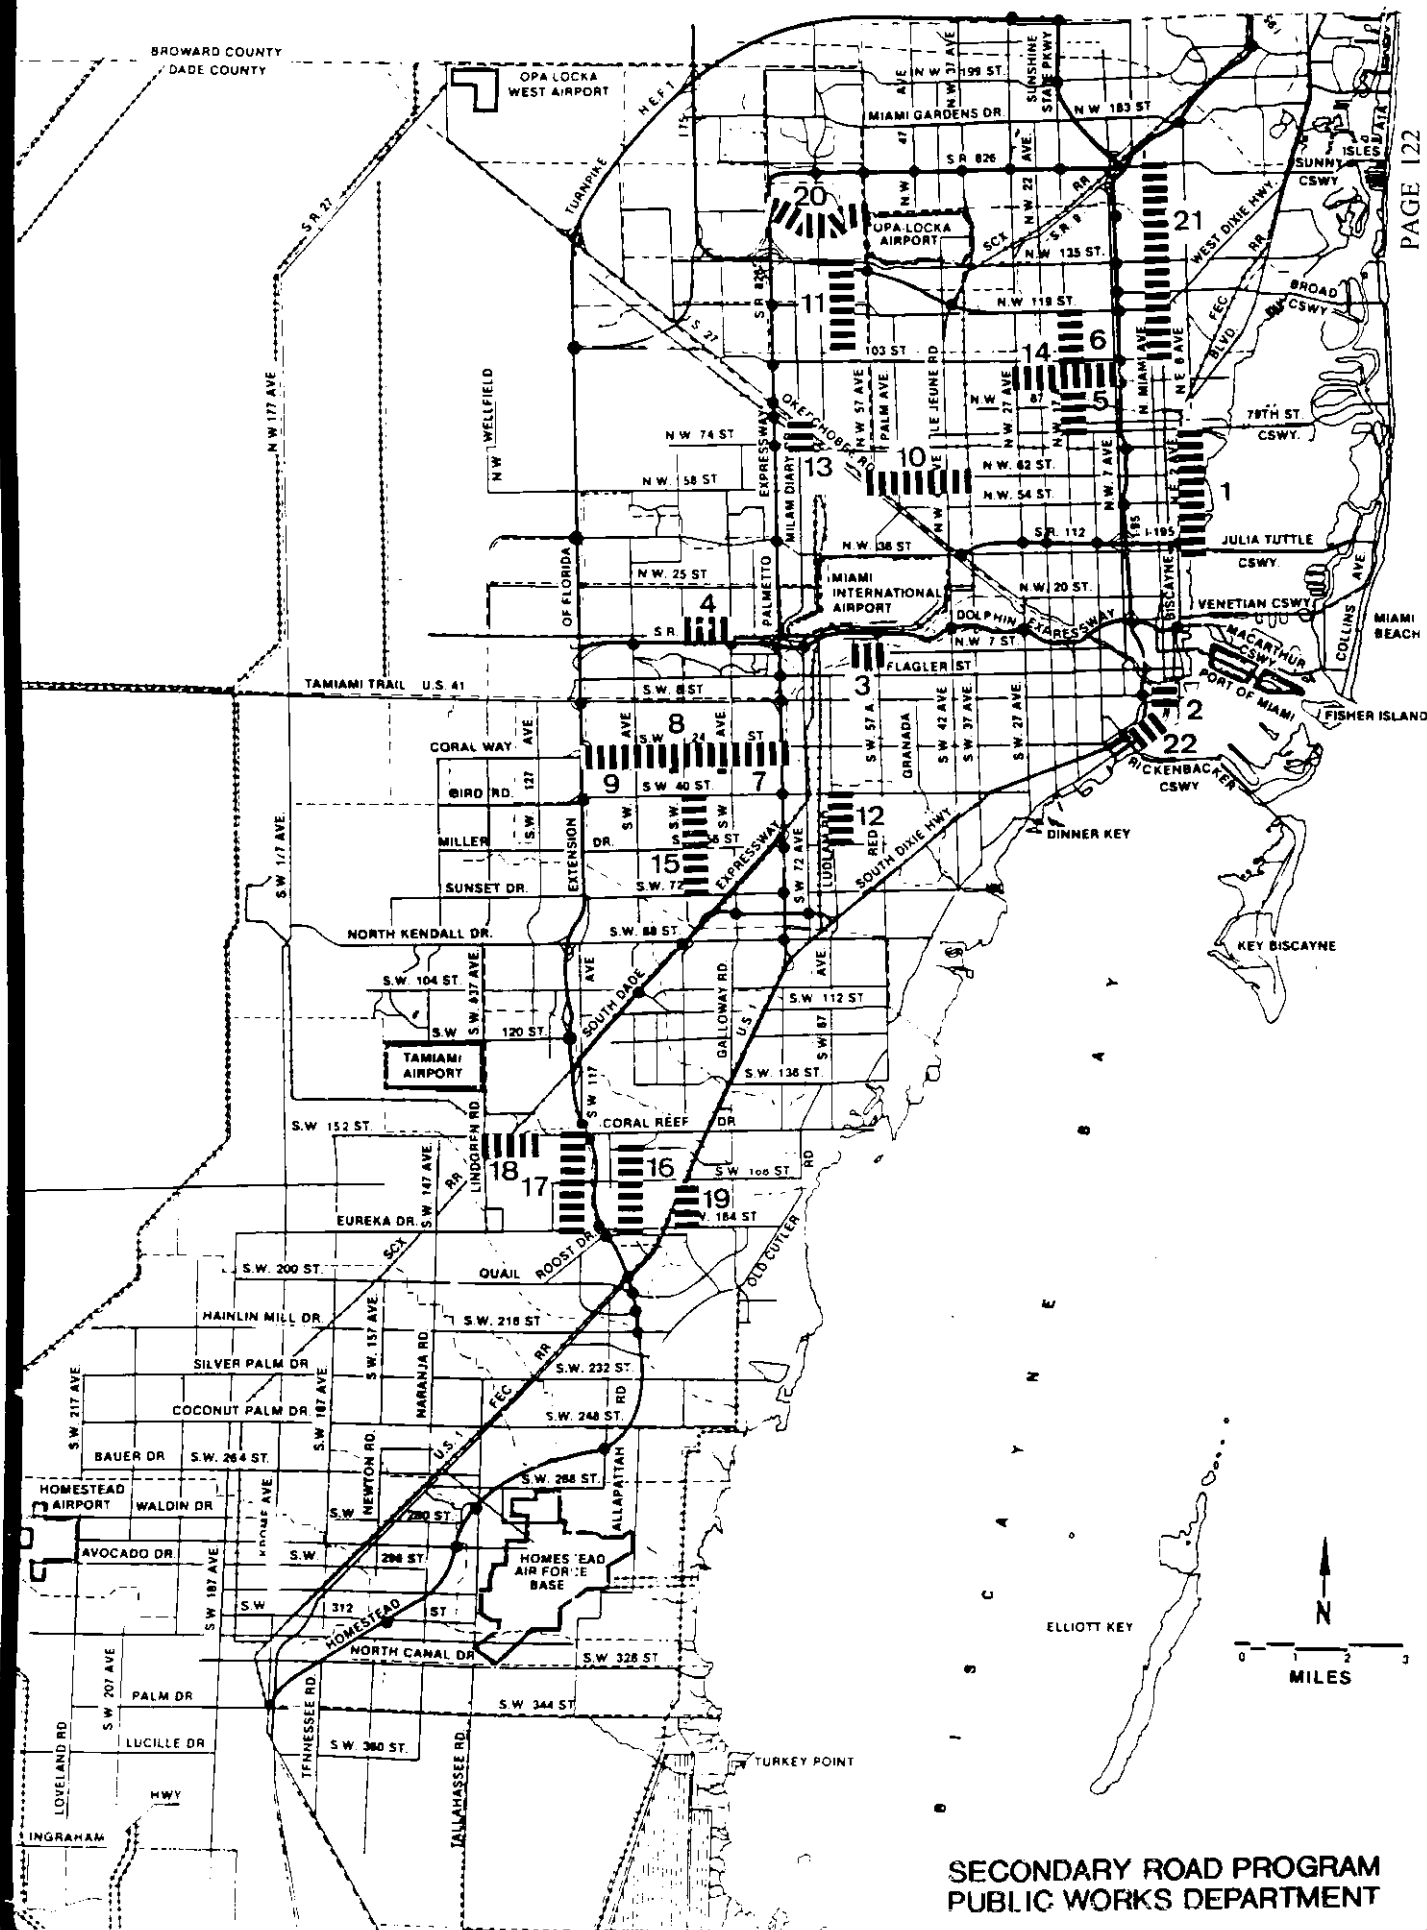

The Continuing improvement projects listed below have generally the same funding allocations each year for the entire five-year program.

They include:

	<u>Millions of Dollars</u>
Bridge Replacement	0.2
Bridge Repair and Painting	1.5
Dade County Design & Construction Supervisory Cost	0.8
Roadway Drainage	0.2
Resurfacing	0.2
Traffic Control Devices	0.7
Traffic Signal Shop	0.5
Safety Lighting	1.2
Guardrail	0.1
Railroad Crossing Improvements	0.3
New and Restored Sidewalks & Pedestrian Paths	0.3
Venetian Causeway Repairs	0.2
Beautification	3.0

ROAD IMPACT FEE

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 TO 2000/2001
ROAD IMPACT FEE**

On December 6, 1988, the Board of County Commissioners adopted Dade County Road Impact Fee Ordinance No. 88-112, which provides for the fair share assessment of road impact fees on all new building construction in Dade County, including all municipalities.

The County has been divided into nine road impact fee benefit districts. All fees collected within each district will be expended for roadway capacity improvements within each district. As required by the ordinance, joint County/Municipal Committees were established for each of the nine districts. Each individual district committee met on three different occasions during the development of this program. As a result of those meetings, nine district project lists were prepared.

Each district program includes four distinct improvement categories, i.e., Road and Bridge projects, Traffic Control Devices, Traffic Operations Projects to Increase Capacity and Safety (TOPICS), and Resurfacing.

ROAD AND BRIDGE CONSTRUCTION PROJECTS

The Road Impact Fee Program for FY 1997 totals over \$35 Million. Major road and bridge projects listed in FY 1996 include:

NW 2 Avenue -- NW 159 Street to NW 167 Street
NW 12 Avenue - NE 151 Street to NE 167 Street
NW 15 Avenue - NE 159 Street to Miami Gardens Drive
NW 17 Avenue - NW 119 Street to Opa Locka Boulevard
NW 41 Street - HEFT to Av
NW 47 Avenue - SR 826 to NW 183 Street
NW 79 Avenue -- NW 74 Street to Okeechobee Boulevard
NW 97 Avenue bridge

ROAD AND BRIDGE CONSTRUCTION PROJECTS (Continued)

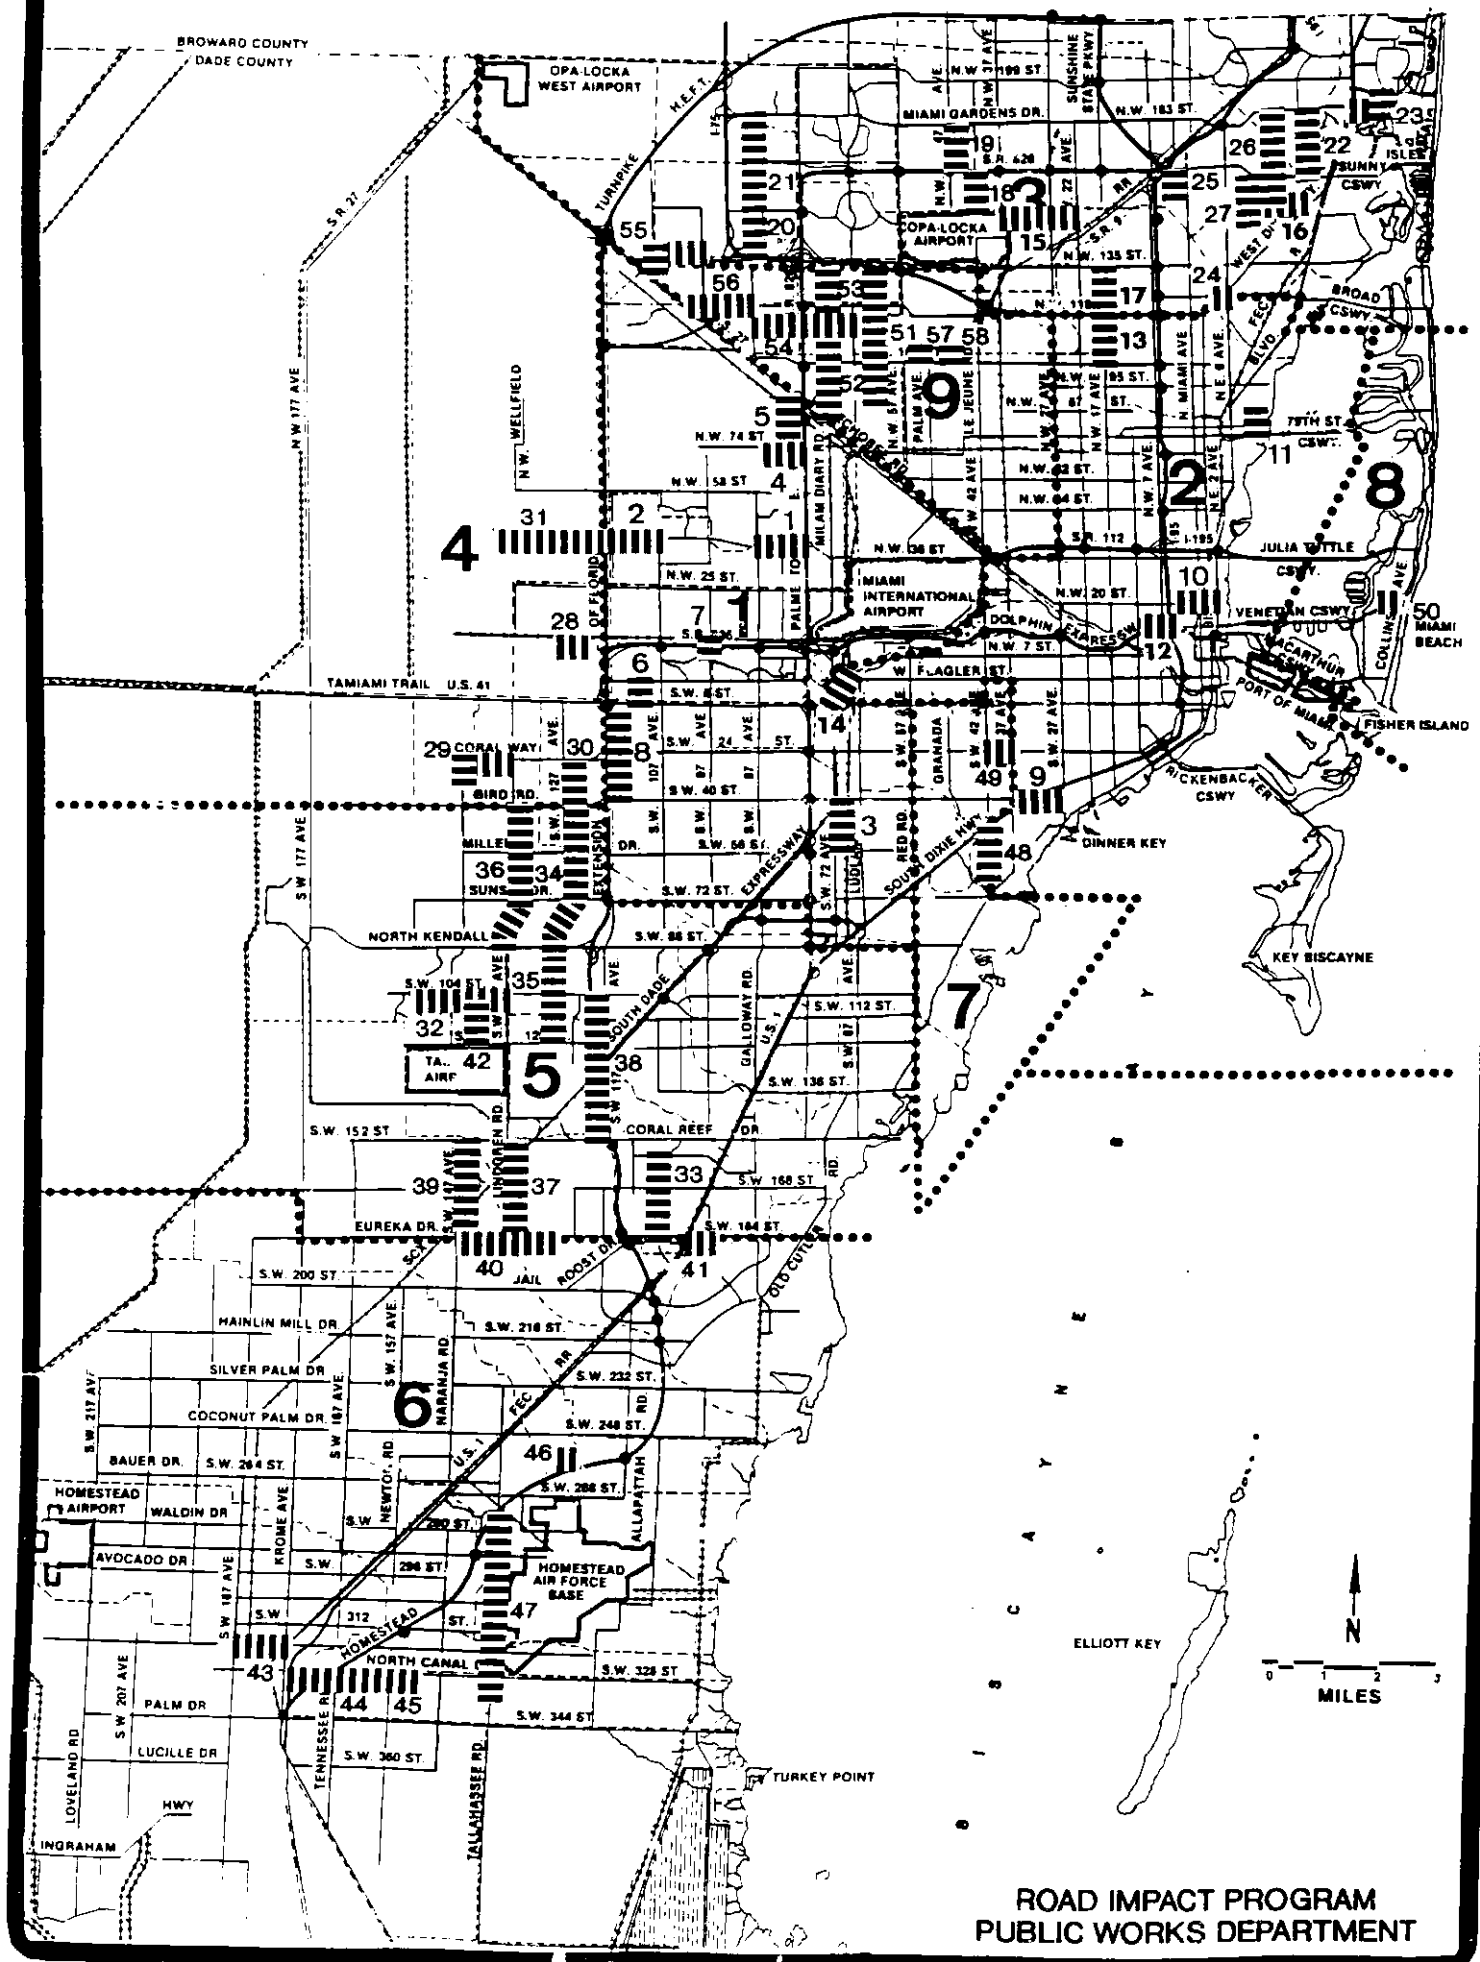

SW 109 Avenue -- Tamiami Canal to W Flagler Street
SW 117 Avenue -- SW 40 Street to SW 8 Street
SW 137 Avenue -- SW 88 Street to SW 42 Street
SW 137 Avenue -- SR 821/HEFT to SW 336 Street
SW 147 Avenue -- SW 184 Street to SW 152 Street
NW 159 Street -- NW 6 Avenue to West Dixie
SW 184 Street -- SW 147 Avenue to SW 127 Avenue

CONTINUING PROGRAM PROJECTS

The Road Impact Fee Program contains three project categories which are supportive of the transportation system management effort to improve traffic flow countywide.

The continuing projects for FY 1997 include:

- TOPICS (Traffic Operations To Increase Capacity and Safety) - Intersection Improvements
- Resurfacing - Paving, widening, drainage, striping
- Traffic Control Devices - Signalization

LOCAL OPTION GAS TAX

**IMPROVEMENT FIVE CENT LOCAL OPTION GAS TAX
FISCAL YEAR 1996/1997 to 2000/2001**

INTRODUCTION

The Capital Improvement Five Cent Local Option Gas Tax, authorized by Section 336.025, Florida Statute (1993) became effective on January 1, 1994. In accordance with state statute, proceeds of this tax have been programmed for transportation expenses needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

Pursuant to the interlocal dated July 27, 1993, between Dade County and the municipalities, the proceeds of this tax are to be allocated with seventy four percent (74%) to the County and twenty six percent (26%) to the Cities with not less than twenty percent (20%) of the net proceeds collected to be utilized by the County for municipal transportation services in unincorporated Dade County. This portion is to be taken from the County's share of the tax proceeds. This distribution schedule is valid unless modified by passage by the voters of the transportation component of general obligation bond issue. The actual distribution to the municipalities is based on a weighted formula which accounts for percentage of population and center line mileage of municipal roadway for each city. The 1995-96 preliminary distribution is shown on the following table:

1995-96 MUNICIPAL DISTRIBUTION

Miami	\$3,549,620	Key Biscayne	\$90,526
Hialeah	2,087,963	Florida City	76,091
Miami Beach	901,042	West Miami	57,919
North Miami	534,129	North Bay Village	50,375
Coral Gables	556,229	Bay Harbor Islands	46,319
North Miami Beach	391,741	Surfside	45,391
Homestead	302,421	Biscayne Park	41,708
Opa-Locka	196,584	Bal Harbour	28,931
Sweetwater	129,319	El Portal	30,888
Miami Springs	196,779	Virginia Gardens	24,332
South Miami	131,615	Medley	28,667
Miami Shores	120,615	Golden Beach	14,199
Hialeah Gardens	97,299	Indian Creek Village	2,689

In 1995-96, the estimated net revenue for the local option gas tax, was projected at \$37.4 million with \$9.7 million to be distributed to the municipalities and \$27.7 million to the County. The estimated local option net gas tax revenue, based on state figures for fiscal year 1997 is estimated at \$37.9 million of which \$9.8 million is to be distributed to the eligible cities and \$28.1 million is to be allocated to the County. Based on historical data, the County has programmed ninety-five percent (95%) of the anticipated proceeds.

COUNTY TRANSPORTATION PROJECTS

The 1996-97 Capital Improvement Local Option Gas Tax Program (30.4 million), which includes \$26.7 million in new funding and \$3.7 million in carryover, is divided into two categories. The first category includes all Public Works related projects which address the traffic safety and roadway improvement related needs. The second category deals with transit improvements for Dade County's urban transportation systems. The related projects are detailed in the following pages and in the section for the multimodal transit improvement program (pages 167 to 173 this document). These projects are summarized below.

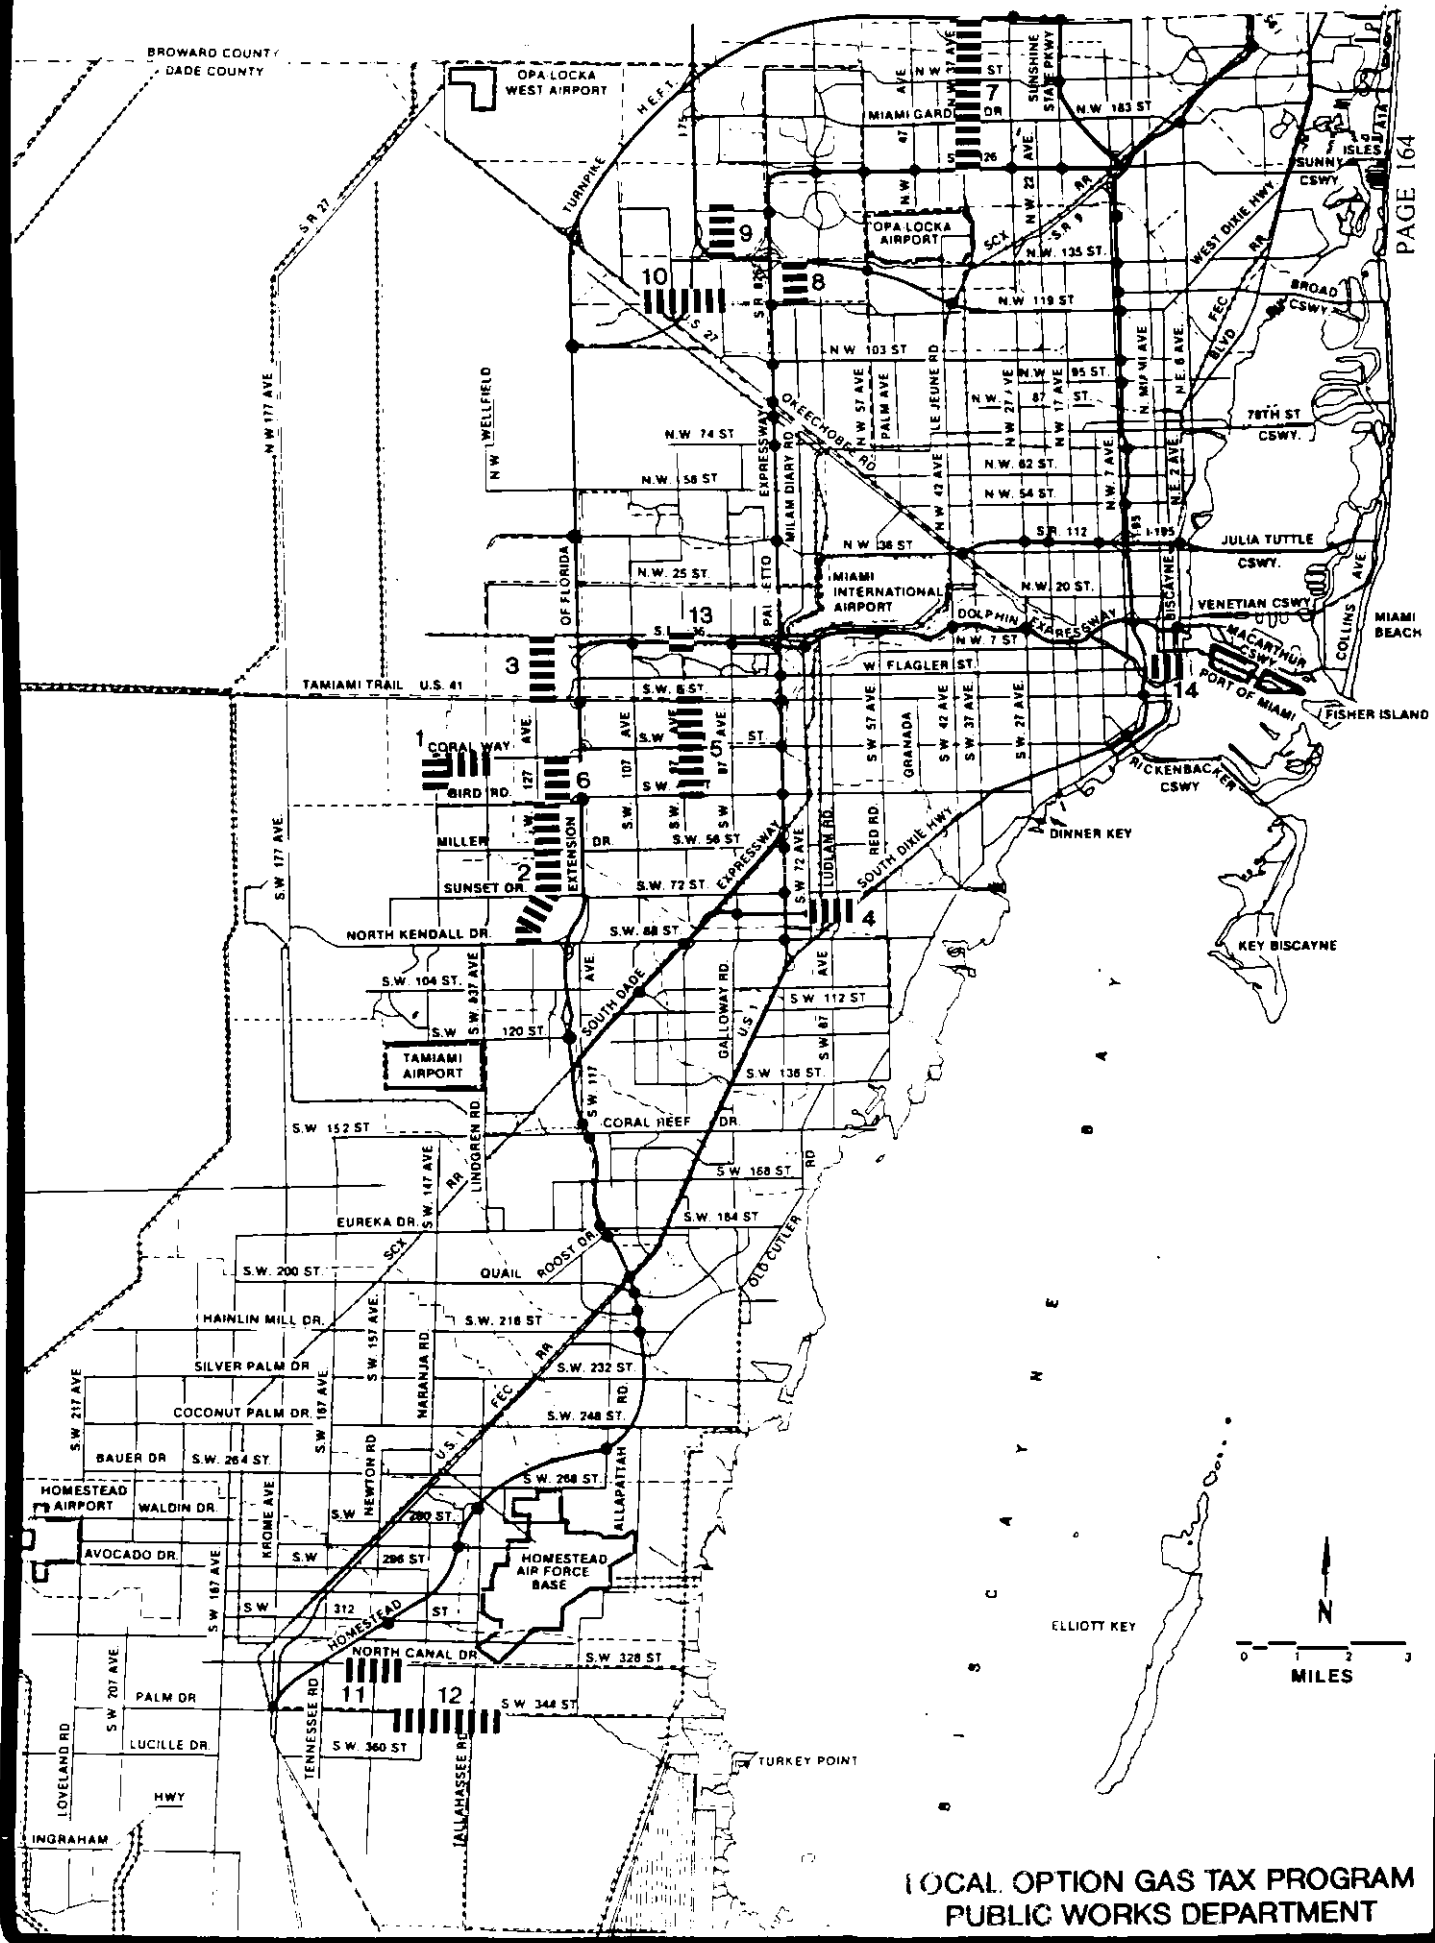

PUBLIC WORKS PROJECTS

<u>Major Roads Construction Projects:</u>	Millions of Dollars	<u>Unincorporated Area Services:</u>	Millions of Dollars
Flagler Street	0.4	ADA Curb Cuts/Repairs	1.0
NW 72 Avenue	0.4	Road Maintenance Equipment	0.9
NW 87 Avenue	0.2	Pavement Markings	0.3
NW 122 Street	0.1	Road Resurfacing	4.2
NW 97 Avenue	1.0	Sidewalks and Pedestrians Paths	0.7
SW 328 Street	0.5		\$ 6.7
SW 344 Street	2.4		
W 127 Avenue	0.1		
	\$5.1		

TRANSIT PROJECTS

<u>Countywide Services:</u>	Millions of Dollars	<u>Countywide Services:</u>	
School Zone Flashers	0.3	North Corridor Extension	0.1
Traffic Control Devices	0.5	Replacement of Buses & Equipment	4.2
Intersections Improvements	0.5	Mass Transit Facilities Debt Service	6.0
	1.3	Mass Transit Infrastructure Support	5.7
		Tri-Rail Support Payment	0.976
			\$16.976

Local Option Gas Tax Total: 30.4 million dollars

TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 to 2000/2001
IMPROVEMENTS BY PRIVATE SECTOR

This section addresses road improvement commitments made by private developers during the regional and local development approval process. The improvements listed are necessary to help mitigate traffic impacts of specific large development projects such as Developments of Regional Impact (DRI) and other major zoning requests reviewed by the Dade County Development Impact Committee (DIC). These road improvement commitments are contained in County Commission zoning resolutions and/or documents proffered by development interests to the Commission. In some cases, especially DRI development orders, sketch drawings of the improvements are attached to these legal documents. The last column of the table in this section contains either the Commission Resolution Number or the official record book/page number associated with each improvement, which is necessary to obtain copies of the associated legal document from official County records or the Building and Zoning Department.

Unlike other parts of the TIP, the construction of improvements in this section are normally not linked to specific dates, but instead, are usually dependent upon the construction schedule of a specific development project, which can vary considerably according to the market and other conditions. The Estimated Construction Year column is a projection of when the private development will reach the associated building permit or Certificate of Occupancy stage listed in the Construction Timing column.

It should be noted that DRI development orders and other zoning resolutions for large development projects may also contain public sector road improvement commitments. These improvements are listed in other sections of the TIP under the public agency responsible for the improvement.

The total cost of the private road improvements estimated to be built during Fiscal Year 1994-95 is over \$1.6 million.

MULTIMODAL PORT DEVELOPMENT

THIS PAGE INTENTIONALLY LEFT BLANK

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1997
MULTIMODAL PORT DEVELOPMENT**

THE PORT OF MIAMI's wide-ranging program of facility enhancements continues to grow as the Metropolitan Dade County Seaport Department stays ahead of the burgeoning demands of the cruise and cargo industries. By pursuing its aggressive policy of facility development and renovation, the Port of Miami is positioning itself to retain its unique dual distinction as Cruise Capital of the World and Cargo Hub of the Hemisphere, while increasing the port's profitability and market share on import and export shipments.

The Port of Miami, which already contributes more than \$7 billion a year to the South Florida economy, is financing a substantial portion of these current improvements from the proceeds of the \$133 million in Seaport General Obligations Bonds issued in 1993.

Vital to the Port of Miami's continued growth is maximization of intermodal connections - making the most of sea, air, rail and highway networks. The Port's program extending through fiscal year 2001-2002 includes more than \$587 million in proposed projects ranging from extensive channel deepening, to lighting system improvements, to railyard construction, to bulkheading and new passenger terminals.

SPECIFIC ASPECTS OF THE PROGRAM

CHANNEL DEEPENING/ISLAND ENHANCEMENT. The first phase of this \$100 million project to deepen the port's main channel was completed in November 1993. This phase consisted of deepening the channel from the

seabuoys to the inner harbor to a depth of -44 feet, and deepening the South Channel to a controlled depth of -42 feet to the cargo gantry crane facility. The second phase, which started in November 1994, will deepen the South Channel from the gantry berths to a new South Channel Turning Basin between Dodge and Lummus Islands. The project also called for additional fill operations which expanded Lummus Island, where the current containerport is located.

CARGO CRANES: As part of \$100 million in cargo-handling enhancements, the Port of Miami has taken delivery of its seventh, eighth, ninth and tenth post-Panamax gantry cranes. These cranes augment what already is the Southeast's largest contingent of the high-tech, ultrafast cargo loaders and unloaders. With these new cranes, the Lummus Island containerport currently has seven 50-long-ton gantries and three 40-long-ton cranes. The four newest cranes, all of the 50-long-ton variety, are capable of handling cargo to and from vessels which are even too wide to transit the Panama Canal. New marshalling yard cranes, stacker cranes, and dockside cranes are also being added.

CARGO YARD ENHANCEMENTS: After consultation with the port users, Port of Miami management determined that movement in and out of, as well as within, the port's container facility would be greatly enhanced with the construction of an access road around the berth perimeter of Lummus Island, and by the positioning of container yards across the Island. By fronting the yards on the container berths, traffic will move in an uncongested

manner. Parking and movement of internal equipment will be simplified. A major portion of the Lummus Island cargo yard has been redeveloped, adding a state-of-the-art drainage system. The project also added highmast lighting to the container yards giving the stevedoring companies the capability to maximize port cargo areas 24 hours a day.

CARGO BERTHING SPACE: Total berthing space at the Port of Miami's container facility has been expanded to 4,000 feet. An additional 840 feet will be completed by the end of 1997. One additional roll-on/roll-off berth was completed in 1995, bringing to 13 the number of such berths at the port.

PORT OF MIAMI TERMINAL OPERATION FACILITIES: A 28 - lane interim terminal gate and cargo control facility was completed on Dodge Island in August 1994 and was activated in October 1994; construction of a permanent gate complex is slated to begin in 1997-1998. This is also part of a multi-million dollar project grouping together all of the private stevedoring companies that work at the Port of Miami under a single terminal company. Together they can share space more efficiently, including paving, drainage and lighting of additional acreage at the port. Further facilitating swift, efficient cargo flow, is a cutting edge computerized radio-frequency (RF) background capable of supporting as many as 4,000 mobile RF units for real-time interactive data interchange.

CRUISE PASSENGER TERMINALS: More than \$158 million has already been earmarked for passenger terminal construction projects. Upgrading the ultramodern cruise terminals at the world's leading cruise port are ongoing and continuous. An additional six-story office complex was completed in December 1994 to accommodate rapidly expanding cruise headquarters office requirements. In March 1995 a four-story parking garage was opened at

Terminal 12 to accommodate parking requirements. The remodelling of Passenger Terminals 8 and 9 will be completed by the end of fiscal 1996 at a cost of \$25 million. A new \$6 million parking garage is being designed for this terminal and is scheduled for completion by 1997. Additionally, a new cruise terminal complex is being planned for Bicentennial Maritime Park, which will accommodate four new megaliner cruise vessels. The first phase, which encompasses terminals for two megaliners, is currently in the design stage. It is estimated that it will cost approximately \$124 million to build this phase.

PORT ACCESS: Traffic levels at the Port of Miami are projected to reach 56,000 vehicles per day within four years. As a result, the State of Florida is now carrying out a \$10.3 million project consisting of the environmental impact statement and design for construction of a direct tunnel link between the Port and the interstate highway system. Preliminary results show that the Port of Miami tunnel will cost approximately \$353 million to construct.

MULTIMODAL TRANSIT IMPROVEMENTS

THIS PAGE INTENTIONALLY LEFT BLANK

TRANSPORTATION IMPROVEMENT PROGRAM FISCAL YEAR FY 97 MULTIMODAL TRANSIT IMPROVEMENTS

Metropolitan Dade County continues its program of service improvements for the urban public transportation system. The six year program described in the following pages encompasses the best estimates of the local transit capital needs, with the greatest detail focused on the first two years.

Beginning in FY 96, Dade County began using funds from a five cent local option gas tax as the local match for Federal formula and discretionary programs. An estimated \$26 million annually will be provided from this source for projects identified in a ten-year blueprint. As a result, the County is now able to dedicate the entire State Transit Block Grant funds exclusively for ongoing transit operations. Also in FY 96, Dade County began using over \$4.5 million in State Toll Road Revenue Credits as a "soft match" for federal funding for capital projects with a non-Federal share exceeding \$1 million, as authorized by the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA), Section 1044.

SPECIFIC ASPECTS OF THE PROGRAM

PROGRAM OF INTERRELATED PROJECTS:

Pre-construction work for the Palmetto Metrorail Extension continues, with the final design phase of the project beginning in FY 96. Flexible funding from the Federal Highway Administration (FHWA) and discretionary funding from the Federal Transit Administration (FTA) will be used to fund construction of the 1.1 mile alignment extension, with matching funds from the State and the Local Option Gas Tax. The project is expected to be completed in FY 2001.

The FY 97 Transportation Improvement Program includes funding over the next five years for three priority corridors: North, East-West and Kendall.

Alternatives Analysis (AA) for the North Corridor project was completed in FY 95, with the scope of the study extended to the proposed Miami Intermodal Center (MIC) near Miami International Airport (MIA). Early in FY 96, the Metropolitan Planning Organization (MPO) adopted a resolution selecting the NW 27th Avenue alignment as the preferred alternative. The 9.5 mile rail extension within Dade County is expected to be completed by 2004. \$40.2 million in Local Option Gas Taxes have been programmed for match over the six year program.

A Major Investment Study of the MIC began in FY 94 using FHWA Congestion Mitigation funds. Additional FHWA funds for design and right of way acquisition of a fixed guideway system along the East-West Corridor from the Palmetto Expressway to MIA to the Seaport are programmed through FY 2001. The State has programmed approximately \$71.4 million through FY 2001.

ROUTINE REPLACEMENT AND ENHANCEMENT:

FY 96 formula funds have been programmed primarily to modernize the bus fleet, provide safety improvements, comply with contractual requirements and assure preservation of capital equipment and buildings.

BUSES: Dade County's bus fleet modification will continue in FY 97. Replacement of the 1980 RTS buses continues with the receipt of a total of 66 articulated buses in FY 96 and the scheduled receipt of 77 standard size buses at the end of FY 96 and the beginning of FY 97. Funding for leasing of 23 small buses in FY 96 is programmed using FY 96 and FY 97 formula and discretionary funds under the FTA's pre-award authority guidelines. Acquisition of 27 standard size buses is also programmed in FY 97.

The South Dixie Busway is scheduled to open at the beginning of FY 97. Small buses will be used to provide circulator service which will feed onto the busway and funding is programmed in FY 97 to lease these buses.

SAFETY: In order to deal with the recent increase in severity of assaults and batteries on transit operating staff and passengers, funding is programmed in FY 97 for acquisition of an on-board bus security and surveillance system using FTA discretionary funding matched with FDOT Toll Road Revenue Credits. A pilot project including placement of cameras on a portion of the fleet will be implemented in FY 96 using prior year funds.

ADA: Projects which promote compliance with the Americans with Disabilities Act (ADA) requirements are continued in FY 97. In FY 97-FY 2001, funds are provided to assess and modify all bus stops and to provide amenities for disabled passengers. Replacement of the paratransit vehicles, purchased in FY 93 and FY 94, will begin in FY 99.

ENVIRONMENTAL: Approximately \$3.1 million is programmed from FY 97 to FY 2001 for environmental assessment and remediation at Metrobus facilities, including an ongoing program of removal and replacement of underground storage tanks.

PASSENGER FACILITIES: Park and Ride Lots, which include acquisition and construction of new facilities as well as modifications to existing sites, are programmed with Federal, State, and local funds. Planning, design, and construction of concessions facilities at rail stations and major bus terminals is also provided in the six year plan.

The Northeast Dade Transit Area Study, completed in FY 95, recommends implementation of Passenger Transfer Activity Centers which will serve as major transfer "hubs" for arterial, trunk-line transit service and neighborhood or community based circulator services using smaller transit coaches. Funding is provided in FY 97 for one such center including bus facilities, furnishings and passenger amenities using discretionary federal funding matched with FDOT Toll Road Revenue Credits.

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR FY 97
MULTIMODAL TRANSIT IMPROVEMENTS**

As part of the Miami Downtown Development Authority's plan to revitalize the central downtown area of the city of Miami, funding from discretionary federal funds matched with FDOT Toll Road Revenue Credits is programmed in FY 97 for the reconfiguration of the downtown bus transfer center into an integrated transportation center linking bus routes, a new Flagler Trolley, Metrorail, Metromover, and taxi service.

OTHER PROJECTS:

Demonstration funds provided by the State's Service Development program will be available in FY 97 for projects which expand or improve public transit services. Proposed projects include the circulator service in Northeast Dade and along the South Dixie Busway. In addition, the FY 97 Urban Corridor funds provided by the State will fund the continuation of the successful Flagler MAX and 27th Ave MAX bus routes, with the balance funding the South Dixie Busway circulators.

The changing ridership trends have resulted in an increase in the number of buses operating out of the Central Garage. This condition requires the buses to operate significantly longer between servicing as compared to buses in the other garages which contributes to in-service breakdowns and high operating costs. Funding is programmed to expand the Central Garage using discretionary federal funding matched with FDOT Toll Road Revenue Credits.

Replacement of the 10 to 14 year old bus washers and Cyclone vacuum equipment at all three garages is also programmed using discretionary federal funding and FDOT Toll Road Revenue Credits.

UNFUNDED PROJECTS:

Unfunded projects include the final design and construction phases of the North Corridor, construction of additional Metrorail track crossovers, access ramps to Metrorail and the South Dixie Busway, and a Downtown Transportation Center.

TRI-COUNTY COMMUTER RAIL SYSTEM

THIS PAGE INTENTIONALLY LEFT BLANK

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 to 2000/2001
TRI-COUNTY COMMUTER RAIL AUTHORITY**

1996-97 CAPITAL IMPROVEMENT PROGRAM

Two areas of Tri-Rail requiring capital investment are as follows:

1. Station Improvements

The Station Improvements Line Item will fund the further expansion of the Tri-Rail/MetroRail 79th Street Station to improve parking and pedestrian access at the station.

2. Multi-Year Project/Track and Signal Improvements

Tri-Rail's FTA Section 3 funds will complement funding from the Florida Department of Transportation District IV (FDOT IV) for improving the Southeast Florida Rail Corridor (SFRC).

The FDOT SRFR Management Team's Master Plan presents a phased approach to double tracking the State-owned rail right-of-way and replacement of the existing signal system. Both the track and signal system are approximately fifty years old.

The FDOT Central Office in Tallahassee has requested that Tri-Rail's FTA Section 3 funding only appear in Broward County's TIP, even though some of these monies will be expended on Dade County Projects, which are included in the Dade TIP as informational items.

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 to 2000/2001
NON-MOTORIZED COMPONENT**

Dade County is committed to provide safe and convenient movement of bicycles and pedestrians alike. Constant with this objective, the MPO Governing Board passed a resolution adopting the Bicycle Facilities Development Guide on November 4, 1993

The policy guide states:

"It will therefore be the policy of the Metropolitan Dade County Public Works Department to review all plans and development proposals for provisions to accommodate the safe movement of bicycles and pedestrians, and require the incorporation of bicycle needs into the County's plans for any new road construction, widening, or reconstruction project, if feasible, in accordance with the approved Dade County Bicycle Master Plan.

This policy will generally provide for the construction of wide curb-lanes, undesignated lanes, marked bicycle lanes, or paved shoulders in conjunction with other roadway improvements. The lack of adequate right-of-way and the costs associated with acquisition in built-up areas may not allow us to provide this additional width. Roadway improvements will be reviewed on a case-by-case basis, depending on anticipated bicycle travel, and their conformance with the official and approved Bicycle Master Plan."

The Metro-Dade Bicycle Facility Plan was approved by the MPO Governing Board by Resolution No. 35-95 on July 20, 1995.

PURPOSE OF THE PLAN

The provision of bicycle facilities is one of the most important factors contributing to the safety and convenience of cyclists. The purpose of the Bicycle Facilities Plan is to establish a county-wide system of bicycle facilities that provides for safe and efficient use of the bicycle by users with a wide range of capabilities and needs while providing a more balanced multi-modal transportation system for Dade County.

INTELLIGENT TRANSPORTATION SYSTEMS (ITS)

THIS PAGE INTENTIONALLY LEFT BLANK

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 TO 2000/2001
INTELLIGENT TRANSPORTATION SYSTEMS (ITS)**

The Intelligent Transportation Systems (ITS) concept is based on the use of advanced computer, electronics and communications technologies to increase the effectiveness of the entire surface transportation system. Many of these technologies have already advanced other modes of transportation, such as aviation, and are now beginning to be used in surface transportation. ITS technologies will be applied to all types of vehicles (trucks, buses and cars), to information devices (computers, kiosks, and hand-held devices), and to all parts of the surface transportation system (freeways, urban arterial roadways, city streets, rural roads and intermodal connections) in order to:

Improve Safety By increasing information to the driver and augmenting driver control of the vehicle, ITS can decrease traffic incidents and fatalities. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease stops and speed variations, reducing the number of accidents.

Reduce Congestion and Improve Accessibility: ITS technologies will reduce congestion through rapid detection and clearing of incidents that cause delays; enhanced public transit systems will reduce highway traffic; and real-time traffic control systems will adapt automatically to changing conditions and will improve the flow of traffic.

Improve Energy Efficiency and Environmental Quality: ITS will provide travelers with information to support decisions that will smooth out highway demand and reduce travel time and vehicle emissions by providing opportunities to use high occupancy vehicles or public transit or to mitigate the need for travel altogether.

Enhance Economic Productivity: ITS will improve transportation system efficiency through better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

On December 1994, Dade County established an ITS Coordinating Committee. The main purpose for the creation of this ITS steering committee is to plan for a comprehensive integrated ITS program for the Miami urbanized area and give support for the development and future applications of the ITS technologies in Dade County. Membership in the ITS Coordination Committee include representatives from the MPO, the Dade County Public Works Department, the Metro-Dade Transit Agency, the Dade County Aviation Department, the Dade County Department of Environmental Resources Management, the Tri-County Commuter Rail Authority, the Florida International University and the Florida Department of Transportation - District Six.

**TRANSPORTATION IMPROVEMENT PROGRAM
FISCAL YEAR 1996/1997 TO 2000/2001
TRANSPORTATION DISADVANTAGED SECTION**

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program "shall . . . identify transportation improvements that will be advanced with [transportation disabled] funds during the program period." This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c ("Transportation Improvement Program Development and Review"). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

The projects listed in this section do not show funding amounts or schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.
