2018 - 2022 TIP

## TRANSPORTATION PLANNING ORGANIZATION FOR THE MIAMI URBANIZED AREA

#### 2018 - 2022 TIP

This document was prepared by the Transportation Planning Organization for the Miami Urbanized Area in collaboration with the Florida Department of Transportation; Miami-Dade Expressway Authority; Florida's Turnpike Enterprise; South Florida Regional Transportation Authority; Miami-Dade County Office of Strategic Business Management; Miami-Dade Department of Transportation and Public Works, Miami-Dade County Aviation Department; Miami-Dade Seaport Department; Miami-Dade League of Cities; Miami-Dade County Department of Regulatory and Economic Resources; and the Miami-Dade County Developmental Impact Committee.

The Miami-Dade TPO complies with the provisions of Title VI of the Civil Rights Act of 1964, which states: No person in the United States shall, on grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. It is also the policy of the Miami-Dade TPO to comply with all of the requirements of the Americans with Disabilities Act. For materials in accessible format please call (305) 375-4507.

The preparation of this report has been financed in part from the U.S. Department of Transportation (USDOT) through the Federal Highway Administration (FHWA) and/or the Federal Transit Administration (FTA), the State Planning and Research Program (Section 505 of Title 23, U.S. Code) and Miami-Dade County, Florida. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

## **Executive Summary**

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

#### **EXECUTIVE SUMMARY**

The Transportation Improvement Program (TIP), a major document of the Transportation Planning Organization (TPO) for the Miami Urbanized area, specifies proposed transportation improvements to be implemented in Miami-Dade County over the coming five years. The primary emphasis of the TIP is on the first three years of the program. As required by federal regulations, projects receiving federal funds during the October 1, 2017 to September 30, 2022 time period are to be drawn from those listed in this document. In addition, projects not using federal funds, but which are part of the area's program of improvements, are shown in the TIP. Projects shown for FY 2018 and beyond, regardless of their funding source, are included as proposed. While it is anticipated that most of these projects will be implemented as programmed, they will be periodically evaluated by the TPO as the TIP is updated or amended as necessary. The projects in the TIP are also shown for a fiveyear time period. While the emphasis is on the first three years, presenting a five-year span allows for a more systematic forecast of funding needs during a five-year planning cycle and provides a more comprehensive view of the program for public information purposes. Included in the TIP are Intermodal, Highway, Transit, Aviation, Seaport and Non-Motorized improvements costing in excess of \$9.02 billion. Included are the following categories:

Funding S	<u> Summary - Fiscal Years 2018 - 2022: (\$s in mill</u>	lion	<u>1S)</u>						
Highways -	State Roads:								
	Primary (FDOT)\$ 4,687	7 -	· <b>-</b>	52.0%

							\$ 2,471	_	27.4%
					T	OTAL	\$ 9,015		100.0%

#### **Executive Summary**

South Florida Regional Transportation Authority (SFRTA) 5-year funding allocation of \$27 Million (SFRTA funding is allocated through FDOT District 4, even though it serves portions of Miami-Dade County).

Some \$4,687 million are programmed for the five-year period between FY 2018 and 2022 for State Road projects. In addition to major highway capacity improvements, an extensive program to renovate and resurface a number of deteriorating roads and bridges are also included.

The Secondary, Road Impact Fee, and People's Transportation Plan (PTP) Programs contain a number of key projects in the County Highway/Transit System costing just over \$525 million. Aviation improvements involve Miami International, Opa-Locka and Tamiami airports. Transit improvements involve a broad range of public transportation services and facilities. Seaport improvements consist of numerous new port facilities and major renovations and improvements to existing facilities. Funding for the implementation of several intermodal projects is also shown, as well as projects in the "non-motorized" category which includes improvements associated with pedestrian and bicycle facilities.

The FY 2018 TIP also includes a section titled "Unfunded Priority Needs." This section lists TPO priorities in addition to those already programmed in the TIP. The priority listing was developed for subsequent inclusion in the Transportation Improvement Program as new revenues become available. The TPO, in its role of preparing metropolitan transportation plans, will continue to assess critical transportation needs and priorities considered essential for the mobility of the urban population.

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system.

The projects and priorities in this TIP are consistent with those in the adopted 2040 Transportation Plan. Because the 2040 Plan was found to conform to federal regulations and the Florida State Implementation Plan (SIP), the TPO has found this TIP to also conform to all relevant laws, regulations and plans.

Note: All \$ values represented in this document are in Year of Expenditure (YOE) dollars, as required by 23CFR450.324(h) "Project costs reported in the TIP are in Year of Expenditure (YOE) dollars, which takes into account the inflation rate over the five years covered by the TIP."

#### National Park Service Funding for Everglades National Park Improvements:

The following information is hereby included in this Fiscal Year 2018-2022 Transportation Improvement Program, in accordance with 23CFR450.324(e).

These projects are located in federally owned lands in the Eastern United States and is funded with federal funds, outside of the Federal Highway Trust Fund, and the funding will not pass through the Florida Department of Transportation. There is no fiscal impact to the 2018-2022 TIP. These projects are included here for informational purposes. These projects are funded outside of the Federal Highway Trust Fund and the funding will not pass through the Florida Department of Transportation.

AWARD FISCAL YEAR	PROJECT	APPLICANT	DESCRIPTION	COUNTY	PRIMARY FUND SOURCE	TOTAL PROGRAM AMOUNT
2016	EVER_196127	National Park Service, Everglades National Park	Prepare National Environmental Policy Act (NEPA) for 10.7 miles of Tamiami Trail and Design/Build to build 2.66 mile section with bridge(s) Category: 4R Phase: Planned	MIAMI- DADE	Funding sources are FDOT, TIGER, DOI, and FLTP	More than \$10,000,000

Eastern Federal Lands Highway Division FY2017-2020 TIP Reference

#### **Public Involvement**

Public involvement for the development of the TIP is received through regularly scheduled meetings of the TPO Governing Board and its advisory committees. A typical TIP Development cycle, in Miami-Dade County, follows the following timeline:

- The TIP process begins at the start of each federal fiscal year on October 1st. FDOT District 6 and Florida's Turnpike Enterprise presents to advisory committees a very Tentative Five-Year Work Program document.
- During the month of November, the Citizen's Transportation Advisory Committee (CTAC) and the TIP Development Committee endorse the Tentative Five Year Work Program. November public hearings are also scheduled for review and input to the FDOT District 6 Tentative Work Program in Miami-Dade and Monroe Counties.
- In December, the Transportation Planning Council (TPC) and the TPO Governing Board endorse the Tentative Five-Year Work Program.
- By mid- December, the Interactive TIP web tool opens to county transportation stakeholder agencies.
- During the months of January and February of each year, the TIP Development Committee meets weekly to advance, review and approve a Draft TIP. These meetings are open to the public.
- By Mid-March of each year, a printed Draft TIP Program document is available for Public review and input at the TPO Office.
   The Draft TIP is posted prominently on the TPO website at: <a href="http://miamidadetpo.org/transportation-improvement-program.asp">http://miamidadetpo.org/transportation-improvement-program.asp</a>
- By the end of March, a Citizen's TIP document is sent to CTAC and the TPC and a Draft TIP is posted to the TPO website
  for review and comment by the public. The Citizens TIP is a citizen user-friendly color booklet that condenses the big picture
  projects of that year's TIP, provide pictures, renderings and maps and educates user as to what is the TIP and what projects
  are underway and which ones have been completed from the previous year's TIP. The current 2017 Citizen's TIP is
  prominently posted on the TPO website at: <a href="http://miamidadetpo.org/library/reports/tip/Citizens-Version/2018-transportation-improvement-program-citizens-version.pdf">http://miamidadetpo.org/library/reports/tip/Citizens-Version/2018-transportation-improvement-program-citizens-version.pdf</a>
- Parallel to these efforts, the TPO has regularly scheduled meetings with the community where the Draft TIP is distributed.
   Favorable verbal comments have been received and citizens expressed their excitement having a Citizens Version of the program.
- The Draft TIP is included as information item on the April meeting agendas of the CTAC and the TPC. These meetings are open to public for comments and input.
  - > TPC review of the Draft FY 2018-2022 TIP took place at their May 8<sup>th</sup>, 2017 meeting
  - > CTAC review of the Draft FY 2018-2022 TIP took place at their May 3<sup>rd</sup>, 2017 meeting
- The TIP is advertised for public hearing.
- The Final Draft TIP is presented for approval on the May agendas of the TPC and CTAC committees. These meetings are open to the public.
  - > CTAC approval of the 2018-2022 TIP took place at their May 8<sup>th</sup>, 2017 meeting
  - > TPC approval of the FY 2018-2022 TIP took place at their June 12<sup>th</sup>, 2017 meeting

#### **Executive Summary**

- The TIP is regularly approved by the TPO Governing Board at their May meeting. In Miami-Dade County, the TPO Governing Board approves the Program Priorities concurrently with the TIP. This early approval allows FDOT for an early review of TPO Program Priorities in the development of their Tentative Work Program cycle.
  - > TPO Governing Board approval of the FY 2018-2022 TIP took place at their June 22<sup>nd</sup>, 2017 meeting.
- The Miami-Dade TIP is sent in June to funding agencies for their review and input.

## **Resolution Approving Final TIP**

#### **TPO RESOLUTION #21-17**

RESOLUTION APPROVING THE FISCAL YEARS 2018-2022 TRANSPORTATION IMPROVEMENT PROGRAM AND URGING THE MIAMI-DADE EXPRESSWAY AUTHORITY TO PRESENT AT THE NEXT TRANSPORTATION PLANNING ORGANIZATION (TPO) GOVERNING BOARD MEETING ITS FORMAL COMMITMENT TO ASSUME THE PROJECT MANAGEMENT, WHICH SHALL INCLUDE FULL FUNDING FOR THE DESIGN, CONSTRUCTION, OPERATION, AND MAINTENANCE, OF ONE OF THE SIX (6) STRATEGIC MIAMI AREA RAPID TRANSIT (SMART) PLAN CORRIDORS

WHEREAS, the Interlocal Agreement creating and establishing the Metropolitan Planning Organization (MPO) for the Miami Urbanized Area requires that the MPO provide a structure to evaluate the adequacy of the transportation planning and programming process; and

WHEREAS, the FYs 2018-2022 Transportation Improvement Program details the programming of all intermodal, highway, transit, seaport, aviation, commuter rail and non-motorized transportation projects to be implemented during the 2018-2022 fiscal period in Miami-Dade County; and

WHEREAS, the Transportation Planning Council (TPC) has been established and charged with the responsibility and duty of fulfilling the aforementioned functions; and

WHEREAS, the TPC has reviewed the FYs 2018-2022 TIP, made a part hereof, and finds it consistent with the goals and objectives of the Transportation Plan for the Miami Urbanized Area,

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING BOARD OF THE TRANSPORTATION PLANNING ORGANIZATION IN ITS ROLE AS THE MPO FOR THE MIAMI URBANIZED AREA, this Board hereby approves the attached Fiscal Years 2018-2022 Transportation Improvement Program and urges the Miami-Dade Expressway Authority to present at the next TPO Governing Board meeting its formal commitment to assume the project management, which shall include full funding for the design, construction, operation, and maintenance, of one of the six (6) Strategic Miami Area Rapid Transit (SMART) Plan corridors.

The adoption of the foregoing resolution was moved by Chairman Esteban L. Bovo, Jr. The motion was seconded by Vice Chairman Francis Suarez, and upon being put to a vote, the vote was as follows:

#### Chairman Esteban L. Bovo, Jr. - Aye Vice Chairman Francis Suarez - Aye

Board Member Bruno A. Barreiro	- Aye	Board Member Daniella Levine Cava	- Aye

Board Member Barbara J. Jordan	- Aye	Board Member Javier D. Souto	- Absent
Board Member Smith Joseph	- Aye	Board Member Xavier L. Suarez	- Aye
Board Member Philip Levine	- Absent		

The Chairperson thereupon declared the resolution duly passed and approved this 22<sup>nd</sup> day of June, 2017.

ROLE AS

DADE MPO

TRANSPORTATION PLANNING ORGANI

Zainab Salim, Clerk Miami-Dade TPO

### Introduction

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

#### INTRODUCTION

#### **Purpose**

This document is prepared every year to fulfill Federal statutory requirements which provide that, as a condition to receive Federal funding, each urbanized area will have a continuing planning process that results in plans and programs consistent with the comprehensive development plan of the urbanized area. This document programs transportation projects that serve this purpose. The priorities established by this document express the policy decision of the Transportation Planning Organization (TPO) as to the order in which transportation improvements will be advanced during the program period. This document also fulfills Federal requirements in that the included projects are derived from the area's 2040 Long-Range Transportation Plan (LRTP) for inclusion in the program and addresses program requirements relating to the federal transportation law passed in July, 2012 titled "Moving Ahead for Progress in the 21st Century Act (MAP-21)". On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system.

#### **Transportation Plan**

The Metropolitan Planning Organization Board adopted under MPO Resolution #20-14, in October 23, 2014, the 2040 Miami-Dade LRTP. Projects from the area's adopted MPO 2040 LRTP have been included for advancement during this program period. The next major update of the LRTP to the year 2045 is due October, 2019. Major activities included are: support facilities for METRORAIL, express bus service, interstate highway projects, congestion management and non-motorized projects; express transit on managed lanes; arterial street improvements, aviation and seaport facilities, and additional bus transit and paratransit improvements, the construction of major intermodal facilities and the deployment of Intelligent Transportation System applications. The recommended improvement priorities of the adopted Long Range Transportation Plan provide the basis for preparing this document. The Plan presents the logical and systematically phased development of the area's transportation network and services to the year 2040. Transportation System Management (TSM) projects are proposed to be continued or expanded during Fiscal Years 2017/2018 through 2021/2022. The Miami-Dade Secondary Road Program and Road Impact Fee Program contain projects that are supportive of the areawide TSM effort. These included traffic flow improvements, provisions for preferential treatments of high occupancy vehicles where appropriate, improvements to intersection geometrics, lighting safety projects, and other related projects which provide for greater safety and better management of traffic flow and are supportive of on-going transportation demand management activities. TSM projects are consistently included in the preparation of project-adopted proposals in keeping with the TPO's commitment to fully develop TSM as a policy and investment strategy to continually enhance the mobility of the urban population. The Year 2040 Transportation Plan stresses the achievement of long-standing and fundamental planning

objectives. In addition to land-use considerations, the Plan addresses related issues involving the quality of the environment and the conservation of limited natural resources. These concerns are particularly important as revisions to the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County are periodically considered. An extensive public participation process is conducted during all major stages of Plan preparation and adoption and also during periods when Plan revisions are formally considered.

Citizens review activities are coordinated by the Citizens Transportation Advisory Committee (CTAC), a body appointed by the TPO Board to provide formal input in all pertinent transportation issues.

#### **Comprehensive Development Master Plan**

The fiscal year 2018-2022 Transportation Improvement Program (TIP), as set forth in this document, is generally consistent with the Adopted Components of the Comprehensive Development Master Plan (CDMP) for Miami-Dade County, Florida, as amended through October 26th, 2016. The CDMP contains twelve Plan elements. The Transportation Element specifically provides for an integrated multimodal transportation system for the circulation of motorized and non-motorized traffic in Miami-Dade County. The goal of the Transportation Element is to develop and maintain an integrated multimodal transportation system to move people and goods in a manner consistent with overall Countywide land use and environmental protection goals, objectives and policies, and to provide a comprehensive approach to the transportation system needs of the County by addressing all modes of transportation - pedestrian and bicycles facilities, traffic circulation, mass transit, aviation and ports. The Transportation Element is divided into five subelements: Traffic Circulation, Mass Transit, Aviation, Port of Miami River, and PortMiami Sub elements. The Traffic Circulation Subelement addresses the needs of automobile traffic, bicyclists and pedestrians; the Mass Transit Subelement addresses the need to promote and expand the public mass transit system and to increase its role as a major component in the County's overall transportation system; the Aviation Subelement addresses the need for the expansion, development and redevelopment of the County's aviation facilities; and the Port of Miami River and PortMiami Subelements promote maritime business and traditional maritime related shoreline uses along the Miami River and PortMiami and their expansion needs. A key feature of the Traffic Circulation and Mass Transit Subelements is the establishment of level-of-service standards to ensure that adequate capacity will be available in all modes to service new development and redevelopment in Miami-Dade County. The ability to maintain the level-of-service standards has become a primary determinant for addressing relative priority among the various transportation improvement needs.

The County is striving to provide roadway, transit, sidewalks, and bicycle lane improvements along congested corridors in order to develop a multimodal transportation network designed to include bus turnout bays, bus shelters, managed lanes, pedestrian and bicycles facilities, and mass transit services.

One of the most significant and far reaching provisions of Florida's "Community Planning Act (2011)" is the requirement that all local comprehensive plans contain a Capital Improvement Element (CIE). The intent of this requirement is to make the

comprehensive plan fiscally feasible and to provide a schedule of capital improvements which includes any publicly funded federal, state, or local government projects, and may also include privately funded projects for which the local government has no fiscal responsibility. Projects which are necessary to ensure that any adopted level-of-service standards are achieved and maintained (sec. 163.3180(1)(b), F.S.) for the 5-year period must be identified as either funded or unfunded and given a level of priority for funding (sec. 163.3177(3)(a), F.S.). For this reason, the highway capacity-type of improvements on the County highway system, and the transit, aviation and seaport projects, which are programmed in the TIP, are also included in the County's CDMP Capital Improvements Element's (CIE) 6-years capital improvements schedule. Additionally CDMP Policy TE-1H requires transportation plans to take into consideration climate change adaptation and mitigation strategies through project review, design, and funding for all transportation projects.

#### **Public Involvement/Public Hearing**

Reasonable opportunity for public comment was provided in accordance with the requirements of 450.316(b)(1) and, in maintenance TMAs, an opportunity for at least one formal public meeting during the TIP development process. This public meeting may be combined with the public meeting required under 450.322 (c). The TIP process begins at the start of each fiscal year. A letter is sent to all municipalities, involved agencies and private parties informing them that the process is to begin, providing them with the tentative scheduling and soliciting their input. The Citizens Transportation Advisory Committee (CTAC) provides a forum for citizens to evaluate the recommendations developed through the TPO's transportation planning and programming process. One of the main responsibilities of the CTAC is to ensure that proposed transportation projects are responsive to the community's perceived needs and goals. The TPO provides adequate public notices for public hearings so as to allow community citizens the opportunity to approve documents such as the TIP. The proposed TIP is published and made readily available for information purposes. The functional responsibilities of participating agencies are needed to insure the continuing development and operation of urban transportation system facilities. CTAC review of the document took place on May 3<sup>rd</sup>, 2017. The final public hearing for adoption to take place June 22<sup>nd</sup>, 2017.

#### **Program Funding**

The TIP categorizes all transportation improvements and identifies priorities, which establish multi-year fiscal programming. The biennial elements represent the list of projects, which are proposed for implementation during the first program phase and are viewed as the "Capital Improvements" budget for transportation facilities. This TIP document identifies all sources of funding which are known or are anticipated to be available during the program period. Program costs are consistent with current estimates of available revenue. Priorities in the program are identified by relative staging of projects for implementation during a particular year, consistent with funding availability and production constraints. Most Highway funding comes from gasoline taxes, motor vehicle fees, and other automobile-related "user fees". Major sources of existing and potential highway funding sources include: Federal Gas Tax, State Motor Fuel Tax, Local Option Gas Tax, Voter Gas Tax, Motor Vehicle Fees, Impact Fees and Tolls. Transit

funding is derived from a host of Federal, State and local programs, including the ½ cent sales tax increase approved by voters on November 2002. For rail and bus projects, funding is mostly sought through Federal and State grants. Transit operating costs are supported largely through local revenue sources

#### **Summary of TIP Projects**

The projects in the FY 2018/2022 TIP have been grouped into major categories, with order of priority established within each category insofar as possible or applicable. The groupings are established primarily by virtue of funding source and implementing responsibility.

The thrust of Miami-Dade County's effort to enhance the mobility of the urban population, achieve a balanced transportation system, to meet energy conservation needs, to improve air quality, as well as to preserve or enhance the physical and social environment of the community, is evident when it is noted that approximately 23.4% of the FY 2018-2022 program budget is devoted to public transit projects. It should be noted that Primary, Interstate and Turnpike categories combined constitute about 67.0% of the approximate \$9.02 billion in the FY 2018-2022 program budget.

#### **Priorities**

The 2040 Miami-Dade Transportation Plan - Long Range Element, recommended phasing for highway capacity improvements are classified into four priority categories:

Priority 1 - - Priority improvements to be constructed and opened to traffic by the year 2020. Includes those projects needed to respond to existing traffic problems. Funds for most of these improvements are already programmed in this Transportation Improvement Program.

Priority 2 - - Improvements where project development and funding efforts would take place between 2021 and 2025.

Priority 3 - Improvements to be made between the year 2026 and 2030. In many cases, project development activities would need to commence in the 2021 and 2025 period, due to the amount of lead-time required to plan and implement a project.

Priority 4 - Improvements to be made in the latter part of the 25-year plan period (2031 to 2040). Includes projects responding to long-range travel needs and roadway improvements constructed through the county and the Sub-division process, which may be earlier than the 25-year period of the 2040 LRTP Plan.

Because of the uncertainties of funding availability and the time required to develop a detailed project, the specific time periods and dates indicated in the above priority listing should be considered only as guidelines for project implementation.

The LRTP Update to the Year 2040 was approved by MPO Governing Board at its October 23<sup>rd</sup>, 2014 meeting.

#### **Amendments**

The TIP may be amended at any time during the program year through the same procedures required for developing and adopting this original program. The amendment(s) may be for the purpose of deleting projects, adding projects, revising the funding of a project, or modifying the scope or limits of a project. Detailed information of the amendment process is available from the TPO upon request.

## **Bicycle Accomodations Legend**

BICYCLE ACCOMODATIONS LEGEND		
CODE	NAME	
Bike Lane	A bike lane is a portion of a roadway that is designated by signs and markings for preferential use by bicyclists.	
Paved Shoulder	A paved shoulder is a portion of a roadway that has been delineated by edge line striping and may include bicycle lane pavement markings or signing.	
Wide Curb Lane	A wide curb lane is a through lane that provides a minimum of 14 feet in width.	
Other	Could include:	
	a. Multi-use path: a paved path that is physically separated from the road and is designed to accommodate two-way bicycle and pedestrian traffic. Sidewalks do not meet the width and operational criteria for multi-use paths.	
	<ul> <li>b. Shared Lane Marking: the shared lane marking is not a bicycle facility.</li> <li>It is an optional pavement marking for shared lane roadways where no bicycle lane or paved shoulder exists or is feasible.</li> </ul>	
To Be Determined	The type of bicycle facility to be included in the project has not yet been determined.	

Strategic Miami Area Rapid Transit (SMART) Plan

#### Fiscal Years 2016/2017 - 2020/2021 Transportation Improvement Program

#### Strategic Miami Area Rapid Transit (SMART) Plan

#### **Purpose of this Section:**

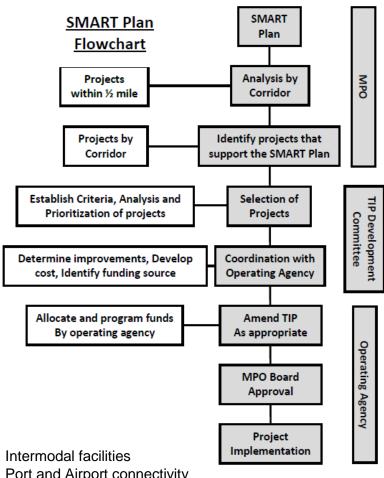

On February 18, 2016, the TPO Governing Board approved under Resolution #06-16, the establishment of a policy to set as highest priority the advancement of rapid transit corridor projects in Miami- Dade County. As a result of this Resolution, on April 21, 2016, the Strategic Miami Area Rapid Transit (SMART) Plan was endorsed by the Board under Resolution #26-16.

The purpose of this section is to support the advancement and implementation of the SMART Plan through analysis, monitoring, updating and engagement of the Miami-Dade Transportation Planning Organization (TPO) in association with our transportation partners. The SMART Plan includes six (6) rapid transit corridors and a bus express network, as shown in the attached map. All these corridors are connected to the Metrorail system that is the backbone of the transportation system in Miami-Dade County.

In order to comply with the TPO Governing Board Resolutions, the TPO is initiating a new process under the purview of the TIP Development Committee. The objective of this effort is to integrate those projects within a half mile to the SMART corridors that can improve transit along these selected corridors. Following is a flowchart of the proposed process.

The TPO has already identified a list of projects within the ½ mile boundaries. The following table shows the number of projects identified by Fiscal Year in the areas of:

- New road construction
- Adding capacity
- Widening lanes
- Rehabilitation
- Traffic improvements
- Bicycle & Pedestrian
- Port and Airport connectivity
- Landscaping
- Freight improvements, and
- PD&Es, among others

Purpose, Contents, Project Selection and Concluding Statements

PORT//II/A//II

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program FEDERALLY FUNDED PROJECTS

### **Purpose of this Section**

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for the Department's highway, highway and motor vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs. Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system.

The intention of this section of Miami-Dade County's FY 2018/2022 TIP is to illustrate how the TPO's priorities are to be funded, by Federal funding category, and by fiscal year. Specifically, this section addresses the requirements for TIP development as cited in Title 23 USC Section 134 (subsections (h)2 and (i) 4).

### **Contents of this Section**

This section contains the project listings by major funding category. Projects are identified by Work Program Item Numbers and show the corresponding project description, type of work and funding for each of the first four (4) years of the TIP.

### **Concluding Statements**

- This section is presented in order to fulfill federal requirements as noted in Section 134 of Title 23, United States Code (ISTEA).
- Only major categories of federal funds are highlighted in this section.
- Only the first four years of the TIP (FY 2017/2018, 2018/2019, 2019/2020 and 2020/2021) are included in this section.
- The projects shown in this section are consistent with the FDOT District VI Adopted Work Program.
- Federal funds can reasonably be expected to be made available for all projects included in this section.

All information contained in this section is consistent with the adopted TIP attached hereto.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
State Transportation System and Major Projects

#### Fiscal Years 2017/2018- 2021/2022 Transportation Improvement Program

#### STATE TRANSPORTATION SYSTEM AND MAJOR PROJECTS

#### Florida Department of Transportation, District Six

This section of the Transportation Improvement Program (TIP) focuses on the State Transportation System and Major Projects located within Miami-Dade County. The projects listed include improvements to highways, transit, aviation, rail, seaport, freight, and bicycle/pedestrian modes over the next five fiscal years.

The FDOT, District Six, section provides an overview of the following topics:

- The FDOT Five Year Work Program
- The Work Program Cycle
- · Programs and Funding
- Strategic Intermodal System (SIS) Projects
- Other Major Corridor Improvements
- Intelligent Transportation System (ITS) Program
- Bicycle/Pedestrian Corridor Improvements
- Public Transportation Projects

#### The Florida Department of Transportation's Five Year Work Program

The FDOT District Six Work Program is a major component of the Miami-Dade Transportation Planning Organization's (TPO) TIP. The Work Program, which is updated annually, is a project specific list of transportation activities and improvements that the FDOT will undertake during the next five-year period. It is developed by the District in cooperation with the Miami-Dade TPO, and is consistent with the 2040 Long Range Transportation Plan (LRTP), and TPO priorities. The projects must also meet the objectives of the 2060 Florida Transportation Plan (FTP). The first three years of the Adopted Work Program represent a commitment that local governments may rely on for planning purposes, and for the development of capital improvement elements of the local government comprehensive plans.

#### **The Work Program Cycle**

The Department coordinates development of the Work Program with the TPO TIP Committee process and input is received through public hearings. In the summer of 2016, FDOT began the new cycle to develop the "Tentative" Work Program for Fiscal Years (FY) 2018 - 2022. The final tentative program is sent to the Governor in February and the State Legislature in March for review, and will become effective on July 1, 2017.

#### **Programs and Funding**

#### **Program Descriptions**

For budgeting purposes the FDOT's Work Program comprises five departmental programs including; Product, Product Support, Operations and Maintenance, Administration and Other. An overview of each program is summarized below:

- **Product** The FDOT's Work Program Product consists of all transportation improvement projects for highways, bridges, transit, aviation, rail, seaport, freight, and bicycle/ pedestrian modes. It also includes the land cost of right-of-way acquisition, resurfacing improvements for preservation of the transportation system, and safety programs.
- **Product Support** Product Support includes preparation of planning studies, project development and environmental studies, design plans, right-of-way support costs for managing acquisition activities, environmental mitigation as well as construction engineering and inspection of projects noted above under the heading Product. It also includes management and program oversight for public transportation grants.
- Operations and Maintenance Operations and Maintenance includes the activities necessary to maintain and operate the transportation infrastructure once it is constructed. This includes routine roadway and roadside maintenance, bridge inspection, traffic engineering and operations, toll collection, and enforcement of motor carrier compliance laws.
- **Fixed Capital** Fixed capital comprises Work Program development, financial services and budget, information systems, legal, personnel, and contract administration functions. It also includes construction and rehabilitation of department buildings and facilities.
- Other Other activities include debt service, State Infrastructure Bank (SIB) loan payback, maintenance of the FDOT's mobile equipment and operation of the FDOT warehouse and supply system.

#### **Funding Overview**

The Department's funds are allocated among seven Districts statewide and the Florida Turnpike Enterprise. In Miami-Dade, the Department in consultation with the TPO, determines the best use of Miami-Dade's share of funding. The Department's resources are primarily from federal and state dedicated sources. The State Transportation Trust Fund and the Federal Highway Trust Fund receive revenue from specific tax sources for transportation purposes. Additional funding for Work Program projects comes from local and discretionary sources. By statute, the Department must develop a program that is balanced to cash and revenue forecasts.

#### FDOT District Six, Total Budget Breakdown Tentative Five Year Work Program - Fiscal Years 2018-2022

As shown in the Total Budget Breakdown chart below, the majority of the Department's \$3.98 billion budget is applied to the product budget in the amount of \$2.8 billion.

#### FDOT District Six, Product Budget Breakdown Tentative Five Year Work Program - Fiscal Years 2018-2022

The product budget includes money spent on construction, freight, logistics & passenger operations (public transportation), right-of-way, and other product. As shown in the Product Budget Breakdown chart below, approximately \$2.07 billion (72.8%) of the budget will go towards funding construction projects, which fall under four major construction categories: capacity improvement, safety, bridge, and resurfacing; approximately \$477.6 million (16.8%) will go towards public transportation programs and services; approximately \$258.7 million (9.1%) will go towards the purchasing of right-of-way; and the remaining \$39.6 million (1.4%) will be applied to other product, which consists of County Transportation Programs such as the County Incentive Grant Program and the Transportation Alternatives Program.

#### Strategic Intermodal System (SIS) Projects

Florida's Strategic Intermodal System (SIS) is a transportation system that comprises facilities and services of statewide and regional significance. The SIS includes linkages that provide for smooth and efficient transfers between modes and major facilities. The SIS is intended to integrate all modes of transportation into a single intermodal transportation network. The SIS was established to efficiently serve the mobility needs of Florida's citizens and businesses, as well as visitors, and to position Florida as a worldwide economic leader, with enhanced global competitiveness.

The SIS network of high-priority transportation facilities includes commercial airports, spaceports, deep water seaports, freight rail terminals, passenger rail, intercity bus terminals, rail corridors, waterways and highways. These facilities carry more than 99% of all commercial air passengers, virtually all waterborne freight tonnage, almost all rail freight, 89% of all interregional rail/bus passengers, more than 70% of all truck traffic and 55% of total traffic on the State Transportation System.

#### **FDOT, District Six - State Transportation System and Major Projects**

The following are major SIS improvement projects in Miami-Dade County:

#### I-75/SR 826/Palmetto Expressway Express Lanes

This project consists of the implementation of variable tolled express lanes along the SR 826/Palmetto Expressway from SR 968/Flagler Street to NW 154<sup>th</sup> Street and along I-75 from SR 826/Palmetto Expressway to NW 170<sup>th</sup> Street in Miami-Dade County. The project is approximately 13 miles in length and will provide continuity to the I-75 Express Lanes, which extends to I-595 in Broward County.

The project is part of the emerging South Florida Express Lanes network. It will improve mobility, relieve congestion, accommodate future growth and development in the region, enhance emergency evacuation, and improve connectivity with SR 826/Palmetto Expressway, I-75, SR 924/Gratigny Parkway, Florida's Turnpike, I-595, and the SR 869/Sawgrass Expressway.

The total construction cost for the Miami-Dade design build project is \$246 million. Construction began in February 2014 and is estimated to be complete by the end of 2017. For information about the construction schedule or related information, visit <a href="https://www.PalmettoExpressLanes.com">www.PalmettoExpressLanes.com</a>.

#### SR 826/Palmetto Expressway Eastbound to SR 9A/I-95 Northbound Ramp Connection

The primary purpose of this project is to provide a direct ramp connection from eastbound SR 826/Palmetto Expressway to northbound I-95. The ramp connection, located within the Golden Glades Interchange, will lead to improved operations via a direct expressway-to-expressway connection between SR 826 and I-95, two of Miami-Dade's major expressways.

#### Other key features of this project include:

- 1. The relocation of the NW 12<sup>th</sup> Avenue on-ramp to I-95 northbound and southbound with an increase in ramp curvature to enhance safety.
- 2. Provision of Texas U-Turns at NW 12<sup>th</sup> Avenue and NW 17<sup>th</sup> Avenue interchanges.
- 3. Widening of the Turnpike connector to provide two lanes from the Turnpike southbound merging with the SR 836 eastbound to I-95 southbound traffic.
- 4. Replacement of the SR 826 Connector Bridge and NW 167<sup>th</sup> Street westbound to I-95 Ramp Bridge to accommodate direct flyover connection ramp and SR 7/US 441 northbound lanes.
- 5. Provision of signalized dual left turn lanes from SR 826 to northbound Turnpike.

- 6. Relocation of Turnpike Connector to SR 7/US 441 Off-Ramp to increase distance between signals in order to improve operations along the Turnpike Connector.
- 7. Widening of I-95 southbound from the interchange to NW 151<sup>st</sup> Street in order to accommodate the additional lane from the Turnpike Connector.
- 8. The provision of dual northbound left turn lanes at NW 2<sup>nd</sup> Avenue and NW 167<sup>th</sup> Street intersection to improve intersection operations.

#### **SR 997/Krome Avenue Corridor Improvements**

SR 997/Krome Avenue is a major north-south SIS corridor that extends from US 1 in Florida City to US 27/SR 25/Okeechobee Road. The Krome Avenue corridor serves a mix of users ranging from commuters, trucks, and farm equipment within the agricultural area. This project will improve safety for all users along the corridor. The existing two-lane undivided roadway will be widened to a four-lane divided section with inside and outside shoulders. Upon completion, there will be two northbound lanes and two southbound lanes.

This corridor has been broken down into several segments for design and construction with notable progress as follows: <a href="https://www.fdotmiamidade.com/krome">www.fdotmiamidade.com/krome</a>.

- 1. Mile Post 10.935 to south of Okeechobee Road/Mile Post 14.032 Construction and widening to 4 lanes began on April 2016 and is expected to be completed in March 2017.
- 2. Mile Post 8.151 to Mile Post 10.935 Construction and widening to 4 lanes began on June 2015 and was completed in December 2016.
- 3. Mile Post 5.122 to Mile Post 8.151 Construction and widening to 4 lanes began on June 2015 and was completed in August 2016.
- 4. Mile Post 2.754 to Mile Post 5.122 Construction and widening to 4 lanes began on August 2015 and is expected to be completed in March 2017.
- 5. North of SR 90/SW 8<sup>th</sup> Street to Mile Post 2.754 –Construction and widening to 4 lanes began on August 2015 and is expected to be completed in March 2017.

- 6. SR 94/Kendall Drive to SR 90/SW 8<sup>th</sup> Street Construction and widening to 4 lanes began on February 2015 and is expected to be completed in November 2017.
- 7. SW 136<sup>th</sup> Street to SR 94/Kendall Drive. Construction and widening to 4 lanes began in September 2016 and is expected to be finished in December 2017.
- 8. SW 184 St to SW 136 St This project is currently in the design phase. Construction is scheduled to begin in October 2018.
- 9. SW 232 St to SW 184 St This project is currently in the design phase. Construction is scheduled to begin October 2018.
- 10. SW 296 St to South of SW 232 St This project is currently in the design phase. Construction is scheduled to begin in August 2019.
- 11. SW 312 St to South of SW 296 St This project is currently in the design phase. Construction is scheduled to begin in August 2019.
- 12. SW 312 St/Campbell Dr from SR 997/Krome Ave to SR 5/US 1 This project is currently in the design phase. Construction of a roadway widening and reconstruction is scheduled to begin in September 2019.
- 13. SW 336 St/Davis Pkwy from SR 997/Krome Avenue to US 1 This project is currently in the design phase. Construction is scheduled to begin September 2019.
- 14. SR 9/Palm Drive from SR 997/Krome Ave to SR 5/US 1 This project is currently in the design phase. Construction is scheduled to begin in September 2019.

### **FDOT, District Six - State Transportation System and Major Projects**

### SR 25/US 27/Okeechobee Road Improvements

A Project Development and Environment (PD&E) study is being conducted for SR 25/US 27/Okeechobee Road from SR 997/Krome Avenue to NW 79<sup>th</sup> Avenue in order to identify feasible improvements along the corridor. Major improvements are needed to address operational, safety and capacity deficiencies along the corridor at the access points. With these improvements, it is envisioned that, corridor operations and level of service will be improved, throughput along the corridor will be increased and efficient transfers between modes will be provided which is critical to Florida's economy and sustained growth.

Based on findings from the PD&E, five segments have moved forward into the Design Phase. The following corridor improvements on SR 25/Okeechobee Road include:

- West of Krome Avenue to East of NW 117<sup>th</sup> Avenue Widening, capacity improvements, milling and resurfacing, as well as including a frontage road on the north side of the said limits.
- East of NW 117<sup>th</sup> Avenue to East of NW 107<sup>th</sup> Avenue Full reconstruction to provide concrete pavement, correct geometric and operational deficiencies, and widening of the existing roadway and bridges for added capacity.
- East of NW 107<sup>th</sup> Avenue to East of NW 116<sup>th</sup> Way Full reconstruction to provide concrete and rigid pavement, widening of bridges at NW 121<sup>st</sup> Avenue and NW 116<sup>th</sup> Way over Miami (C-6) Canal, design of two braided ramps under SR 25/Okeechobee Road to connect with NW South River Drive and Frontage Road.
- East of NW 116<sup>th</sup> Way to East of NW 87<sup>th</sup> Avenue Full reconstruction to provide rigid pavement, grade separation of bridges over 87<sup>th</sup> Avenue, design of left turn lanes flyover bridges from Southbound NW 87<sup>th</sup> Avenue to Eastbound Okeechobee Road and from Northbound NW 87<sup>th</sup> Avenue to Westbound Okeechobee Road, a construction of a new bridge at NW 106 Street over the Miami (C-6) Canal, and the realignment of NW 103<sup>rd</sup> Street and the frontage road within the project limits.
- East of NW 87<sup>th</sup> Avenue to NW 79<sup>th</sup> Avenue Full reconstruction to provide road using rigid pavement, widening of SR 25/Okeechobee Road to four lanes on both approaches, modify the intersection of NW 95<sup>th</sup> Street and Frontage Road, widen NW 79<sup>th</sup> Avenue bridge of Miami (C-6) Canal, and provide new access from Frontage Road to Westbound Okeechobee Road.

For information visit: www.fdotmiamidade.com/okeechobeeroadstudy.

### **I-395 Corridor Improvements**

This project involves the rebuilding of the Interstate 395 (I-395) corridor from its terminus at the west of the I-95/Midtown Interchange (I-95/State Road 836/I-395) to its corridor terminus at the West Channel Bridges of US 41/MacArthur Causeway, approximately 1.4 miles. I-395 is a major east-west connector serving Miami Beach and the Port of Miami. Proposed improvements include: (1) Building new elevated ramps (one eastbound and one westbound) that will provide direct linkage between I-95 and I-395. (2) Increasing capacity and improving safety by alleviating existing operation and geometric deficiencies. (3) Creating a signature bridge over Biscayne Blvd. (4) Building vertically higher structures that will improve the visual quality of the bridge and streetscape. (5) Improving the area underneath the expressway by providing pathways and common activity areas. For information about the construction schedule or related information, visit: <a href="https://www.fdotmiamidade.com/design-projects/expressways/sr-836i-395-from-west-of-i-95-to-the-macarthur-cswy-bridge">www.fdotmiamidade.com/design-projects/expressways/sr-836i-395-from-west-of-i-95-to-the-macarthur-cswy-bridge</a>.

#### Golden Glades Multi-Modal Terminal

Located in northern Miami-Dade County, adjacent to city of Miami Gardens, North Miami Beach, North Miami and the Golden Glades Community. The center will consolidate the existing bus transit services at Golden Glades into a single facility adjacent to the Tri-Rail Station. The new multi-bay bus terminal facility will include upgraded sidewalks, walkways, platforms, bus bays and all improvements related to transit operations, including internal roads, drainage, lighting systems, fencing, internal directional and traffic control signage. The center will feature a multi-story parking garage surface parking lots. Additionally, the center will provide spaces for scooters and motorcycles. Other amenities will include bicycle parking and lockers. The complex will also feature a transit hub, retail space, and a break lounge for bus drivers. For information about the construction schedule or related information, visit: www.fdotmiamidade.com/golden-glades-multimodal-transportation-facility-and-truce-reevaluation.

### SR 826/Palmetto Expressway From I-75 to Golden Glades Interchange

Based on the results of the alternatives analysis as well as input received from the public for the SR 826/Palmetto Expressway from I-75 to Golden Glades Interchange project, FDOT identified a Recommended Alternative for the mainline of the east-west corridor of the Palmetto Expressway and for each interchange along the corridor including the Golden Glades Interchange (GGI). The Recommended Alternative improvements includes:

- Reconstruction and widening of the SR 826/Palmetto Expressway mainline to include three 12-foot general purpose lanes in each direction. (See Figure 1-1).
- A single 12-foot auxiliary lane would be added in each direction between interchanges. This is expected to improve traffic safety and operations.

### FDOT, District Six - State Transportation System and Major Projects

- Two express lanes in each direction. The express lanes would be separated from the general purpose lanes by a 4-foot buffer.
   At the western and eastern project limits, the express lanes transition from two lanes to one with a connection to the planned SR 826 North-South Express Lane System and a direct connect ramp to I-95 Express at the Golden Glades Interchange.
- Express lane connections. The recommended alternative for the express lanes access points includes one ingress and two egress points in the NB/EB direction and two ingress and one egress points in the WB/SB direction. Access to and from the express lanes would typically be via slip ramps to/from the general purpose lanes. Direct connect ramps will be provided at the GGI (See Figure 1-2).
- Several existing interchanges are proposed to be modified including the Golden Glades Interchange. In addition, interchange modifications are proposed for NW 154th Street, NW 67th Avenue, NW 57th Avenue, NW 47th Avenue, NW 37<sup>th</sup> Avenue, NW 27th Avenue, NW 17th Avenue, and NW 12th Avenue. With the exception of NW 154th Street, all SR 826/Palmetto Expressway overpass bridges will be replaced and the SR 826/Palmetto Expressway mainline will be raised to satisfy current FHWA standards for vertical clearance over cross streets.
- The project is expected to include a new storm water drainage system to satisfy South Florida Water Management District water quantity and quality requirements.

### **Resurfacing Projects**

The following are major resurfacing projects in Miami-Dade County:

### SR 9A/I-95 Pavement Reconstruction

The I-95 Pavement Reconstruction project will reconstruct 3.04 miles of I-95 mainline Concrete Pavement from just north of NW 29<sup>th</sup> Street to just north of NW 79th Street. In addition, the project will include construction of Emergency Stopping Sites (ESS) or "pull-off" areas in the Express Lanes by creating wider median shoulders at 5 locations between NW 62nd St. and NW 131st St. The pavement for ramps connecting I-95 to local streets and other SIS corridors will be improved. The project also includes traffic railing improvements to four bridges, approach slab replacement for 22 bridges, drainage system repairs and ITS improvements. Construction is scheduled to begin by Spring 2017 and be completed in early 2020.

This I-95 Pavement Reconstruction project will renovate and modernize the pavement structure in the vital I-95 SIS corridor and help capitalize on the opportunities afforded by the opening of the Port of Miami Tunnel to increase the safety and efficiency of freight utilization of the corridor while also improving the service life of the impacted roadway infrastructure. For information about

### **FDOT, District Six - State Transportation System and Major Projects**

the construction schedule or related information, visit: <a href="http://www.fdotmiamidade.com/current-projects/expressways/sr-9ai-95-from-nw-29-st-to-nw-131-st">http://www.fdotmiamidade.com/current-projects/expressways/sr-9ai-95-from-nw-29-st-to-nw-131-st</a>.

### Below is a sampling of resurfacing projects included in the 5-year Work Program.

Roadway	Project Area
SR 5/US-1/ South Dixie Hwy	From north of SW 184 Street to south of SW 168 Street
SR 25/Okeechobee Road	From west of SE 7 Avenue to north of NW 36 Street
SR 94/Kendall Drive	From SW 102 Avenue to east of SW 97 Avenue
SR 7/US 441/NW 7 Avenue	From NW 119 Street to south of Biscayne Canal
SR 94/Kendall Drive	From SW 7500 Block/SW 73 Place to US 1/South Dixie Hwy
SR 925/NW 3rd Court & NW 3rd Avenue	From NW 1st Street to NW 8th Street
SR 5/US-1/South Dixie Hwy	From east of SR 9/SW 27 Avenue to SR 9A/I-95

### **Other Major Corridor Improvements**

The following are major corridor improvement projects in Miami-Dade County:

SR 847/NW 47th Avenue From SR 860/NW 183rd Street to Premier Parkway (Broward)

The 2.3 mile segment of SR 847/NW 47th Avenue from north of SR 860/NW 183rd Street/Miami Gardens Drive (Miami-Dade County) to Premier Parkway (Broward County). The preferred alternative from the PD&E phase will reconstruct the existing two-lane rural roadway to provide a four-lane divided urban roadway in order to accommodate projected traffic growth in the area. Design phase has begun and is anticipated to be completed in March 2017. Construction is anticipated to begin in January 2018.

SR 968/SW 1st Street at Miami River Bridge # 870660

The existing SW 1<sup>st</sup> Street bascule bridge is a low-level bascule (movable) bridge spanning the Miami River and carrying the eastbound lanes of a one-way pair facility that comprises Flagler Street (westbound lanes) and SW 1<sup>st</sup> Street. The purpose of the project is to replace the existing bascule bridge. The PD&E Study for this project was completed and Location Design Concept Acceptance was granted in December 2013. The project is currently in the Design phase. The construction is anticipated to commence in August 2018. For information about the construction schedule or related information, visit: www.fdotmiamidade.com/design-projects/south-miami-dade/sr-968sw-1-st-from-sw-6-ave-to-sw-2-ave.

### **Intelligent Transportation System (ITS) Program**

The Florida Department of Transportation's District Six Transportation Systems Management and Operations (TSM&O) Program uses innovative and advanced technologies to manage the state's roadway systems in Miami-Dade and Monroe Counties.

Traffic operators at the District's SunGuide® Transportation Management Center (TMC) monitor traffic flow in real-time, deploy emergency personnel to clear incidents and post traveler information to keep drivers informed.

These activities form the Program's traffic management, incident management and traveler information services that work to enhance the efficiency of our existing systems to reduce congestion and promote safety 24 hours per day, 7 days per week.

The latest annual report shows the Program reduced travel delays by 44% since 2005 and saved drivers approximately \$3.2 billion dollars in travel delay-related costs. It also achieved its highest return on investment to date, with a benefits to cost ratio of \$57.96 for every \$1 invested in the Program. As a result, FDOT District Six remains committed to advancing TSM&O strategies in our community to benefit all drivers.

### **Bicycle/Pedestrian Corridor Improvements**

The bicycle/pedestrian network is a component of the overall transportation system. The Department evaluates bicycle & pedestrian improvements in conjunction with all capacity and resurfacing projects. Bicycle & pedestrian projects are also implemented by local agencies, who oversee construction and management. In addition, some projects are funded through the federally funded Transportation Alternatives Program (TAP) or state funded Shared Use Non-motorized (SUN) Trail Program.

The Florida Department of Transportation (FDOT) makes use of its expertise in efficiently providing transportation projects to develop a statewide system of paved non-motorized trails as a component of the Florida Greenways and Trails System (FGTS), which is planned by the Florida Department of Environmental Protection (FDEP). The Safe Routes to Schools (SRTS) program integrates safety, traffic relief, health, environmental awareness and physical activity and fitness under one program focusing on school zones. The budget for TAP, SRTS projects in the FY 2018 – 2022 Work Program, are \$36.3 million and \$6.3 million dollars respectively.

Below is a snapshot of bicycle/pedestrian projects included in the FY 2018 - 2022 Work Program.

Project Segment	Project Type	Project Area				
Town of Cutler Bay	Sidewalk	Manta Drive Roadway Improvement Project				
Town of Miami Lakes	Bike Lane/Sidewalk	Sidewalk Improvements				
City of Miami	Bike Lane/Sidewalk	South Miami Avenue from SW 10 Street to SW 9 Street				
Safe Routes to School Pedestrian Safety/Improvements		Florida City Elementary and Robert R. Moton Elementary, Bunche Park Elementary, Miami Gardens Elementary, Myrtle Grove K-8 & Twin Lakes Elem., Carrie Meek/Westview, Flagami Elementary, H.O. Sibley K-8 & Shadowlawn Elementary, Arch Creek Elem., E. M. Hartner Elem., Lakeview Elem, N. Miami Elem., Jose de Diego Middle School				
SUN Trail	Bike Lane/Sidewalk	Underline Segment A Phase II from SW 13 Street to SW 19 Avenue				
City of Hialeah	Bike Lane/Sidewalk	West 4th Ave Sidewalk & Guardrail Improvements				
City of Coral Gables	Bike Lane/Sidewalk	Alhambra Circle Bike Lanes				
City of Miami Beach	Bike Lane/Sidewalk	North Beach Corridor- Various Bike Path Links, ADA Access, and Sidewalks				

### **Complete Streets Projects**

The Florida Department of Transportation's (FDOT) Complete Streets Policy, adopted in September 2014, promotes safety, quality of life, and economic development in Florida. It states that FDOT will routinely plan, design, construct, reconstruct and operate a context-sensitive transportation network that works for all modes of travel.

FDOT developed this Complete Streets Implementation Plan in partnership with the national not-for-profit organization Smart Growth America to guide the Department's efforts to implement the Complete Streets Policy moving forward. The recommendations in this plan, summarized below, address the findings from a series of interactive workshops conducted for FDOT's Complete Streets Implementation Team in the spring and summer of 2015. This plan outlines a five-part implementation framework and process for integrating a Complete Streets approach into FDOT's practices to ensure that future transportation decisions and investments address the needs of all users of the transportation network and respond to community goals and context. This plan also proposes a two-year schedule and process for Complete Streets Implementation, concluding in December 2017. The implementation framework in this plan includes: (1) Revising guidance, standards, manuals, policies, and other documents; (2) updating decision-making processes; (3) modifying approaches for measuring performance; (4) managing internal and external communication and collaboration during implementation; (5) providing ongoing education and training. The following are complete street projects from the Work Program:

#### SR 907/Alton Road from 43 Street to east of Allison Road

This project is currently in the Design phase and entails a full roadway reconstruction of Alton Road from 43<sup>rd</sup> Street to east of Allison Road. The project will improve the on-street parking and will add shared bicycle lane pavement markings. Pedestrian ramps and sidewalks will also be upgraded to current standards. There will be roadway drainage, signalization and lighting improvements, signing and pavement markings and a new landscape and irrigation design. This project will enhance safety and drainage throughout the corridor. The project is anticipated to begin construction in April 2020 and will cost approximately \$24 million dollars.

Below is a selection of other complete streets projects included in the 5-year Work Program.

Project Segment	Project Type	Project Area
SR 7/NW 7 Avenue	Resurfacing	From N of NW 79 Street to Little River Drive
SR 924/NW 119 Street	Bike Lane/Sidewalk	From I-95 to West Dixie Highway
SR 7/US 441/NW 7 Avenue	Resurfacing	From NW 119 Street to south of Biscayne Canal
SR 7/US 441/NW 7 Avenue	Resurfacing	From Little River Drive to south of NW 117 St

### **Public Transportation Projects**

Travel options are critical in an area such as Miami-Dade County. The Department works with the Miami-Dade TPO, Miami-Dade Transit (MDT), Miami-Dade Aviation, Port of Miami, and the South Florida Regional Transportation Authority (SFRTA) to implement multiple projects. The following are public transportation projects from the Work Program:

### State Transit Block Grant to MDT for Operating Costs

This grant provides operating assistance for MDT's Fixed Route Bus Service. The Metrobus fixed route bus service is run by MDT and operates seven days a week, 24 hours per day. A total of 93 routes comprise MDT's regular bus service structure which are served by a total fleet of 847 buses and two contracted routes with seven buses. Metrobus includes local, feeder, circulator, limited-stop, express, and Bus Rapid Transit (BRT) Arterial Busway services. The FDOT provides 50% State Participation Rate for this program.

#### **NW 27 Avenue Premium Transit Corridor**

A PD&E study is being conducted to evaluate the implementation of a premium transit service (BRT, Light Rail Transit, and other appropriate transit technologies) along NW 27th Avenue from NW 215th Street (Countyline Road) to approximately NW 38th Street and from the Miami Intermodal Center (at Miami International Airport) to NW 27th Avenue via SR 112 Expressway. The study focuses on implementation of a premium transit service and infrastructure along SR 9/SR 817/NW 27th Avenue. The study will also include public on-street transit stations/stops as well as public and/or private facilities located adjacent to or off-corridor where potential park-and-ride and/or transit terminals (including the Miami Dade College North Campus) will be considered. The study will consider public and private station/stop facilities, new or upgraded park-and-ride locations, and transit terminals.

### Flagler Street Premium Transit Corridor

A PD&E study is being conducted to evaluate the implementation of rapid transit along SR 968/Flagler Street. This study focuses on multimodal street improvements to accommodate rapid transit service along Flagler from SW/NW 107th Avenue to the Government Center with branches along SW 8th Street and NW 12th Street. Rapid Transit modes to be evaluated include Enhanced Bus Service (EBS) Transit in mixed traffic as well as Bus Rapid Transit (BRT) on exclusive or reversible lanes. FDOT met with the community through three Project Corridor Workshops held in November 2016 to discuss and obtain their feedback on the proposed improvements along the corridor. Fifteen alternative concepts were presented and input solicited as to preferences on configuration, service, and amenities.

Based on feedback from the community and analysis from collected data, a set of the three most attractive and potentially viable alternatives have been identified. These alternatives are being evaluated in details for presentation at the Alternatives

### **FDOT, District Six - State Transportation System and Major Projects**

Workshops, leading to selection of the recommended alternative. Funding options, including Federal Transit Administration (FTA) will be evaluated.

### **Kendall Drive Premium Transit Corridor**

A PD&E study is being conducted to evaluate implementation of a premium transit service (BRT, Light Rail Transit, and other appropriate transit technologies) primarily along SR 94/SW 88<sup>th</sup> Street/Kendall Drive between Dadeland North Metrorail Station and SR 997/Krome Avenue, along SR 874 and SR 878 from Kendall Drive to the Dadeland North Metrorail Station, and potentially north along the Homestead Extension Florida's Turnpike from Kendall Drive to FIU (at the proposed Panther Station) and/or to the proposed Dolphin Station (at SR-836). This study focuses on multimodal street improvements to accommodate rapid transit service, as well as walking and bicycle trips, along Kendall Drive. The study will evaluate various options for transit service - mode, station stop locations, signalization for transit, use of exclusive lanes, etc. Kendall Drive will serve as the primary premium transit running way via exclusive arterial transit lines but will also include other roadways and expressways connecting to Kendall Drive for accommodating branched transit routes. The study will also include public on-street transit stations located along various running ways as well as potential park-and-ride and/or transit terminal locations.

### A sampling of other public transportation projects from the Work Program includes:

Rail	Aviation
Passenger and Freight Rail Safety Projects	MIA Concourse E Satellite Improvements
Railroad Crossing Surface Rehabilitation Projects	MIA Concourse E Satellite APM
Miami Dade County Quiet Zone around Florida East Coast Railroad	MIA A380 Gates D2
Seaport	Opa-Locka Airport (OPF) Rehabilitation of Flexible Pavement
Improvements to Cruise Terminals B,C,D,E,F,G,H, and J	

### **Freight Overview**

FDOT District Six is home to many diverse communities with unique transportation needs, highlighted with some of the state's leading freight facilities and international trade gateways, including Miami International Airport and PortMiami. Significant investments have been made to compete for new cargo opportunities stemming from the expansion of the Panama Canal, increased use of the Suez Canal, and growing North/South trade. These investments in freight mobility both internationally and in Miami will generate demand for new capacity of regional warehouses, distribution centers, cold treatment facilities, and foreign trade zones, and truck parking facilities.

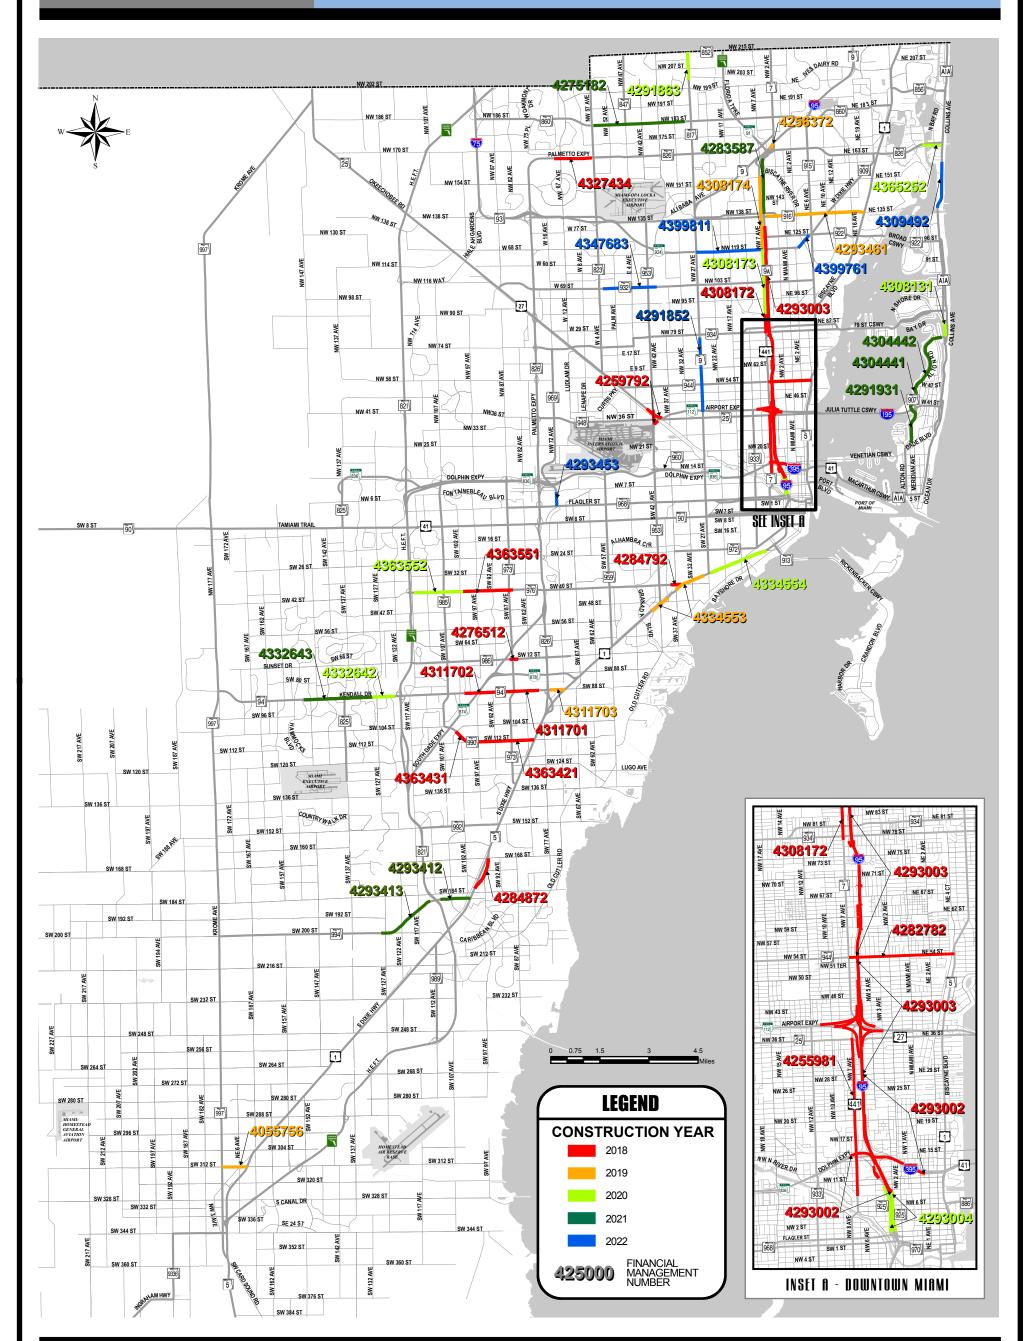

With an anticipated doubling in cargo activity handled at PortMiami, Port Everglades, and Miami International Airport (MIA), these investments will be critical. In response, it is critical that District 6 and industrial based communities identify and invest in infrastructure improvements to position themselves for economic development and growth in cargo. Key developments and tools should be incorporated such as ITS/technologies, truck parking needs, economic impact analyses, innovative funding programs, and land use and redevelopment opportunities – helping market these industrial based communities as competitive global logistics service center.

District 6 has identified a strategy to help advance its freight and logistics system focused on partnering with local communities to develop subarea freight plans; these freight focused plans will help identify freight mobility strategies at the project level. The Town of Medley, one of the leading freight hubs in Miami-Dade County and South Florida, was selected to be the first community to go through this process. Medley has long been a leader as an industrial center providing service to PortMiami, Port Everglades, MIA, Florida East Coast (FEC) Railway, and the South Florida business community. With access to SR 826, I-75, Florida's Turnpike, and U.S. 27, and connections with the region's major freight activity centers, Medley is accessible to local, regional, and state markets.

These planning level studies will assess freight accessibility to and from each sub-area and will develop strategies to enhance access and improve freight mobility. The table below lists all the sub-area freight planning efforts currently underway in District 6. The Miami River Freight Improvement Plan is unique amongst the sub-area freight planning efforts as it does not focus on a specific town or city. Instead, this study will develop viable options to improve intermodal freight movement and assess the potential of short sea shipping along the Miami River.

FREIGHT PLANNING EFFORTS						
TOWN OF MEDLEY FREIGHT PLAN	MIAMI RIVER FREIGHT IMPROVEMENT PLAN					
OPA-LOCKA FREIGHT IMPLEMENTATION PLAN	DORAL FREIGHT IMPROVEMENT PLAN

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing Florida's Turnpike Enterprise

### Fiscal Years 2017/2018 to 2021/2022 Transportation Improvement Program

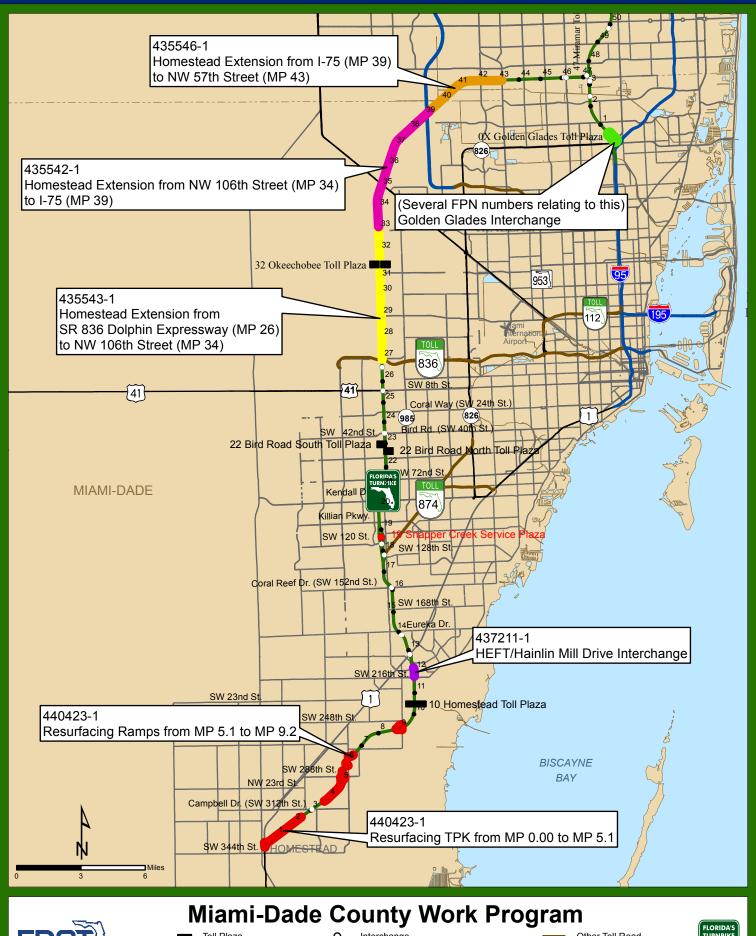

### Florida Department of Transportation, Florida's Turnpike Enterprise

Florida's Turnpike Enterprise is an agency of the Florida Department of Transportation, overseeing a 483 mile system of limited access toll highways. The Turnpike Mainline reaches from North Miami to a junction with Interstate 75 in north central Florida. The Mainline extends through the counties of Miami-Dade, Broward, Palm Beach, Martin, St. Lucie, Indian River, Okeechobee, Osceola, Orange, Lake and Sumter. The Turnpike System includes the 47 mile Homestead Extension in Miami-Dade and Broward Counties; among other facilities statewide.

Florida's Turnpike is a user-financed system that uses toll revenues, service plaza sales revenue, and bonds to pay for new construction and maintenance of the entire system. The Turnpike does not receive traditional gas tax revenue.

### **Miami-Dade County Turnpike Planned Projects**

- > Widen 17 miles of Homestead Extension (SR 821) in Miami-Dade County
  - o From SR 836 to NW 106<sup>th</sup> Street (6 to 10 lanes including express lanes)
  - o From NW 106th Street to I-75 (6 to 10 lanes including express lanes)
  - o From I-75 to NW 57<sup>th</sup> Street (6 to 10 lanes including express lanes)
- > Interchange improvements at the following locations:
  - o Golden Glades Interchange
  - o Campbell Drive Interchange
  - o HEFT/Hainlin Mill Drive
- Turnpike resurfacing projects:
  - o From Milepost 0.0 to Milepost 5.1
  - o Ramps from Milepost 5.1 to Milepost 9.2

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Miami-Dade Expressway Authority (MDX)

### Fiscal Years 2017/2018- 2021/2022 Transportation Improvement Program

#### **MOVING MIAMI-DADE**

**Miami-Dade Expressway Authority (MDX)** 

This section of the TIP focuses on mobility improvement projects which the Miami-Dade Expressway Authority (MDX) has programmed over the next five years. MDX is an agency of the state of Florida, created in 1994 pursuant to Chapter 348, Part I, Florida Statutes, for the purposes of and having the power to acquire, hold, construct, improve, maintain, operate, own and lease an expressway system located in Miami-Dade County. The Authority may also fix, alter, change, establish and collect tolls, rates, fees, rentals, and other charges for the services and facilities of such system and is further authorized to issue bonds. MDX is reported as an Independent Special District of the State of Florida and subject to the provisions of Chapter 189, Florida Statutes (Uniform Special District Accountability Act of 1989) and other applicable Florida Statutes.

MDX currently oversees, operates and maintains five tolled expressways constituting approximately 33.6 centerline-miles and 223.9 lane-miles of roadway in Miami-Dade County, Dolphin Expressway (SR 836); Airport Expressway (SR 112); Don Shula Expressway (SR 874); Gratigny Parkway (SR 924) and the Snapper Creek Expressway (SR 878) and has jurisdiction over NW 138<sup>th</sup> Street. MDX's Mission is to "serve as an innovative transportation agency dedicated to the enhancement of mobility in Miami-Dade County".

This section provides an overview of the following topics:

- The MDX Five-Year Work Program
- The Work Program Cycle
- Programs and Funding
- Existing System Improvement Projects
- System Expansion Projects
- Facility Improvement Projects
- New Toll Expressway Projects

#### The Miami-Dade Expressway Authority's Five Year Work Program

The Five-Year Work Program identifies and prioritizes projects that MDX anticipates funding during the next five years. Funding for these projects may be total or partial depending of the phase of the project and the availability of funds. As such, changes are made on an annual basis as priorities are re-evaluated, projects are completed, new projects are identified and the financial

capabilities of MDX evolve. The Five-Year Work Program is an important tool used by MDX to effectively manage its program of System preservation, expansion and improvements.

#### **The Work Program Cycle**

In the summer of 2016 MDX began the new cycle to develop the "Tentative" Work Program for Fiscal Years (FY) 2018 - 2022. In November 2016 MDX participated in a public review meeting with FDOT and FTE and provided information for projects to be included in its tentative work program. The final program was presented to the Operations Committee for endorsement and to the MDX Board for approval in accordance with the MDX Budget Policy.

### **Program and Funding**

#### **Program Description**

MDX's Transportation Improvement Program includes expansion of, as well as capacity improvements to, the MDX highway system, planning projects geared towards improving mobility in Miami-Dade County and implementation of Intelligent Transportation and Open Road Toll Collection Systems.

#### Funding Overview

MDX's primary source of revenue is the tolls collected on its five expressways which are reinvested in Miami-Dade County to improve mobility and offer transportation choices within the county. MDX borrows money to fund its projects by selling bonds and uses the toll revenues as collateral. Like a mortgage loan where collateral is offered to the bank to secure the loan until fully paid, MDX offers the projected revenues as assurance that the bond's principal and interest will be paid. MDX does not receive any gas tax, property tax, sales tax or any other source of revenue.

Projects included in the MDX FY 2018 - 2022 TIP are highlighted within the following pages. The projects have been organized by the following categories: Existing System Improvements, System Expansion, Facility Improvements, and New Toll Expressway.

#### **Existing System Improvement Projects**

The following projects are categorized as Existing System Improvements in the current Five-Year TIP and include widening or reconstruction within an existing roadway segment:

#### Project 11212 – SR 112 Ramp Improvements at NW 37th Avenue

New partial interchange at SR 112 and NW 37<sup>th</sup> Avenue that provides new movements including an eastbound on-ramp and a westbound off-ramp at NW 37<sup>th</sup> Avenue. This project provides additional access to industrial hub as well as opening the commercial area to the expressway system and improving access to the Miami Intermodal Center (MIC). The Planning phase is anticipated to being in FY 2018 followed by the design and construction from the end of FY 2019 to FY 2021.

#### Projects 83611 – SR 836/I-95 Interchange Improvements

MDX will partner with FDOT to acquire right-of-way, design and build the SR 836 improvements from NW 17<sup>th</sup> Avenue to I-95 in conjunction with the I-395 project. Improvements include widening and operational improvements to SR 836 eastbound from NW 17<sup>th</sup> Avenue to I-95 Interchange, widening of the SR 836 bridges over the Miami River and improvements to the SR 836 westbound mainline and new connector serving southbound I-95 traffic destined westbound on SR 836 and to the Civic Center. Design-build is anticipated to start late FY 2017.

#### Project 83628 – SR 836 Operational, Capacity and Interchange Improvements

Additional eastbound and westbound lane on SR 836 from west of NW 57<sup>th</sup> Avenue to NW 17<sup>th</sup> Avenue as well as improvements to the SR 836/NW 57th Avenue Interchange, the SR 836 / LeJeune Interchange, the SR 836 / NW 27th Avenue Interchange and the SR 836/NW 17<sup>th</sup> Avenue Interchange will provide additional capacity on the mainline and improve operations in and around the existing interchanges resulting in an improved level of service and safety. This project includes inside shoulder modifications to facilitate Express Bus service by Miami-Dade County. The design build for this project is underway with an anticipated completion date of early FY 2019.

#### Project 83629 – SR 836 Interchange Modifications at 87th Avenue

The current Five-Year Work Program provides funding for the reconstruction of the SR 836 Mainline and NW 87<sup>th</sup> Avenue interchange to enhance operations and improve safety on the SR 836 corridor. This project ties into MDX completed SR 836 Extension project to the west and MDX SR 836/SR 826 Interchange Improvement project currently under construction on the east. Construction of the modifications at 87<sup>th</sup> Avenue is underway with an anticipated completion date of early FY 2019.

#### Project 83634 – SR 836 New Homestead Extension of Florida's Turnpike (HEFT) Ramp Connections

New ramps from eastbound SR 836 to northbound HEFT and southbound HEFT to westbound SR 836. These ramps were originally contemplated to be part of MDX's SR 836 Southwest Extension (83618) project which is currently in the PD&E phase. In light of the Florida's Turnpike Enterprise (FTE) advancing the construction of their project to alter the current interchange and HEFT mainline configuration, MDX is accelerating the MDX ramps through this project. This allows MDX to work with FTE on a unified interchange project that will yield significant efficiencies and eliminate future throwaway costs. The ramps will provide missing traffic movements within the SR 836/HEFT interchange and facilitate access to future transit facilities. Design-build is anticipated to begin in FY 2018.

#### Project 87413 – SR 874/SW 72 Street Interchange

Partial interchange at SR 874 and SW 72<sup>nd</sup> Street to provide access to SR 874 and the highway system connected to SR 874 and to reduce congestion at key intersections along SW 72<sup>nd</sup> Street. Design-build is anticipated to begin in FY 2020.

### Project 92408 – SR 924 Partial Interchange at NW 67th Avenue

New westbound on-ramp and off-ramp at NW 67<sup>th</sup> Avenue and new eastbound on-ramp from NW 67<sup>th</sup> Avenue. This partial interchange will provide congestion relief to Miami Lakes and Hialeah by providing additional traffic movements at SR 924 and NW 67<sup>th</sup> Avenue. Design-build is anticipated to begin in FY 2019.

#### **System Expansion Projects**

The following projects are categorized as System Expansions in the current Five-Year TIP and include all construction of new roadway segments on new alignments adjacent to the existing system that will increase the total centerline miles of the system:

#### Project 83618 – SR 836 Southwest Extension

MDX is evaluating the feasibility of a new 15-mile expressway extension of SR 836 from NW 137<sup>th</sup> Avenue to the southwest Kendall area. The extension of SR 836 is envisioned as a multimodal facility, used also by express transit buses that would address the existing transportation needs of a vast community of thousands of existing residents living in the south western areas of Miami-Dade County west of the Turnpike. The Project Development & Environmental (PD&E) study is ongoing to determine feasibility and select a preferred alternative. Final design and construction for this project are not yet funded.

#### Project 87410 - SR 874 Ramp Connector to SW 128th Street

New 1.2-mile ramp connection from SR 874 to SW 128<sup>th</sup> Street. A portion of this project is currently being constructed by the Florida's Turnpike Enterprise under an interagency agreement with MDX as part of a larger project to widen the HEFT and reconstruct the HEFT/SR 874 Interchange. The balance of the project is underway by MDX with completion anticipated in FY 2019.

#### Project 92404 -SR 924 Extension West to the HEFT

Expressway extension from the end of SR 924 west to the HEFT. MDX has completed the PD&E study for the 2.3-mile expressway extension and is now advancing the design-build of a segment from 107<sup>th</sup> Avenue to HEFT westbound direction and a segment from 97<sup>th</sup> Avenue to 107<sup>th</sup> Avenue eastbound and westbound direction, as well as the final design for the segment from the HEFT to 107<sup>th</sup> Avenue eastbound direction and 97<sup>th</sup> Avenue to SR 826 eastbound direction. The right-of-way acquisition for the parcels in the funded segments is underway. This project also includes a 1.6-mile section of NW 138<sup>th</sup> Street which has been reconstructed to a predominantly 6 lane section and is now in the jurisdiction of MDX. It also includes the construction of 107<sup>th</sup> Avenue from NW 138<sup>th</sup> Street to NW 170<sup>th</sup> Street to be funded 100% by Miami Dade County. The design build phase is anticipated to begin in FY 2020.

#### Project 92407 – SR 924 Extension East to I-95

The PD&E study is underway for a new 3.1-mile expressway extension of SR 924 east to I-95 and it's scheduled to be completed in FY 2017. The next phase, final design, is funded in this work program and anticipated to begin in FY 2020.

#### **Facility Improvement Projects**

The following projects are categorized as Facility Improvements in the current Five-Year TIP and designate all non-routine maintenance and minor roadway and toll plaza, toll and Intelligent Transportation System (ITS) projects throughout the system:

#### **Project 10021 – Systemwide ITS Improvements**

This project provides funding for implementation of ITS improvements identified in the updated MDX ITS Master Plan intended to maximize the existing roadway system through the use of technology.

#### **New Toll Expressways**

The following projects are categorized as New Toll Expressways in the Five-Year TIP and include construction of new alignments of designated State Roads that will be added to the system:

#### Project 20001 – Connect 4 Xpress

The PD&E study of a potential new expressway connecting SR 836, SR 112, SR 924 and SR 826 is anticipated to begin in FY 2019. The study will include evaluation of system interchanges with SR 112, SR 924 and SR 826 as well as potential service interchanges with NW 54<sup>th</sup> Street, NW 79<sup>th</sup> Street and NW 103<sup>rd</sup> Street with connectors to NW 37<sup>th</sup> Avenue. The Project Development is the only phase currently included in the Five-Year Work Program.

#### **Other**

#### Project 50001 – Dolphin Station Park & Ride

MDX is fast-tracking the construction of the Dolphin Station Park & Ride facility/terminal transit facility. FDOT together with Miami Dade Transit (MDT) are funding 100% of the project cost, except for the cost of the project management fees and material testing which is MDX's contribution. The facility will be operated and maintained by the Miami-Dade Department of Transportation and Public Works (DTPW). The Dolphin Station park & ride facility/terminal transit facility will support DTPW's SR 836 Express Bus Service, provide a terminus or stop for several local bus routes serving the Dolphin Mall and the cities of Sweetwater and Doral. The design-build phase is underway with anticipated completion in FY 2018.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Secondary Road Program

## Fiscal Years 2016/2017 - 2020/2021 Transportation Improvement Program SECONDARY GAS TAX PROGRAM

Miami-Dade County - Department of Transportation and Public Works

The program is divided into two distinct categories:

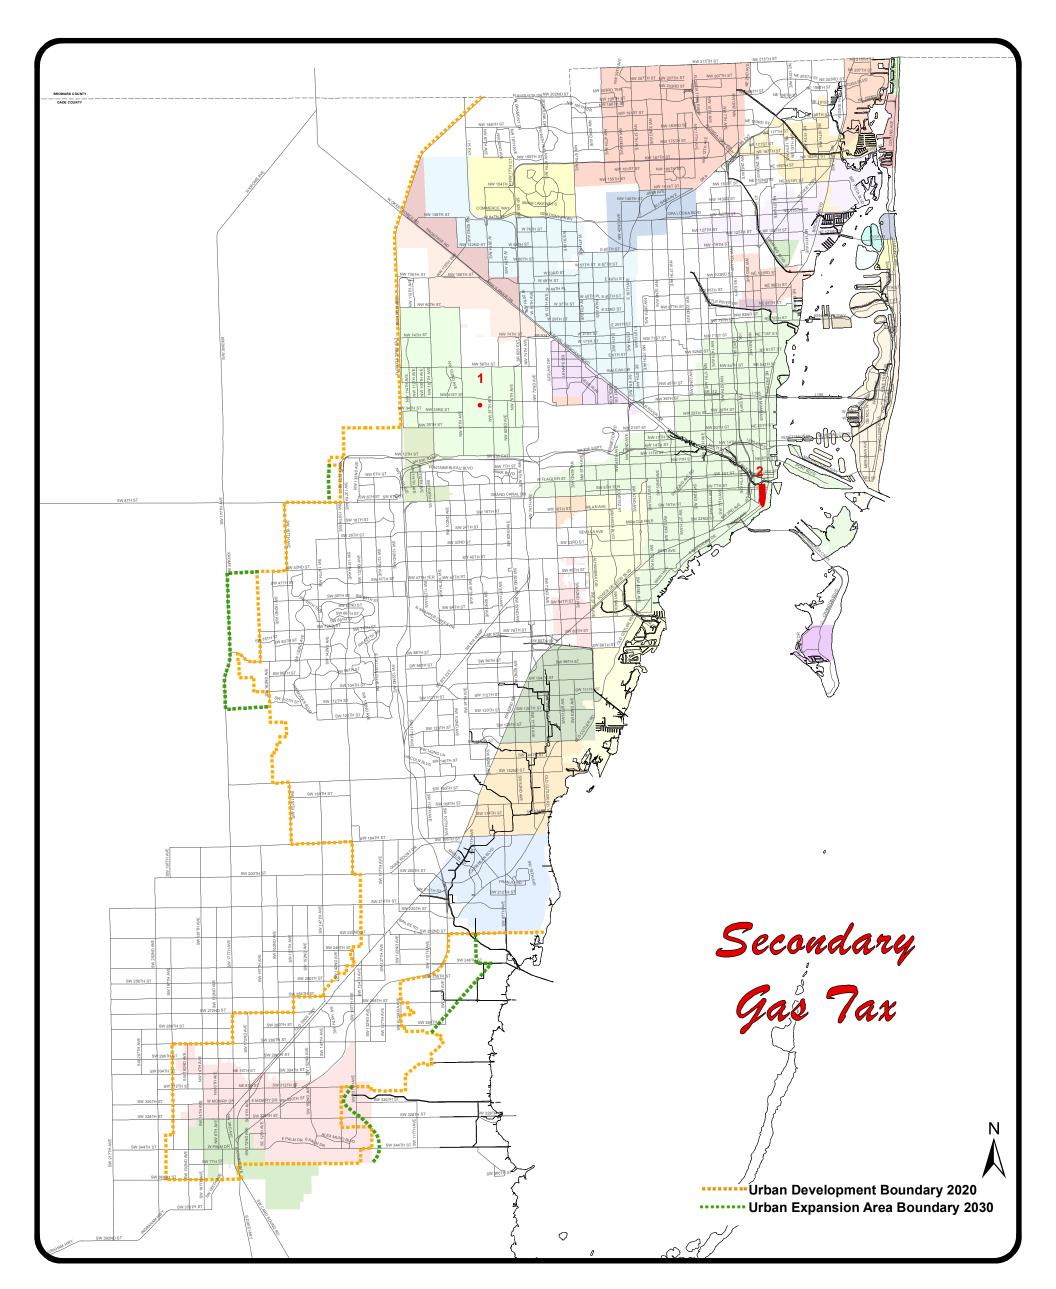

- o the first section includes all new road construction or rehabilitation projects; and,
- o the second section deals with the continuing projects that have fund allocations yearly.

### **Road Construction Projects**

- o SouthCom Pedestrian Bridge
- South Miami Avenue from SE/SW 15 Road to SE/SW 5 Street

### **Continuing Program Projects**

Bridge Repair and Painting	Beautification Improvements
Guardrail Safety Improvements	Pavement Markings Contracts
Railroad Crossing Improvements	Maintenance of Roads and Bridges
Street Lighting Maintenance	Traffic Control Devices (Equipment/Materials)
Special Taxing District	Local Grant Match for TPO
Pavement Markings Crew	Traffic Signal Materials
Capitalization of Traffic Signals and Signs Crew	Road and Bridge Emergency Bridge Repairs/Improvements/Painting
ADA Hotline Projects	Traffic Signals and Signs Right-of-Way
Secondary Gas-Road and Bridge Maintenance

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Road Impact Fee

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program ROAD IMPACT FEE

Miami-Dade County - Department of Transportation and Public Works

On December 6, 1988, the Board of County Commissioners adopted Dade County Road Impact Fee Ordinance No. 88-112, which provides for the fair share assessment of road impact fees on new building construction in Miami-Dade County, including municipalities. The County has been divided into nine road impact fee benefit districts. Fees collected within each district will be expended for roadway capacity improvements within each district.

Each district program includes four improvement categories: Road and Bridge Projects, Resurfacing, Traffic Operations Projects to Increase Capacity and Safety (T.O.P.I.C.S.), and Traffic Control Devices.

### **Road and Bridge Projects**

Capacity improvements along arterials and collectors

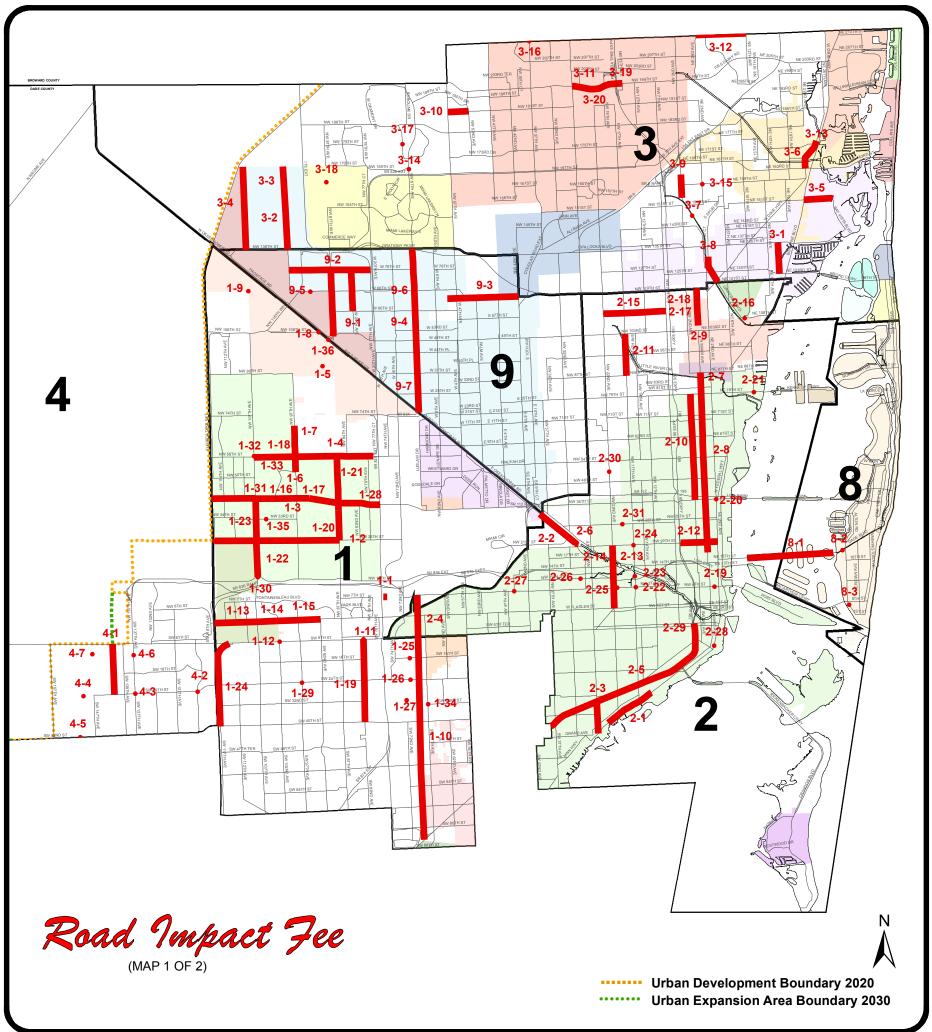

### **Continuing Program Projects**

### Resurfacing

Paving, widening, drainage, striping

**T.O.P.I.C.S.** (Traffic Operations Projects to Increase Capacity and Safety) Intersection Improvements

**Traffic Control Devices**Signalization

#### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Local Option Gas Tax

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

#### THREE CENTS CAPITAL IMPROVEMENT LOCAL OPTION FUEL TAX

#### Introduction

The Capital Improvement Local Option Fuel Gas Tax, authorized by Section 336.025 (1) (B), Florida Statutes became effective January 1, 1994. It was reduced from five cents to three cents on September 1, 1996. In accordance with state statute, proceeds of this tax have been programmed for transportation expenditures needed to meet the requirements of the capital improvement element of the adopted comprehensive plan.

#### FY 2017-18 Projected Municipal Distribution

The actual distribution to the municipalities for FY 2017-18 will be based on a weighted formula which accounts for percentage of population (statistics from the Bureau of Economic and Business Research, at the University of Florida) and the centerline mileage of municipal roadway for each incorporated area from the "2015 City/County Mileage Report" — Florida Department of Transportation prepared in the Spring of each year with data reported as of September 30, 2015. The figures contained herein were calculated using these same reports. This estimate for FY 2017-18 will be sent to the municipalities at the time the County files its official estimate with the Florida Department of Revenue in April 2017.

In FY 2017-18, the estimated net revenue for the Capital Improvement Local Option Gas Tax projected as of March 16, 2016 is \$26.757 million at 95 percent with \$6.957 million to be distributed to the municipalities and \$19.8 million to be distributed to the County (26 percent to the municipalities and 74 percent to the County according to the current interlocal agreements). The State of Florida is allowed to impose a 7.3 percent administrative fee. The FY 2017-18 estimates, reflects a minor decrease from the current year in fuel tax revenues.

#### **Three Cents Capital Improvement Local Option Fuel Tax**

#### **County Local Option Fuel Tax Transportation Projects**

The County reviews the Capital Improvement Local Option Fuel Tax distribution for the Department of Transportation and Public Works on an annual basis for the most effective use of this limited funding subject to legislative actions taken by the Board of County Commissioners and state statute (\$19.8 million).

#### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
People's Transportation Plan Improvements

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program PEOPLE'S TRANSPORTATION PLAN IMPROVEMENTS

Miami-Dade County - Department of Transportation and Public Works

On the November 5, 2002 ballot, voters approved the People's Transportation Plan (PTP), which provides for a half percent sales surtax to fund major transportation improvements.

The Citizens' Independent Transportation Trust (CITT), a group of citizens who function as an independent decision-making body, was created to oversee the construction and management of the PTP's 25-year, \$17 billion transportation plan. The Department of Transportation and Public Works (DTPW) has worked closely with the CITT to provide a wide range of roadway and neighborhood improvements.

The DTPW PTP Work Program for FY 2018 totals approximately \$37 Million. The plan includes the two categories from the PTP Ordinance that relate to the DTPW; major highway road improvements and neighborhood improvement projects.

#### **Major Highway Road Improvement Projects**

Major road and bridge projects under construction or scheduled to begin construction include, but are not limited to:

- SW 137 Avenue from H.E.F.T. to US-1
- SW 137 Avenue from US-1 to SW 200 Street
- NW 74 Street from H.E.F.T to State Road 826
- Caribbean Boulevard from Coral Sea Road to SW 87 Avenue
- NW 37 Avenue from North River Drive to NW 79 Street
- SW 216 Street from SW 127 Avenue to HEFT

#### **Neighborhood Improvement Projects**

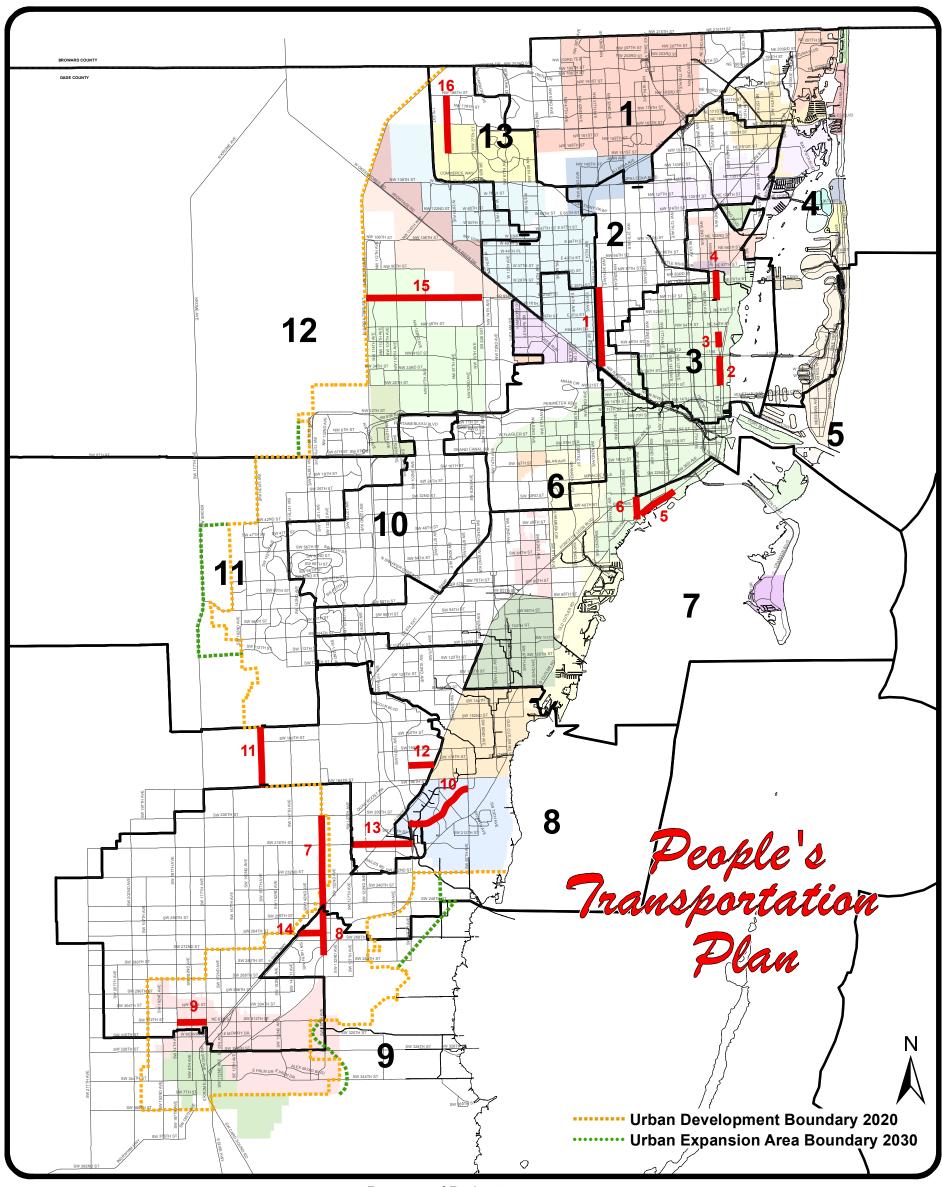

The DTPW, as part of the PTP, has been tasked with coordinating and constructing various categories of Neighborhood Improvement Projects.

#### Miami-Dade County - Department of Transportation and Public Works - People's Transportation Plan Improvements

To address the various non-site specific categories discussed in the PTP Ordinance, the Department created "The Neighborhood Improvement Projects Formula" to allocate funds. The formula takes into account population in the Unincorporated Municipal Service Area for each commission district, the needs as reported to the Department, and the percentage of maintained arterial and collector lane miles. A portion is then evenly distributed to each district. PTP Neighborhood Improvements include modifications of intersections, resurfacing of local and arterial roads, installation / repairs of guardrails, installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County or to the expansion, operation or maintenance of bus and fixed guideway system.

The Neighborhood Improvement Projects include:

- Site Specific Neighborhood Improvement Sites
- Non-Site Specific Neighborhood Improvement Sites
- Countywide Neighborhood Improvements
- School Flashing Signals Program

#### Program of Projects

#### Commission District 2

1. NW 37<sup>th</sup> Avenue from North River Drive to NW 79<sup>th</sup> Street

#### Commission District 3

- NE  $2^{nd}$  Avenue from NE  $20^{th}$  Street to NE  $36^{th}$  Street NE  $2^{nd}$  Avenue from NE  $42^{nd}$  Street to NE  $51^{st}$  Street
- NE 2<sup>nd</sup> Avenue from NE 69<sup>th</sup> Street to West Little River Canal

#### Commission District 7

- South Bayshore Drive from Darwin Street to Mercy Way
- SW 27th Avenue from US-1 to Bayshore Drive

#### Commission District 8

- SW 137th Avenue from US-1 to SW 200th Street SW 137<sup>th</sup> Avenue from HEFT to US-1 8.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

NOTE 1: PTP NEIGHBORHOOD IMPROVEMENTS Provided each Commission District with funds for Neighborhood Improvements in the categories listed below and according to an allocation formula based on population, reported needs and County-maintained road lane miles. DTPW continues to coordinate the Neighborhood Improvement Projects with County Commissioners' Offices based on their remaining allocation.

Improvement categories include: modifications of intersections; resurfacing of local and arterial roads; installation / repairs of guardrails; installation of school flashing signals, enhancement of greenways and bikeways, A.D.A. curb cuts / repairs, pavement markings, roadway lighting, traffic calming, traffic signals, and traffic sign replacement / repair. Such improvements also include replacement / repair of sidewalks, repair / installation of drainage and landscape beautification (including community image enhancements) related to the development, construction, operation or maintenance of roads and bridges in the County.

#### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Private Sector Improvements

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program PRIVATE SECTOR IMPROVEMENTS

Miami-Dade County - Department of Transportation and Public Works

Miami-Dade County Department of Transportation and Public Works is in charge of the Private Sector Improvements Program which addresses road improvement commitments to be made by private developers during the regional and local development approval process.

The improvements listed are necessary to help mitigate traffic impacts of specific large development projects such as Developments of Regional Impact (DRI) and other zoning requests reviewed by the Miami-Dade County Development Impact Committee (DIC) and approved by the Community Zoning Appeals Board (CZAB) or the Board of County Commissioners (BCC). These road improvement commitments are contained in County Commission zoning resolutions and/or documents proffered by development interests to the Commission. In some cases, especially DRI development orders, sketch drawings of the improvements are attached to these legal documents. The last column of the table in this section contains either the Commission Resolution Number or the official record book/page number associated with each improvement.

Unlike other parts of the TIP, the construction of improvements in this section are normally not linked to specific dates, but instead, are usually dependent upon the construction schedule of a specific development project, which can vary considerably according to the market and other conditions.

This section addresses road improvement commitments to be made by private developers as part of the land development process.

Airport Development

#### Fiscal Years 2017/2018 – 2021/2022 Transportation Improvement Program

#### **AVIATION ON-SITE IMPROVEMENTS**

#### **Miami-Dade County Aviation Department**

The Miami-Dade County Transportation Improvement Program includes capital improvements for the Aviation Department for the continued development of Miami International Airport and the General Aviation Administration Airports (GAA - OPF, TMB, X51 & TNT). The funding for this program is primarily from revenue generated by the Aviation Department and from Federal and State grants. Major projects at Miami-Dade County's airports include phases of the following:

	Dol	<u>lars in Million</u>
		(Funded)
MIA - Cc E & E Satellite Improvement	\$	385.00
MIA – E Satellite Passenger Loading Bridges (PLB)	\$	13.00
MIA - Perimeter Road Bridge Replacement	\$	22.00
MIA - MIA Taxiways T, S, R Rehabilitation and M5-Connector	\$	58.00
MIA - Cc H Gates Internationalization (H15 & H17) Phase 1	\$	33.80
MIA - Terminal E through F Connector	\$	12.90
MIA - Terminal E through F Life Safety Upgrades	\$	6.50
MIA - New Fuel Tank – 4 <sup>th</sup> Tank	\$	48.40
MIA - Upgrade Terminal PLBs & 400 HZ Pre-Conditioned Air	\$	24.60
MIA - South Terminal Apron and Utilities Modification and Expansion	\$	61.00
MIA - South and Central Terminal BHS Improvements	\$	203.00
MIA - Central Base Apron and Utilities Modification and Expansion	\$	86.00
MIA - Taxi Lot Replacement/Land Acquisition	\$	7.70
MIA - Airport Operations Center (AOC)	\$	12.00
GAA - X51 Security Projects	\$	1.50
GAA - X51 Runway 18/36 Connectors Rehabilitation	\$	1.70
GAA - X51 Runway 18/36 Rehabilitation	\$	0.75
GAA - OPF Rehab Apron Pavement	\$	1.86
GAA - OPF Internal Perimeter Road System	\$	2.00
GAA - OPF Engine Run-Up Pad	\$	2.80
GAA - TNT Power Distribution & Airfield Line Feeder	\$	0.50
GAA - TMB Internal Perimeter Road System	\$	4.00
GAA - TMB Taxiway D Connector Rehabilitation	\$	0.47
GAA – TMB Taxiways A & D Rehabilitation – TMB 04 RIM	\$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$ \$	4.00
TOTAL:	\$	993.48

NOTE: Planning Studies, Refurbishment, Environmental Clean Up, Water & Sewer, Roofing, Communications and Telecommunications Equipment, Fire Alarm and Life Safety Upgrades thought not Transportation Improvements, are however Capital Improvements.

# **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing Multimodal Seaport Development

# Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

**MULTIMODAL SEAPORT DEVELOPMENT** 

The Dante B. Fascell Port of Miami-Dade ("PortMiami")

# <u>Transportation Improvement Program Strategy</u>

PortMiami (Port) is known as the Cruise Capital of the World with more than 4.9 million passengers annually. As a cargo gateway center, the Port handles more than 1,000,000 TEU's annually. The Port's Transportation Improvement Program (TIP) is comprised of a total of \$152 million in funded projects over the next five years and reflects the Port's aggressive strategy of optimizing land use and enhancing throughput capacity to meet the demands of the cargo and cruise industries.

As part of the Capital Development Program, the Port is dedicated to meet and exceed industry demands by supporting the following Capital Improvement Projects:

- Site Preparation for Cruise Terminal A
- New Modern Cargo Gate System
- Cargo Container Yards Modernization for rubber tired gantry (RTG)
- Cruise Terminals Expansions
- Federal Inspection Station
- Additional Gantry Cranes

The Port continues to assertively seek grant funding from local, state and federal sources. In fiscal year 2017/2018; the TIP reflects support from the Florida Department of Transportation (FDOT) with \$19.3 million in support of cranes, cargo improvements and other infrastructure projects. This agency and the Port's partners continue to be part of the established goals to support the program and accommodate growth.

### **PortMiami Accomplishments**

#### Intermodal and Rail Reconnection

The Port and the Florida East Coast Railway (FECR) reintroduced the on-dock rail Sunshine Gateway service, connecting the Port to the Hialeah Rail Yard with links to the national rail system, which allows shippers to reach 70 percent of the U.S. population in less than four day.

#### The Dante B. Fascell Port of Miami-Dade – Multimodal Seaport Development

### Miami Harbor Phase III Dredge

PortMiami recently completed its Deep Dredge program increasing the channel depth to minus 50'/52' feet along with the wharves strengthening in this area. The Port can handle larger ships thus is ready to accommodate the new generation of containerized cargo. We are Big Ship Ready!

### **Gantry Cranes**

The Port now has six (6) Super Post Panamax Gantry cranes and needs four (4) more to effectively service simultaneously two (2) Post Panamax cargo vessels thus the port is buying four (4) more cranes.

### **Cargo Yard Modernization**

PortMiami has invested tremendously to receive larger cargo vessels, by dredging the channel, purchasing new cranes and constructing a tunnel with direct access to the national highway system. In order to handle the increased volume of containers, the port must concentrate on the modernization of its cargo yards through the investment in rubber tired gantry (RTG). Electrification infrastructure and subsurface strengthening program.

### **Cargo Gates Modernization**

The Port will participate with terminal operators to construct modern gate systems to alleviate trucker turn times and labor costs.

#### **Bulkheads**

The Port is investing in construction technologies to extend the life of its bulkheads. To improve the cruise berths, the Port will implement corrosion protection and seafloor stabilization, while construction methods for the bulkheads along the cargo berths are still being analyzed. Additionally, the Port will be constructing new cruise berths for the next generation of cruise vessels.

### **Federal Inspection Station**

The port, in its effort to modernize its cargo yards, will be relocating various security functions to one centralized Federal Inspection Station (FIS), thus freeing up land for additional cargo laydown space and providing for state of the art security on port.

### **Cruise Terminal Expansion**

Cruise terminal improvements are preparing the Port for larger cruise ships and continue to provide the most modern facilities for the convenience of the traveling public. These projects include upgrading and expanding existing terminals as well as new terminals.

# **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Public Transportation Improvements

# Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

#### **PUBLIC TRANSPORTATION IMPROVEMENTS**

# Miami-Dade County Department of Transportation and Public Works

(Formerly known as Miami-Dade Transit)

## **Specific Aspects of the Program**

The FY 2018 Transportation Improvement Program includes funding over the next five years for the following projects:

### **Urban Corridor Development**

State Transit Corridor Program funds will be used for the continuation of several successful South Miami-Dade Busway routes as well as the Flagler MAX route, the Kendall Cruiser, the Busway MAX, and various 95 Express routes.

## **Routine Replacement and Enhancement**

### Metrorail New Vehicle Replacement

The Miami-Dade Board of County Commissioners (BCC) and the Citizens' Independent Transportation Trust (CITT) in March 2008 approved the \$376 million procurement of 136 new rail vehicles for replacing the existing fleet.

The new vehicles will feature the latest technological advances which will significantly improve passenger comfort, efficient maintenance and operations. The pilot vehicles are in the Hitachi Manufacturing Facility in Medley and are due to commence testing at the Lehman Center in the second quarter of 2017.

### **Bus New Vehicle Replacement**

The Department of Transportation and Public Works (DTPW) continues to implement its bus replacement program. Funding for this program is provided through various sources including the PTP, FDOT and Federal funding sources. DTPW's bus fleet is continuously aging; therefore an aggressive bus replacement plan is in place to ensure compliance with FTA's bus retirement criteria.

The procurement of alternative fuel buses for replacements and enhancements would not only be an improvement to transit but also promote the county's long-term initiative towards a state of good repair, economic competitiveness, livability, sustainability, safety, job creation, and economic stimulus.

After examining various alternative fuels, DTPW decided to migrate its bus fleet to clean-burning, compressed natural gas (CNG). In addition to CNG, DTPW will also acquire its first 33 electric-powered, zero emission buses. These vehicles will be the first of their kind in Miami-Dade County's Metrobus Fleet, and complement the ongoing modernization of the fleet. DTPW has an option to purchase up to an additional 42 buses. These new vehicles are slated to be in service by late 2017.

### Safety and Security

DTPW has programmed funding to purchase security equipment to upgrade and install closed circuit camera television (CCTV) systems and its respective software components, and to continue the replacement of fire detection and reporting systems. DTPW's commitment to the safety and security of the DTPW system, patrons, and employees is of the highest of priorities. In an effort to further complement its existing security infrastructure, DTPW continues to aggressively add state-of-the art technology to both reduce crime and to aid law enforcement in proactively securing and safeguarding the transit system. FDOT Rule 14-15.017(2.2.1), however, prevents DTPW from disclosing these improvements/installations in greater detail.

#### MDT Additional Elevators at Dadeland North Metrorail Station

Since its completion in 1984, the Dadeland North Metrorail Station's use has increased dramatically through the years. Because of increasing ridership at the Dadeland North Metrorail Station, the existing bank of elevators (four elevators) does not provide an acceptable level of service during peak hours. Peak passenger flows create congestion and long waiting periods for Metrorail passengers waiting for the elevators, generating complaints from existing customers. DTPW is adding two (2) elevators to the existing parking facility, one elevator at each end of the structure. DTPW is currently in the consultant selection process for design services. The estimated project completion date is May 2021.

#### Parking Space Counters at Metrorail Parking Garages

The purpose of this project is to furnish and install real-time parking space counting systems at seven (7) parking garages located at Dadeland South, Dadeland North, South Miami, Earlington Heights, Okeechobee, Dr. Martin Luther King Jr., and Santa Clara Metrorail Stations. The available parking space counting systems will allow Metrorail customers to check real-time parking availability over the Internet using personal electronic devices including Smart phones, Personal Digital Assistants (PDAs), Tablets, etc., and by Electronic Signs located at the entrances to each of the seven (7) garages. The system shall provide "Lot Full" notification when all spaces are occupied. The estimated project completion date is January 2018.

#### The Underline - MPATH/Brickell Backyard Project

The future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Station, will create a linear park that will enhance connectivity, mobility, and biking safety for residents and visitors. In 2015, Friends of The Underline, selected a design consultant to develop the Vision and Master Plan for this project. At the Brickell Backyard, the off-road dedicated bicycle path is located along the west side of the Metrorail structure from the Miami River to SW 8<sup>th</sup> Street and between the Metrorail

Station and SW 13<sup>th</sup> Street. In response to the large pedestrian volume along both sidewalks between SW 8<sup>th</sup> Street and SW 10<sup>th</sup> Street, the bicycle path is realigned to be centered between the Metrorail Columns, creating a dedicated cycletrack that minimizes conflicts between bus and trolley waiting areas and cyclists.

The pedestrian path in this area varies in its location. Between the Miami River and SW 7<sup>th</sup> Street, the design preserves the existing curved path connecting to the Miami River Walk as the pedestrian path. Between SW 7<sup>th</sup> Street and the Brickell Metrorail Station, the path is integrated with an expanded sidewalk along the west side of SW 1<sup>st</sup> Avenue, offering a significant width in order to accommodate perpendicular pedestrian flow from adjacent bus and trolley stops along SW 1<sup>st</sup> Avenue. Between the Brickell Metrorail and Metromover Stations, the path is reoriented, running parallel to the bicycle path from SW 11<sup>th</sup> Street south to SW 13<sup>th</sup> Street. DTPW is currently drafting a project schedule.

### The Underline - Segment A Phase II from 13th Street to SW 19th Avenue

The future 10-mile Underline Corridor, running below the Metrorail from the Miami River to Dadeland South Station, will create a linear park that will enhance connectivity, mobility, and biking safety for residents and visitors. Phase II is approximately 2.3 miles in length and will extend the pedestrian and bicycle paths further south from SW 13<sup>th</sup> Street to SW 19<sup>th</sup> Avenue. DTPW is currently drafting a project schedule.

### East-West Corridor Transit-Oriented Development (TOD) Project

The East-West Corridor is one of six premium transit corridors included in the Strategic Miami Area Rapid Transit (SMART) Plan as endorsed by the Miami-Dade TPO Governing Board. DTPW will conduct a comprehensive planning effort that will inform transit planning in the East-West Corridor, a 10-mile corridor linking the Miami Intermodal Center with Florida International University and the western communities of Miami-Dade County. In June 2016, DTPW submitted a grant application to FTA under the TOD Planning Pilot Program. In October 2016, FTA awarded \$960,000 to DTPW for this project. The total cost for this project is estimated at \$1,200,000 (includes \$960,000 FTA TOD Grant Award + \$240,000 in local matching funds from the ½ cent PTP Surtax Funds via CITT). DTPW is currently finalizing a draft scope of services for this project.

### **Transit Centers with Park & Ride Facilities**

### Kendall Park-and-Ride Facility at SW 127th Avenue

DTPW is constructing a 183-space park-and-ride facility on approximately 2.8 acres located at the southeast corner of SW 88<sup>th</sup> Street (Kendall Drive) and SW 127<sup>th</sup> Avenue. This facility will serve the Kendall Cruiser (Route 288) which began service in June 2010. This site is owned by Florida Power and Light (FPL). On December 2, 2015 the construction contract was advertised. The project is scheduled for completion in September 2017.

### NW 27<sup>th</sup> Avenue and NW 215<sup>th</sup> Street (Unity Station)

A 14-acre vacant parcel adjacent to the intersection of the Turnpike and NW 27<sup>th</sup> Avenue has been identified as a strategic park-and-ride location for the North Corridor (NW 27<sup>th</sup> Avenue) Premium Transit project which is being studied by the Florida Department of Transportation (FDOT). Up to 350 parking spaces are proposed for this facility which would serve the northern most station for new premium transit service in the corridor. This park-and-ride lot also provides strategic transit oriented development (TOD) opportunities. This facility is anticipated to open in 2019.

### SW 8th Street and SW 147th Avenue (Tamiami Station)

An 8-acre vacant parcel of land on the SW corner of the intersection at SW 8<sup>th</sup> Street and SW 147<sup>th</sup> Avenue has been identified as a strategic park-and-ride location for the SR 836 Express Bus Service project. The proposed park-and-ride facility will accommodate approximately 493 parking spaces, which would serve as the western most station for the new premium bus service in the corridor. The estimated completion date is 2020.

### HEFT and NW 12th Street (Dolphin Station)

Property owned by FDOT located adjacent to the intersection of the Homestead Extension of the Florida Turnpike (HEFT), SR 836 and NW 12<sup>th</sup> Street has been identified as a strategic location for a transit center with a park-and-ride facility. This transit center would support the SR 836 Express Bus Service project and provide a potential terminus or stop for several local bus routes serving the Dolphin Mall and nearby cities of Sweetwater and Doral. The scheduled completion date is late 2017.

### Palmetto Expressway at NW 74th Street (Palmetto Intermodal Terminal)

DTPW recommends that the FDOT SR 826/Palmetto Expressway Express Lanes PD&E Study address the feasibility of acquiring an 11.88-acre semi-vacant parcel of land located immediately south of the Palmetto Metrorail Station for the purpose of constructing the Palmetto Station Intermodal Terminal that will include but not be limited to: long-term parking, short-term parking, kiss-and-ride, pool-and-ride and a minimum of 6 bus bays and 2 layover bays.

### Park-and-Ride Lot at South Miami-Dade Busway and SW 112th Avenue

DTPW is currently leasing approximately 454 parking spaces on an existing surface lot located at approximately SW 112<sup>th</sup> Avenue and the South Miami-Dade Busway and is in the process of examining the feasibility of acquiring the site and improving the existing surface parking to better serve transit patrons and improve access to the Transitway.

### Park-and-Ride Lot Expansion at South Miami-Dade Transitway and SW 152nd Street

DTPW is proposing to add 84 parking spaces to the 362 existing parking spaces for the park-and-ride lot located at SW 152<sup>nd</sup> Street and the Transitway for a total of 446. In addition, DTPW would mill and resurface the entire existing parking lot, upgrade

pavement markings, construct additional sidewalks and access points to improve pedestrian access, construct a canopy along the Transitway for passenger cover and comfort, add bicycle parking facilities, provide a kiss-and-ride drop-off area and upgrade parking to include additional disabled parking, stroller parking, vanpool/carpool parking, and electric vehicle parking with associated charging stations. The scheduled completion date is 2021.

### **Transit Centers without Park-and-Ride**

### Panther Station at Florida International University

Florida International University (FIU) constructed a parking garage along SW 8<sup>th</sup> Street with ground floor space reserved for a future transit center. The location of the new parking garage, between SW 112<sup>th</sup> Avenue and SW 109<sup>th</sup> Avenue, presents an access challenge that requires roadway widening to construct bus only lanes and traffic signal improvements to provide bus signal priority at the two intersections along this roadway segment. The new transit center would provide 10 bus bays to accommodate the relocation of the existing DTPW routes from the current bus terminal located near SW 107<sup>th</sup> Avenue/SW 17<sup>th</sup> Street and provide capacity for future routes such as the SR-836 Express Bus, the Flagler Street Bus Rapid Transit (BRT) and express routes operating on the Homestead Extension of the Florida Turnpike (HEFT). Completion of the transit center should coincide with the beginning of the SR-836 Express Bus in 2020.

# <u>Premium Transit Corridors: Incremental Improvements</u>

### East-West Corridor (SR 836 Express Bus Service)

This route would provide premium express transit service along SR 836 from west Miami-Dade County Tamiami Station (SW 8<sup>th</sup> Street and SW 147<sup>th</sup> Avenue) to the Miami Intermodal Center (MIC) and Downtown Miami via SW 137<sup>th</sup> Avenue/SR 836 Extension as well as via the Homestead Extension of the Florida Turnpike (HEFT). This route will feature three legs.

- The first leg (Line A) will provide premium express transit service from the proposed Tamiami Station (park-and-ride/transit facility located at SW 8<sup>th</sup> Street and SW 147<sup>th</sup> Avenue) to Downtown Miami via SW 8<sup>th</sup> Street, SW 137<sup>th</sup> Avenue and SR 836. Service headways will be 10 minutes during the AM/PM peak-hour. The planned long-term improvements for this route will be completed by 2020 using 9 new 60-foot alternative fuel buses.
- The second leg (Line B) will provide premium express transit service from the proposed Panther Station (Florida International University's Modesto A. Maidique Campus (MMC) to the MIC via SW 8<sup>th</sup> Street, SR 821/HEFT and SR 836. This route will operate all day with 20 minute headways. The planned long-term improvements for this route will be completed by 2020 using 3 new 60-foot alternative fuel buses.
- The third leg (Line C) will provide premium express transit service from the proposed Dolphin Station (NW 12<sup>th</sup> Street and HEFT) to Downtown Miami via SR 836. Service headways will be 10 minutes during the AM/PM peak-hour. The planned

long-term improvements for this route will coincide with the opening of the proposed Dolphin Station in late 2017. This route will feature 8 new 60-foot alternative fuel buses.

## **Summary Highlights of SMART Plan Corridors**

#### **Beach Corridor**

The Beach Corridor Premium Transit Extension project will serve the cities of Miami and Miami Beach along a 9.7 mile corridor, crossing Biscayne Bay to link Downtown Miami to Miami Beach. The Beach Corridor area is an epicenter for population and economic growth and a major employment center and tourist destination in the region. As a result, the roadways between Miami and Miami Beach are typically heavily congested. This high bus transit ridership corridor has been identified as a candidate for consideration for premium transit over the past two decades as part of a strategy to address east-west directional travel demands.

#### East-West Corridor

This project will run approximately 10 miles from Miami International Airport west along the SR-836/Dolphin Expressway, to the Turnpike in the vicinity of Florida International University (FIU). It provides multimodal solutions for severe traffic congestion along SR-836, the only east-west expressway in central Miami-Dade County. This project will also serve major activity centers including FIU, Miami International Airport, the Miami Intermodal Center (MIC), Downtown Miami, and PortMiami, while transporting riders to and from major employment areas (Doral, Health District, Central Business District, Brickell, etc).

### Kendall Corridor

The Kendall Corridor project is 10 miles from the Dadeland North Metrorail Station west along SR 94/Kendall Drive/SW 88<sup>th</sup> Street to approximately SW 162<sup>nd</sup> Avenue. This project provides multimodal solutions for severe traffic congestion along Kendall Drive, one of the most congested east-west arterial roadways in Miami-Dade County. The project facilitates the highest demand movement of passengers to and from West Kendall to Downtown Miami.

In 2016, the Florida Department of Transportation (FDOT), District Six, initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions for Kendall Drive. The Kendall corridor is being studied as part of the Strategic Miami Area Rapid Transit, or SMART Plan, which identifies the development of six rapid transit corridors that directly support the mobility of our future population and employment growth. A project kick-off meeting was held in late 2016. The study is scheduled for completion by mid-2018.

#### **North Corridor**

This project is approximately 9.5 miles from the Dr. Martin Luther King Jr. Metrorail Station north along NW 27<sup>th</sup> Avenue to NW 215<sup>th</sup> Street. It will connect the cities of Miami, Opa-Locka, and Miami Gardens with major activity centers, including the Miami-Dade College North Campus, North Dade Health Center, St. Thomas University, Florida Memorial College, Miami Jobs Corps Center, Hard Rock Stadium (home of NFL Miami Dolphins and University of Miami), and Calder Race Course. At the northern end of the project, a new transit terminal and park-and-ride facility will be constructed to provide a connection to Metrobus and Broward County Transit (BCT) routes. The long-term vision includes transit-oriented development (TOD) at the new NW 215<sup>th</sup> Street transit terminal.

In 2016, the Florida Department of Transportation (FDOT), District Six, initiated a Project Development & Environment (PD&E) Study to evaluate proposed transportation solutions for SR 9 / SR 817 / NW 27<sup>th</sup> Avenue. The North corridor is being studied as part of the Strategic Miami Area Rapid Transit, or SMART Plan, which identifies the development of six rapid transit corridors that directly support the mobility of our future population and employment growth. A project kick-off meeting was held in late 2016. The study is scheduled for completion by mid-2018.

#### **Northeast Corridor**

This corridor is roughly defined as U.S. Route 1 from the Downtown Miami area to the Aventura Mall near the Miami-Dade/Broward County line, and is one of the busiest transit corridors in the region. It extends approximately 15 miles through the historic core of the County developed along the Florida East Coast (FEC) railroad and links Aventura, North Miami, North Miami Beach, and Miami Shores with the County's Central Business District located in Downtown Miami.

#### **South Corridor**

This project will run approximately 20 miles from the Dadeland South Metrorail Station along the existing Transitway (aka Busway) to the SW 344<sup>th</sup> Street Park-and-Ride/Transit Terminal Facility. It will connect Florida City, City of Homestead, Town of Cutler Bay, Village of Palmetto Bay, and Village of Pinecrest, which represent the fastest population growth in Miami-Dade County. This Premium Transit Extension project facilitates the highest demand movement of passengers to and from southern Miami-Dade to Downtown Miami.

### **Bus Express Rapid Transit (BERT) Network**

#### Flagler Corridor

In 2016, the Florida Department of Transportation (FDOT), District Six, began a Project Development and Environment (PD&E) study to examine implementation of Bus Rapid Transit (BRT) service and infrastructure improvements along SR 968/Flagler Street

from SR 821/HEFT to SR 5/US-1/Biscayne Blvd. The primary study objective is to evaluate the implementation of a cost-effective, high-ridership BRT system within the SR 968/Flagler Street Corridor that is to be part of an overall interconnected premium transit network. The FDOT project team is currently identifying and refining recommended alternatives. The study is scheduled for completion by mid-2018.

DTPW is coordinating the bus purchase component of this project which includes purchase of 10 new 60-foot alternative fuel buses. Acceptance of vehicles is anticipated in late 2017.

### Overall Status Update for SMART Plan BERT Network Implementation

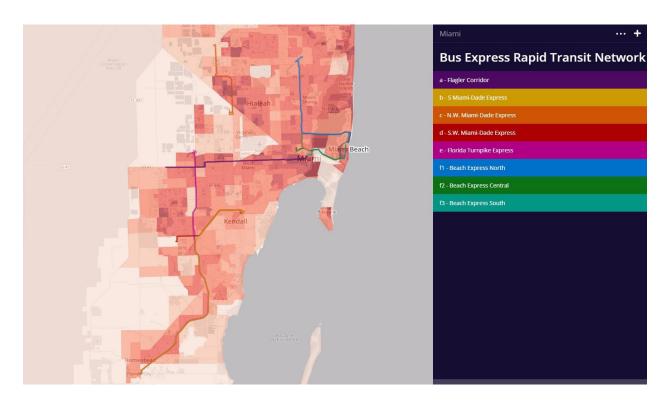

Most of the urban and interregional corridors in Miami-Dade County are already congested. Congestion is expected to worsen even with completion of planned transportation improvement projects. The pace of growth far exceeds the ability to add capacity in order to reduce congested conditions. Significant expansion is required in rail and transit systems to deliver viable options for moving people within Miami-Dade County and the Southeast Florida Region.

In April 2016, Miami-Dade Transportation Planning Organization (TPO) Governing Board adopted the Strategic Miami Area Rapid Transit Plan (SMART Plan), which includes six (6) rapid transit corridors and a Bus Express Rapid Transit (BERT) network. Since then, implementation of the SMART Plan has become a top priority of the Miami-Dade County Department of Transportation and Public Works (DTPW). Subsequently, the Florida Department of Transportation (FDOT), District Six (D-6), and DTPW staff started the planning activities for implementation of the BERT network.

### Implementation of BERT Network

DTPW staff assessed the infrastructure needs for the BERT network. To implement the BERT network, necessary infrastructure projects include new transit terminals, improvement to or expansion of existing terminals, and new direct roadway/ramp connections, etc. Coordination is also required between DTPW and other transportation agencies such as FDOT, Florida's Turnpike Enterprise (FTE) and Miami-Dade Expressway Authority (MDX) to ensure transit access to roadways are supported. Table 1 presents the planning work required to complete these infrastructure improvement projects. Figure 1 shows the complete BERT network with supportive transit terminals.

Figure 1 BERT Network and Transit Terminals

# **Table 1 Planning Study Required for Implementation of the BERT Network**

# SMART PLAN BUS EXPRESS RAPID TRANSIT (BERT) NETWORK

				Planning Organization	ORIO
Project Name	SMART PLAN Route #	Location	Project Description	Distance (miles)	Commission District
Flagler Corridor	a	Flagler from SR-821/HEFT/SW 147th Avenue to Miami Central Station	Route will provide Bus Rapid Transit (BRT) service along Flagler Street from SR-821/HEFT to Miami Central Station. Headways will vary depending on the operating plan, which includes local bus service and limited stop service.	15.4	5, 6, 10, 11, 12
S Miami-Dade Express	b	SW 344 St. Transitway Station/Dadeland North Metrorail Station	Route will provide express bus service from the SW 344th Street Park-and-Ride along the Transitway to the Dadeland North Metrorail Station. Headways will be 10 minutes during peak hours.	24.7	7, 9
NW Miami-Dade Express	С	Miami Gardens Station / Palmetto Metrorail Station	Route will provide express bus service from the Miami Gardens Station to the Palmetto Metrorail Station. Headways will be 10 minutes during peak hours	8.9	12
SW Miami-Dade Express	d	Miami Executive Airport/Dadeland North Metrorail Station	Route will provide express bus service from the Miami Executive Airport to the Dadeland North Metrorail Station. Headways will be 10 minutes during peak hours.	8.5	7, 11
Florida Turnpike Express (South)	е	344 St. Transitway Station/Dolphin Station	Route will provide express bus service from the SW 344th Street Park-and-Ride along the Transitway to Dolphin Station. Headways will be 10 minutes during peak hours.	28.0	9, 11
Beach Express North	f.1	Golden Glades Intermodal Terminal/Miami Beach Convention Center	Route will provide express bus service from Golden Glades Intermodal Terminal to the Miami Beach Convention Center. Headways will be 10 minutes during peak hours and 20 minutes during off-peak hours. Service Span will be from 5:30am to 8:00pm.	13.8	2, 5
Beach Express Central	f.2	Civic Center Metrorail Station/Miami Beach Convention Center	Route will provide express bus service from Civic Center Metrorail Station to the Miami Beach Convention Center. Headways will be 10 minutes during peak hours and 20 minutes during off-peak hours. Service Span will be from 5:30am to 9:00pm.	8.7	3, 5
Beach Express South	f.3	Miami Central Station/Miami Beach Convention Center	Route will provide express bus service from Miami Central Station to the Miami Beach Convention Center. Service will run all day with 10 minute headways. Service Span will be from 5:00am to 2:00am.	6.3	3, 5
			TOTAL DISTANCE (miles)	114.3	
*Florida Turnpike Express (North)	TBD	FIU Panther Station/Miami Gardens Station	Route will provide express bus service from the FIU Panther Station to the Miami Gardens Station. This route will operate all day with 20 minute headways.	14.4	12,13

\*Canidate BERT Route, SMART Plan Amendment Required. If SMART Plan is amended to include this route, Total Distance of BERT Network increases from 114.3 miles to 128.7 miles

### Transportation Improvement Program (TIP)

Part Two: 5-Year Project Listing
South Florida Regional Transportation Authority (SFRTA)

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program PUBLIC TRANSPORTATION IMPROVEMENTS

### **South Florida Regional Transportation Authority**

The South Florida Regional Transportation Authority's (SFRTA) mission is to provide greater mobility in South Florida, thus improving the economic viability and the quality of the Community, Region and State. SFRTA operates the Tri-Rail Commuter Rail System. SFRTA, per its legislation, is charged with the responsibility of having the overall authority to coordinate, develop and operate a regional transportation system within the area served. The following projects are included in SFRTA's Capital Budget and Five Year Plan in the Fiscal Year 2018 thru 2022 period.

#### THE TRI-RAIL COASTAL LINK

The Tri-Rail Coastal Link (TRCL) project is planned to introduce new commuter rail service along 85 miles of the FEC rail corridor and provide new regional and intercity mobility economic development and transportation choice to the traveling public and private sector. TRCL is planned to fully integrate its existing system with the FEC rail corridor and connect with the region's most populous eastern cities between downtown Miami and Jupiter. As a strategic investment for Southeast Florida, it has the potential to transform regional mobility and enhance the long-term competitive position of our region.

### FEDERAL TRANSIT ADMINISTRATION (FTA) GRANT, PILOT PROGRAM FOR TRANSIT-ORIENTED DEVELOPMENT (TOD)

SFRTA received a \$1.25 million FTA grant in September 2015, for TOD planning along the proposed Tri-Rail Coastal Link (TRCL) commuter rail line. SFRTA will partner with the South Florida Regional Planning Council and Treasure Coast Regional Planning Council to complete the study. The work will include comprehensive station area planning, an infrastructure assessment, stationarea bicycle and pedestrian planning, an affordable housing analysis, and will explore creation of a regional TOD Fund. Earlier market and economic analysis of the potential development TRCL could generate identified station-area residential and commercial development in the billions of dollars. The TOD work will provide the region with suggestions on how to realize that economic potential and increase livability and quality of life in South Florida.

### TRI-RAIL REAL-TIME PASSENGER INFORMATION SYSTEM (RTPIS), INCLUDING SMART PHONE APPLICATION

SFRTA 's RTPIS will provide train locations and predicted arrival times at each station via the internet, smartphone app, telephone, text message, and LCD displays location on the station platforms. The system will include onboard signage and an audio system on train cars to display and announce next station arrival and destination information. The train-tracking component is expected to be available via internet and smartphone app.

#### MIAMI RIVER-MIAMI INTERMODAL CENTER CAPACITY IMPROVEMENT

SFRTA is finalizing a Project Development and Environment (PD&E) Study for this project which will provide additional mainline track within the South Florida Rail Corridor from just north of the Tri-Rail Hialeah Market Station to the Tri-Rail Miami Airport Station within the Miami Intermodal Center. The project will evaluate improved track connections across the Miami River, including bridge, track, and signal upgrades.

#### OPA LOCKA PARKING IMPROVEMENTS

The design and construction of the additional parking lot includes improved existing bus waiting and kiss-n-ride areas; increased signage and striping to improve vehicular circulation throughout; and enhanced pedestrian amenities and connection to the station. The existing parking capacity to the station is 72 spaces and 4 bus bays. The improvements will increase parking capacity to meet the year 2020 projection of an additional 45 parking spaces for this station.

#### NEW OPERATION CENTER AND TRI-RAIL POMPANO BEACH GREEN STATION DEMONSTRATION PROJECT

The Operations Center consists of a new 3-story office building, customer service and dispatch center, loading and receiving areas, and a four-story parking garage. The Operations center is built on the existing east parking lot of the Tri-Rail Pompano Beach Station. The Tri-Rail Pompano Beach Green Station Demonstration Project and Operations Center is designed to Silver LEED standards. The project design includes solar power, LED lighting, new bicycle lockers, dedicated alternative fuel-source parking, and carpool parking. It will become SFRTA's green station prototype for future improvements at all tri-Rail stations.

#### **POSITIVE TRAIN CONTROL**

SFRTA plans to install Positive Train Control on all trains. Positive Train Control (PTC) systems are integrated command, control, communications, and information systems for controlling train movements with safety, security, precision, and efficiency. PTC systems will improve railroad safety by significantly reducing the probability of collisions between trains, casualties to roadway workers and damage to their equipment, and over speed accidents. In addition to providing a greater level of safety and security, PTC systems also enable a railroad to run scheduled operations and provide improved running time, greater running time reliability, higher asset utilization, and greater track capacity. They will assist railroads in measuring and managing costs and in improving energy efficiency.

#### PLANNING AND CAPITAL DEVELOPMENT

SFRTA's short and long term planning efforts and activities conducted by the Planning Department are included in this line item. This item facilitates the performance of planning and capital development studies and projects such as the Transit Development Plan (TDP), the development of a station-area Transit Oriented Development (TOD) plan Tri-Rail stations, South Florida East Coast Corridor (FEC) Transit Analysis Study and other studies and plans.

#### PROGRAM OF PROJECTS

#### South Florida Regional Transportation Authority – Public Transportation Improvements

SFRTA receives annual Federal Appropriations Sections 5307 and 5337 funding from the Federal Transit Administration (FTA). This funding is programmed in SFRTA's Capital and Operating Budget to include preventive maintenance costs, such items as rolling stock maintenance, station maintenance, wayfinding, transit enhancements, general engineering consultants, and transit oriented development, which are allowable expenditures of funds under FTA guidelines.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Non-Motorized Component

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

### **NON-MOTORIZED COMPONENT**

The development of safe facilities for people who walk or use a bicycle is guided by the Comprehensive Development Master Plan and the 2040 Long Range Transportation Plan.

CDMP Transportation Element Objective TE-2 states: "In furtherance of pedestrianism and other non-motorized modes of transportation in the planned urban area, Miami-Dade County shall enhance its transportation plans, programs and development regulations as necessary to accommodate the safe and convenient movement of pedestrians, non-motorized vehicles and motorized vehicles."

LRTP Goal 1: Improve Transportation System and Travel

- Objective 1.8: Include provisions for non-motorized modes in new projects and in reconstruction.
- Objective 1.9: Promote non-motorized (bicycle, pedestrian, greenways) project through new projects or reconstruction.

LRTP Goal 2: Increase the Safety of the Transportation System for All Users

- Objective 2.4: Develop and implement safe routes to schools.
- Objective 2.6: Accommodate the safe and convenient movement of non-motorized users

Bicycle and pedestrian projects in the 2018 Transportation Improvement Program are taken from the non-motorized section of the 2040 LRTP, the Transportation Alternatives Program application cycle and through agency coordination for other transportation projects. Projects are presented to the Bicycle/Pedestrian Advisory Committee for public information and comment.

More information on the TPO's Bicycle/Pedestrian Program is available from the TPO website at: <a href="http://miamidadetpo.org/bicycle-pedestrian-program.asp">http://miamidadetpo.org/bicycle-pedestrian-program.asp</a>.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Intelligent Transportation Systems (ITS)

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

### **INTELLIGENT TRANSPORTATION SYSTEMS**

The Intelligent Transportation Systems (ITS) concept is based on the use of advanced computer, electronics and communications technologies to increase the effectiveness of the entire surface transportation system. Many of these technologies have already advanced other modes of transportation, such as aviation, and are now beginning to be used in surface transportation. ITS technologies will be applied to all types of vehicles (trucks, buses and cars), to information devices (computers, kiosks, and handheld devices), and to all parts of the surface transportation system (freeways, urban arterial roadways, city streets, rural roads and intermodal connections) in order to:

Improve Safety by increasing information to the driver and augmenting driver control of the vehicle, ITS can decrease traffic incidents and fatalities. Features include warning systems that activate when cars get too close to another vehicle or the edge of the road and enhanced traffic control systems that decrease strops and speed variations, reducing the number of accidents.

Reduce Congestion and Improve Accessibility: ITS technologies will reduce congestion through rapid detection and clearing of incidents that cause delays; enhanced public transit systems will reduce highway traffic; and real-time traffic control systems will adapt automatically to changing conditions and will improve the flow of traffic.

Improve Energy Efficiency and Environmental Quality: ITS will provide travelers with information to support decisions that will smooth out highway demand and reduce travel time and vehicle emissions by providing opportunities to use high occupancy vehicles or public transit or to mitigate the need for travel altogether.

Enhance Economic Productivity: ITS will improve transportation system efficiency though better routing of vehicles, automated toll collection, safety enhancements and streamlining commercial vehicle regulatory enforcement and compliance.

### Transportation Improvement Program (TIP)

Part Two: 5-Year Project Listing
Transportation Disadvantaged Section (ADA)

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program TRANSPORTATION DISADVANTAGED SECTION (ADA)

Section 427.015, Florida Statutes, requires that the Metropolitan Planning Organization, as part of its Transportation Improvement Program "shall . . . identify transportation improvements that will be advanced with [transportation disabled] funds during the program period." This requirement is reiterated in section 3(f)2.g of the Florida Department of Transportation directive 525-010-012-c ( "Transportation Improvement Program Development and Review"). The purpose of this section is to meet these requirements, and to reference, in a user-friendly format, transportation improvements to assist the safe and efficient transport of those citizens who need special services and facilities to obtain access to life-sustaining activities.

#### **EXPLANATION:**

The projects listed in this section do show funding amounts but no construction schedules. This is because the same projects are also listed in other sections of this document grouping projects by funding category. The items listed are referenced by the page number in which they appear in other TIP sections.

In addition, this section includes pedestrian facilities and sidewalks and some transit passenger amenities which, once completed, could enhance and facilitate usage by not only disadvantaged passengers but the public in general. This section does not include relevant improvements associated with larger transportation projects. Examples would include curb cuts and tactile surface treatments added onto sidewalks as part of an intersection widening and reconstruction, or wheelchair ramps and elevators included within the design of major facilities, as required by the 1991 Americans with Disabilities Act.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing Congestion Management Plan (CMP)

#### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program

#### **Congestion Management Plan (CMP)**

Congestion Management is an integral part of the planning process and the Congestion Management Process (CMP) is required to be developed and implemented pursuant to Title 23 U.S. Code 134 – Metropolitan Transportation Planning in Transportation Management Areas (TMAs). The congestion management process in Miami-Dade is being developed cooperatively with FDOT and is being implemented on a County-wide basis. The application of CMP strategies will improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods through demand reduction and operational improvements.

The FAST Act retained the requirement for a congestion management process for MPOs that serve a TMA, the law also allows an MPO that serves a TMA to develop a congestion management plan (distinct from the congestion management process) that will be considered in the MPO's transportation improvement program. The Miami-Dade 2040 LRTP, adopted October, 2014, included such Congestion Management Plan. The plan identifies proposed projects and programs to reduce congestion and increase job access opportunities.

The Miami-Dade County 2014 Congestion Management Plan Update improved upon the 2009 Miami-Dade Congestion Management Process. The CMP was developed based on the 8-step process outlined in the FHWA CMP Guidebook. CMP objectives were drawn from the Miami-Dade County's 2040 Long Range Transportation Plan (LRTP) goals and objectives and serve as one of the primary points of connection between the CMP and LRTP, and define the direction for development of CMP Performance Measures. Different from the 2009 update, in the 2014 CMP update process, transit, freight, and non-motorized modes are evaluated through the 2040 LRTP update process as a separate effort, thus are not included in the CMP update process.

The project list which follows is based on the adopted 2040 LRTP which incorporated the 2014 Congestion Management Process Update. The process and projects are further detailed on pages 6-64 through 6-71 of the 2040 LRTP document.

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Freight-Related Transportation Improvements

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program FREIGHT-RELATED TRANSPORTATION IMPROVEMENTS

On December 4, 2015, President Obama signed into law the Fixing America's Surface Transportation Act, or "FAST Act". Overall, the FAST Act largely maintains current MAP-21 program structures and funding shares between highways and transit. It is a down-payment for building a 21st century transportation system. These challenges include improving safety, maintaining infrastructure condition, reducing traffic congestion, improving efficiency of the system and freight movement, protecting the environment, and reducing delays in project delivery.

#### **Significant Freight Provisions**

The FAST Act includes a number of provisions to improve the condition and performance of the national freight network and support investment in freight-related surface transportation projects. Specifically, the FAST Act provisions are as follows:

- Establishes a National Multimodal Freight Policy that includes national goals to guide decision-making.
- Requires the Development of a National Freight Strategic Plan to implement the goals of the new National Multimodal Freight Policy. The National Freight Strategic Plan will address the conditions and performance of the multimodal freight system, identify strategies and best practices to improve intermodal connectivity and performance of the national freight system, and mitigate the impacts of freight movement on communities.
- Creates a new discretionary freight-focused grant program that will invest \$4.5 billion over 5 years. This new program allows States, Metropolitan Planning Organizations (MPOs), local governments, tribal governments, special purpose districts and public authorities (including port authorities), and other parties to apply for funding to complete projects that improve safety and hold the greatest promise to eliminate freight bottlenecks and improve critical freight movements.
- Establishes a National Highway Freight Program. The Act provides \$6.3 billion in formula funds over five years for States
  to invest in freight projects on the National Highway Freight Network. Up to 10 percent of these funds may be used for
  intermodal projects.
- Includes new authorities and requirements to improve project delivery and facilitate innovative finance. The FAST Act
  includes provisions intended to reduce the time it takes to break ground on new freight transportation projects, including by
  promoting best contracting practices and innovating financing and funding opportunities and by reducing uncertainty and
  delays with respect to environmental reviews and permitting.
- Collects performance measures for leading U.S. maritime ports. The FAST Act requires the Bureau of Transportation Statistics (BTS) to collect and annually report performance measures for the nation's top 25 ports, as measured by three methods (total tonnage, containers, and dry bulk tonnage).

#### **Freight-Related Transportation Improvements**

The Florida Strategic Intermodal System (SIS) program also has freight-emphasis. The SIS was established to ensure that transportation dollars were invested in areas that supported the local economic generators such as the seaport and the airport and the roadway facilities that connect them. The 2040 Miami-Dade Long Range Transportation Plan (LRTP) Update embraced freight movement with the inclusion of a freight element that includes projects that focus on improving freight movement along major corridors, and specifically, in to and out of Miami International Airport (MIA) and Port Miami. Miami-Dade County is committed to providing a transportation system that enhances the efficiency of freight movement. This commitment is the primary focus of the Freight Transportation Advisory Committee (FTAC). FTAC's membership includes representatives from the freight, logistics, shipping, trucking, warehousing, and intermodal industries. In addition, the Miami-Dade Police Department has joined to educate on Cargo Theft information from Department of Homeland Security. Specifically, FTAC is charged with advising the TPO Governing Board on freight movement and truck traffic needs. FTAC serves as advisors on technical studies, recommends special studies, and reviews and comments on proposed projects that impact the freight movement community.

A major freight related project will serve the Doral Area with the construction of Phase II of the 25<sup>th</sup> Street Viaduct, which will expedite truck movements and retain economic competitiveness of county and regional freight-associated activities. Additional improvements to roadways in several other areas of Miami-Dade address projected traffic flow deficiencies and diminished levels of service; a number of these improvements are recommended for roads that serve the industrial areas of Miami-Dade County.

Several large projects, the reconstruction of the SR 836/826 interchange, the construction of a new ramp in the Golden Glades Interchange to connect eastbound SR 826 and northbound I-95, and work along Okeechobee Rd. will have major impacts on the freight community. Cross-referencing these highway projects as freight projects will help with the recognition that the movement of freight must be maintained during the construction of these projects.

### Transportation Improvement Program (TIP)

Part Two: 5-Year Project Listing
Regionally Significant Transportation Improvements

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program REGIONALLY SIGNIFICANT TRANSPORTATION IMPROVEMENTS

One in three Florida residents live in the southeast region comprised of Palm Beach, Broward, and Miami-Dade Counties. In 2010, Miami-Dade was the 8th largest county in the United States (2.5 million), Broward was the 18th largest county (1.8 million) and Palm Beach was the 28th largest county (1.3 million). The 2010 Census indicated that these three counties made up the nation's 4<sup>th</sup> most populous urbanized area with a population of approximately 5.6 Million.

Hundreds of facilities make up our region's transportation network; facilities that carry freight, auto, and transit traffic. To develop this network, the region critically looked at the intended uses and functionalities of the existing and future facilities to determine what is regional.

This assessment considered technical components as well as the Long Range Transportation Plan's goals and objectives to ensure compatibility and consistency. Ultimately, four criteria were utilized to guide the regional corridor network development: covering roadway, rail and hub. The four criteria definitions and sources are described in detail below.

#### Principal Arterials

<u>Definition:</u> Interstate, Freeway/Expressway and all other Principal Arterials\_ <u>Source:</u> Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013

#### • Planned Physical Extensions of Principal Arterials

<u>Definition:</u> Interstate, Freeway/Expressway and all other Principal Arterials that are in the adopted LRTP Cost Feasible Plans for future expansion

Source: 2035 LRTP Cost Feasible Plan for Broward, Miami-Dade and Palm Beach County MPOs

#### Strategic Intermodal System (SIS) Network

<u>Definition</u>: SIS and Emerging SIS Corridors, Hubs, Connectors, Railways and Waterways Source: FDOT Central Office SIS facilities, April 2013

#### • Principal Arterial Connections

<u>Definition:</u> (1) Minor Arterials connecting to Freeways/Expressways, and/or SIS Corridors; (2) extensions of Principal Arterials that cross the intercostal for evacuation purposes; (3) key connections of "gaps" in the network;

#### **Regionally Significant Transportation Improvements**

(4) Non-principal Arterials carrying 50,000 AADT or greater; and (5) extensions of facilities carrying 50,000 AADT or greater to complete a regional network connection.

<u>Source:</u> Draft 2010 Functional Classification for FDOT Districts 4 and 6, May 9, 2013; FDOT Central Office SIS facilities, April 2013; and Adopted Countywide Evacuation Routes – Broward, Miami-Dade and Palm Beach County.

The following project list reflects regional projects of major significance based upon:

- a. Within the regional network
- b. Capacity projects identified for construction phases
- c. Over \$5,000,000 total construction allocations

### **Transportation Improvement Program (TIP)**

Part Two: 5-Year Project Listing
Public Private Partnership

### Fiscal Years 2017/2018 - 2021/2022 Transportation Improvement Program PUBLIC PRIVATE PARTNERSHIP

#### WHAT IS A P3?

There isn't a universally accepted definition of a P3. The Miami-Dade County P3 Task Force defines it as a "contractual arrangement between a public sector entity and a private sector entity to design, build, finance, operate, and maintain (D-B-FO-M) a public infrastructure facility by the private sector entity with payments made to the private sector entity over the life of the P3 contract either by the public sector entity or by the general public as users of the facility, with the facility remaining in public sector ownership and control, or reverting to public sector control at the end of the P3 contract term. Public sector ownership of the facility is never relinquished by the public sector."

Public Private Partnerships (P3s), agreements between a public agency and a private group, are a growing resource as an innovative way to finance transportation projects. P3s provide greater private-sector involvement to deliver the design, construction, financing, operation and maintenance of transportation improvements as compared to traditional design-bid-build procurements. The transfer of risk including revenue return for which the private sector assumes responsibility differs from project to project.

With the new federal transportation legislation, Fixing America's Surface Transportation (FAST) Act, there are not enough tax dollars to go around for all that government needs to do, not just transportation infrastructure. So, the private sector will play an important role in advancing government projects in the future. Opportunities to benefit through partnering with the private sector require a project of relative urgency, lack of adequate public resources to complete the project in a reasonable timeframe, and a public sponsor/champion able to develop and administer a flexible P3 contract which represents a win-win situation for both public and private partners.

P3 options can be categorized as design-build, design-build-finance, design-build-operate-maintain, design-build-finance- operate-maintain, asset monetization concessions, and build-own-operate. Each of these models has somewhat different implications on the interface between the planning and environmental approval processes and the development of P3 procurements.

#### P3s generally involve the following:

- Financing from the private sector, requiring payments from the public sector and/or users over the lifetime of the project;
- Long contract periods, often around 25–30 years, and, sometimes, longer;
- Private partner funding of the design, construction and, possibly, operation and/or maintenance of the project, while the public partner concentrates primarily on defining the objectives and monitoring compliance with them; and,
- Allocation of risks between the partners.

In legal terms, P3s fall somewhere between public works/services contracts and concessions. While public works/services are paid for through a fee from the public authority, in P3s, regular payment is made either by the public authority from its budget, or through direct payments by users in the form of tolls, or by some combination of the two.

The essential feature of all P3s is that some degree of risk is allocated to the private sector in the following areas:

- Construction: If the product is not delivered on time, or incurs extra costs, or has technical defects, the risk is borne by the partner who pays for such unforeseen items – usually the private partner.
- 2. **Demand:** In cases where there are fewer-than-expected users of the infrastructure on toll roads, bridges, or tunnels the public partner pays a minimum fee regardless of demand, thereby assuming the demand risk.
- 3. **Availability:** Mainly for services to operate and maintain the infrastructure. For example, if the private partner meets safety and/or quality standards, the public sector contractually makes payments, thereby absorbing the risk of the private sector.
